As already stated, an individual who is resident in Canada is taxed on his income from both inside and outside Canada. An individual who is not resident in Canada at any time during the year but who carries on business in Canada or who earns salary or wages in Canada is taxed only on the income earned in Canada. In computing taxable income earned in Canada, such a non-resident individual is allowed to deduct that part of the exemptions and deductions that may reasonably be attributed to the income earned in Canada. (A non-resident who derives investment income from Canada is taxed in a different way described on p. 1131.) An individual who ceases to be a resident of Canada during the year or who becomes a resident during the year so that he is resident for only part of the year will be subject to income tax in Canada on only that part of his income for the year received while he is resident in Canada. In these circumstances, the deductions from income permitted for determining taxable income will be the amount that may reasonably be considered as applicable to the period during which he is resident in Canada.

A progressive schedule of rates is applied to taxable income, beginning at 11 p.c. on the first \$1,000 of taxable income and increasing to 80 p.c. on taxable income in excess of \$400,000. In addition, an old age security tax is levied on taxable income at the rate of 4 p.c. with a maximum of \$240 reached at \$6,000 of taxable income. Starting in 1969, an additional tax, called a social development tax at the rate of 2 p.c. of taxable income with a maximum of \$120, is imposed. For the years 1968, 1969 and 1970, there is also a temporary surtax of 3 p.c. of the amount of basic tax in excess of \$200. ("Basic tax" is personal income tax, excluding the old age security tax, the social development tax and the temporary surtax and after deduction of the dividend tax credit but before the abatement for provincial income tax or the general tax reduction of 20 p.c. with a maximum of \$20.)

An individual is allowed to deduct certain amounts from his tax otherwise payable. These deductions are as follows: (1) *Dividend Tax Credit*—to partially eliminate the double taxation of corporate profits and to encourage participation in the ownership of Canadian companies, Canadian resident individuals are allowed to deduct from their income tax, but not from old age security tax or social development tax, an amount equal to 20 p.c. of the net dividends they receive from Canadian taxable corporations. (2) *Foreign Tax Credit*—foreign taxes paid on income from foreign sources may be deducted from Canadian income tax but the deduction may not exceed the Canadian tax related to such income. (3) *Abatement under Federal-Provincial Arrangements*—the federal basic tax otherwise payable on income of a resident of a province and on income earned in a province is reduced by 28 p.c. in all provinces except Quebec and by 50 p.c. in Quebec. (4) *General Tax Reduction*—all individuals may deduct from their tax an amount equal to the lesser of 20 p.c. of their basic tax or \$20.

To a very large extent, individual income tax is payable as the income is earned. Taxpayers in receipt of salary or wages have tax deducted from their pay by their employer and in this way pay nearly 100 p.c. of their tax liability during the calendar year. The balance of the tax, if any, is payable at the time of filing the tax return on or before Apr. 30 in the following year. Persons with more than 25 p.c. of their income from sources not subject to tax deductions must pay tax by quarterly instalments throughout the year and returns must be filed on or before Apr. 30 in the following year. Farmers and fishermen pay two thirds of their tax on or before Dec. 31 each year and the remainder on or before Apr. 30 in the following year.

The following statement shows what taxpayers pay (1970) at various levels of income. In calculating these taxes it has been assumed that all taxpayers take the standard deduction of \$100 and no allowance has been made for the 20-p.c. dividend tax credit.

<i>Status</i>	<i>Income</i>	<i>Income Tax including Social Development Tax and Surtax</i>	<i>Old Age Security Tax</i>
	\$	\$	\$
Single taxpayer—no dependants.....	1,200	11	4
	1,500	43	16
	2,000	97	36
	2,500	174	56
	3,000	255	76
	5,000	661	156
	10,000	1,989	240
	20,000	6,094	240
	50,000	21,688	240
	100,000	52,475	240
Married taxpayer—no dependants.....	2,200	11	4
	2,500	43	16
	3,000	97	36
	5,000	447	116

	20,000	5,630	240
	50,000	21,121	240
	100,000	51,805	240
Married taxpayer—two children under age 16....	2,800	11	4
	3,000	32	12
	5,000	330	92
	10,000	1,524	240
	20,000	5,352	240
	50,000	20,782	240
	100,000	51,403	240

The income taxes shown above are the combined federal and provincial taxes in provinces where the provincial tax is the same as the federal abatement (i.e., in Nova Scotia, Prince Edward Island, Ontario and British Columbia). In Quebec, the provincial tax approximates the amount of the federal abatement; in Newfoundland, New Brunswick, Manitoba, Saskatchewan and Alberta, the provincial tax exceeds the abatement.

Corporation Income Tax

The Income Tax Act levies a tax upon the income from everywhere in the world of corporations resident in Canada and upon the income attributable to operations in Canada of non-resident corporations carrying on business in Canada. In computing their income, corporations may deduct operating expenses including municipal real estate taxes, reserves for doubtful debts, bad debts, and interest on borrowed money. They may not deduct provincial income taxes other than provincial taxes on income derived from mining operations. (For this purpose "income from mining operations" is specially defined.)

Regulations covering capital cost allowances (depreciation) permit taxpayers to deduct over a period of years the actual cost of all depreciable property. The yearly deductions of normal capital cost allowances are computed on the diminishing balance principle. (Taxpayers engaged in farming and fishing may choose between this and the straight-line method.) Published regulations establish a number of classes of property and maximum rates. There is provision for recapture of any amount deducted in excess of the ultimate net capital cost of any asset.

Accelerated depreciation (full write-off in two years) is allowed in respect of structures and equipment acquired in the period Apr. 27, 1965 to Dec. 31, 1973 to prevent water pollution and in the period Mar. 13, 1970 to Dec. 31, 1973 to prevent air pollution. Accelerated depreciation (full write-off in four years) is also allowed in respect of new buildings or other structures for storing grain on a farm and in respect of machinery designed for drying grain on a farm acquired in the period July 1, 1969 to Dec. 31, 1969. Accelerated depreci-

tion is also allowed for the capital cost of a new manufacturing or processing facility in respect of which a development grant is paid under the Area Development Incentives Act. To be eligible, facilities must be brought into commercial production by the end of 1971. The capital cost allowances that could otherwise be claimed in respect of commercial buildings constructed during the period June 4, 1969 to Dec. 31, 1970 are deferred. For projects commenced between Mar. 12, 1970 and the end of 1970, the deferment will apply to the construction costs incurred up to the end of 1971. The deferment applies in the taxation year in which the costs are incurred and in the next taxation year. Housing, buildings constructed for operation of public utilities or transportation services other than office buildings, and buildings for manufacturing and for farming or fishing are excluded.

Expenditures on scientific research related to the business of the taxpayer may be written off for tax purposes in the year when incurred.

Taxpayers operating mines, oil wells, gas wells and wells for extracting potash by the solution method are allowed a depletion allowance, usually computed as a percentage of profits derived from mineral, oil or gas production, which continues as long as the mine or well is in operation. This allowance is in addition to capital cost allowances on buildings, machinery and similar depreciable assets used by the taxpayer and the deduction of exploration and drilling expenses. Taxpayers operating timber limits receive an annual allowance, sometimes called a depletion allowance. This is a ratable proportion of the amount invested in the limit and is based on the amount of timber cut in the year. When the amount invested in the limit has been recovered, no further allowance is given.

In computing taxable income, corporations may deduct dividends received from other Canadian taxpaying corporations and also from foreign corporations in which the Canadian corporation has at least 25 p.c. stock ownership. Business losses may be carried back one year or forward five years and deducted in computing taxable income. Corporations may also deduct donations to charitable organizations up to a maximum of 10 p.c. of their income.

The general rates of tax on corporate taxable income are 18 p.c. on the first \$35,000 of taxable income and 47 p.c. on taxable income in excess of \$35,000. Corporations deriving more than one half of their gross revenue from the sale of electric energy, gas or steam pay tax on their taxable income from such sources at the rate of 18 p.c. on the first \$35,000 of taxable income and 45 p.c. on taxable income in excess of \$35,000.* Corporations that qualify as investment companies pay a tax of 18 p.c. on their taxable income. In addition to these rates, all corporations pay an old age security tax of 3 p.c. of taxable income, bringing their rates up to 21 p.c. and 50 p.c. (21 p.c. and 48 p.c. for the public utility companies and 21 p.c. for investment companies).

On profits earned in 1968, 1969 and 1970, corporations must also pay a surtax of 3 p.c. of the amount of federal tax excluding old age security tax but before the abatement under federal-provincial fiscal arrangements referred to below. Starting in 1969, life insurance corporations have to pay a special 15-p.c. tax on a base related to their investment income. This is in addition to the normal corporation income tax.

Corporations are allowed to deduct certain amounts from their tax otherwise payable. These deductions are as follows: (1) *Foreign Tax Credit*—foreign taxes paid on income from foreign sources may be deducted from Canadian income tax but the deduction may not exceed the Canadian tax related to such income. (2) *Abatement under Federal-Provincial Fiscal Arrangements*—corporations may deduct from their tax an abatement equal to 10 p.c. of their taxable income attributable to operations in each Canadian province. This abatement is to make room for the provincial income tax levied by each province. (3) *Provincial Logging Tax*—corporations may deduct from their tax an amount equal to two thirds of a provincial tax on income from logging operations not exceeding two thirds of 10 p.c. of the corporation's income from logging operations in the province. (At present only Ontario, Quebec and British Columbia impose logging taxes—see p. 1138.)

* 95 p.c. of the federal tax collected from these corporations is remitted to the provinces.

Income from the operation of a new mine, including income from wells for extracting potash by the solution method, is exempt from income tax during the first 36 months after coming into commercial production.

Corporations are required to pay their tax (combined income, surtax and old age security tax) in monthly instalments. For taxation years starting after Nov. 30, 1969, corporations have to begin their monthly tax payments in the first month of their taxation year and make their twelfth instalment by the last day of that year. Each monthly remittance will be equal to (a) one twelfth of the tax as estimated by the corporation at the rates for the year on its estimated taxable income for the year or, (b) in each of the first two months in the year an amount equal to one twelfth of the tax as estimated by it at the rates for the year on its taxable income for the second taxation year preceding the year, and in each of the next 10 months in the year an amount equal to one tenth of the amount remaining after deducting the amount paid in the first two months from the tax as estimated by it at the rates for the year on its taxable income for the immediately preceding year. Any balance of tax outstanding has to be paid by the last day of the third month following the close of the taxation year and the return for the year has to be filed by the last day of the sixth month following the close of the taxation year.

Taxation of Non-residents

A non-resident is liable for payment of income tax if he was employed or was carrying on business in Canada during a taxation year. The expression "carrying on business in Canada" includes (1) maintaining a permanent establishment in Canada, (2) processing goods even partially in Canada, and (3) entering into contracts in Canada. The taxable income of a non-resident individual derived from carrying on business in Canada or from employment in Canada is taxed under the same schedule of rates as Canadian resident individuals. Profits earned in Canada by a non-resident corporation carrying on business in Canada are taxed at the regular rates of corporation income tax and are also subject to an additional tax of 15 p.c. This additional tax is imposed on profits attributable to the branch after deducting therefrom Canadian federal and provincial income taxes and an allowance in respect of the net increase in capital investment in property in Canada. (Tax treaties with some countries provide certain exemptions from tax for remuneration for services performed in Canada by residents or employees of these countries. They also prohibit Canada taxing profits of a non-resident enterprise unless that enterprise has a permanent establishment in Canada.)

Furthermore, the Income Tax Act imposes a tax at the rate of 15 p.c. on certain forms of income paid by residents of Canada to non-resident persons. It applies to interest (other than interest on government bonds issued after Apr. 15, 1966, interest on certain bonds issued before Dec. 20, 1960 and interest paid to certain exempt lenders), dividends, rentals, royalties, income from a trust or estate and alimony, and applies whether the income is paid to non-resident individuals or to corporations. The rate is reduced to 10 p.c. in the case of dividends paid by a company that has a degree of Canadian ownership* and is also 10 p.c. on royalties from motion picture films. This non-resident tax is withheld at the source by the Canadian payer. Non-residents who receive only this kind of income from Canada do not file returns in Canada.

Gift Tax

The Income Tax Act levies a tax upon gifts. The Budget presented on Oct. 22, 1968 announced an increase in the rates of gift tax and a change in the exemptions with respect to gifts made after that date. The rates now apply to a cumulative gift sum. A "cumulative gift sum" is the aggregate of the taxable value of all gifts made after Oct. 22, 1968, up to the end of the year for which tax is being calculated. The rates of tax range from

* Generally, a corporation is regarded as having a degree of Canadian ownership where 25 p.c. of its equity and voting shares are owned by Canadians and/or corporations controlled in Canada, or where the voting shares of the corporation are listed on a Canadian stock exchange and no more than 75 p.c. of its issued outstanding voting shares are owned by a non-resident alone or in combination with related persons.

12 p.c. on a cumulative gift sum of \$15,000 or less to 75 p.c. where the cumulative gift sum exceeds \$200,000. Gifts from a husband to his wife or from a wife to her husband are exempt. In addition, gifts up to \$2,000 to any number of persons are exempt.

Estate Tax

The estate of a deceased person is subject to estate tax if its value exceeds \$50,000. The tax applies to property passing, or deemed to pass, at death. Property "deemed to pass" includes such property as gifts made by the deceased within three years of his death, pensions or death benefits payable in respect of his death, and annuities purchased by the deceased. All the property of persons who were domiciled in Canada before their death must be taken into consideration no matter where that property is situated; for persons dying domiciled outside of Canada only their property situated in Canada is subject to tax.

In computing the tax of a Canadian domiciliary, the value of the whole estate is first determined. Then the estate debts and certain expenses, such as funeral expenses, are deducted. The remainder is "aggregate net value".

If the aggregate net value of an estate is \$50,000 or less, no tax is exacted. This figure of \$50,000 is not a deductible exemption, but simply an amount at and below which no tax is levied. If an estate is valued at more than \$50,000, it may or may not be taxable depending on the amount of the deductible exemptions, but in no case must the tax reduce the value of the estate, after tax, to less than \$50,000.

Where the aggregate net value of an estate is more than \$50,000 there may be deducted certain amounts in respect of bequests left by the deceased to his or her surviving spouse or children, or to charitable organizations in Canada. There is a complete exemption of the value of property left by the deceased in the form of an outright bequest to his surviving spouse or in the form of a settlement under which only the surviving spouse is entitled, during her (or his) lifetime, to receive all of the income of the settlement, or to receive periodic annual payments out of the income or capital, and under which only the surviving spouse may, during her (or his) lifetime, use or receive the capital. In the case where the surviving spouse is to receive periodic payments, the exemption cannot exceed the value of a capital sum that is determined by regulation to be sufficient to yield the amount of the periodic payment. The exemption is granted only if it is established that the surviving spouse has an indefeasible right to the bequest.

There are also exemptions for bequests to children of the deceased. A bequest to a child over age 25 (if he is not infirm) is exempt to a maximum of \$10,000. A bequest to a child aged 25 or under is exempt to the extent of a maximum of \$10,000, plus \$1,000 for each full year remaining until he is aged 26. If the average income of the child for the previous three years is in excess of \$5,000, the additional exemption is reduced by the excess. A bequest to an infirm, wholly dependent child is exempt to the extent of a maximum of \$10,000, plus \$1,000 for each full year remaining until he is aged 71. In all these cases, the exemption cannot exceed the value of the bequest. An indefeasible bequest to a charitable organization in Canada is also completely exempt.

After these deductions from aggregate net value are made, the amount left is the "aggregate taxable value" to which the tax rates are applied. The first bracket of the rate schedule—from \$0 to \$20,000 of aggregate taxable value—has a zero rate, which in effect constitutes a basic exemption of \$20,000. The next \$20,000 of aggregate taxable value has a rate of 15 p.c. and so on up to the maximum rate of 50 p.c. on the aggregate taxable value in excess of \$300,000. Gifts made by the deceased during his lifetime that were not included in the value of his estate but were in excess of the gift tax exemptions are added to the aggregate taxable value to the extent of the excess, as is the amount of gift tax that would be payable on this excess using rates in force at the time of his death. This is only for purposes of setting the rates of estate tax and an allowance is made in recognition of the gift tax paid on them.

From the tax so calculated may be deducted in the following order (1) a tax abatement in respect of property situated in a province that levies a succession duty, or in respect of foreign personal property transmitted in such a province, (2) a credit for gift tax paid on gifts made by the deceased in cases where the value of the property comprised in the gift has been included in computing the aggregate net value (e.g., where the gift has been made within three years of the death of the donor), (3) a credit for foreign death taxes, and (4) the "notch" credit. The "notch" credit has the effect of preventing the tax otherwise payable on an estate whose aggregate net value is immediately in excess of \$50,000 from reducing the value after tax to less than \$50,000; it also reduces the tax otherwise payable on an estate whose value falls in this "notch" area so that the tax actually payable will not exceed 50 p.c. of the difference between the aggregate net value and \$50,000. The abatement referred to above is in recognition of provincial succession duties. It is a deduction of 75 p.c. from the federal estate tax otherwise payable in respect of property situated, or foreign personal property transmitted, in British Columbia, and of 50 p.c. in respect of such property in Ontario or Quebec (see p. 1126).

Where an exemption from gift tax or estate tax in respect of a gift or bequest from a person to his spouse in the form of a trust or other settlement has been allowed, the property in the settlement at the time of the death of the spouse second to die is deemed to be property passing on her (or his) death. Where the estate tax on such property would have been abated in recognition of provincial succession duties at the time of the death of the spouse first to die, but was not abated because the property was exempt, an appropriate abatement is given at the time of the second death.

In general, the provisions described above apply in respect of property passing on the death of a person who dies on or after Oct. 23, 1968. (For the provisions of the estate tax applicable in respect of property passing on the death of a person who died before Oct. 23, 1968, see the 1968 Canada Year Book, pp. 1015-1016.)

The property situated in Canada of a deceased person not domiciled in Canada is subject to estate tax at a flat rate of 15 p.c. No deduction is allowed against the assessed value of such property except for debts specifically chargeable to it. However, there is a special provision that exempts all such property of less than \$5,000 value and also provides that the tax must not reduce the value of the property after tax to less than \$5,000. (The Estate Tax Convention between Canada and the United States increases this figure to \$15,000.) Where property is subject to provincial succession duty, the 15-p.c. tax is abated by 50 p.c. in the case of property subject to Ontario or Quebec duty and by 75 p.c. with respect to property subject to British Columbia duty.

Excise Taxes

The Excise Tax Act levies a general sales tax and special excise taxes. These taxes are levied on goods imported into Canada and on goods produced in Canada. They are not levied on goods exported. The sales tax, which is at the rate of 9 p.c., is levied on the manufacturer's sale price of goods produced or manufactured in Canada or on the duty-paid value of goods imported into Canada. For alcoholic beverages and tobacco products, the sale price for purposes of the sales tax includes excise duties levied under the Excise Act (see p. 1134). An old age security tax of 3 p.c. is levied on the same basis as the 9-p.c. tax, bringing the total sales tax to 12 p.c. (The total sales tax on most building materials is 11 p.c.)

Some goods are exempt from sales tax. Foodstuffs, drugs, electricity and fuels for lighting or heating are generally exempt, as are articles and materials used by public hospitals and certain welfare institutions. The products of farms, forests, mines and fisheries are, to a large extent, exempt as well as most equipment used in farming and fishing. Machinery and equipment used directly in production and materials consumed or expended in production are not taxed. Also, a number of items are exempt from sales tax when purchased by municipalities. These and other exemptions are set forth in schedules to the Excise Tax Act.

A number of articles are subject to special excise taxes in addition to the sales tax. Where these are ad valorem taxes they are levied on the same price or duty-paid value as the general sales tax. Those levied at present are as follows:—

Cigarettes.....	3 cents per 5 cigs.
Cigars.....	17½ p.c. ad valorem
Jewellery, including clocks, watches, articles of ivory, amber, shell, precious or semi-precious stones, goldsmiths' and silversmiths' products except gold-plated or silver-plated ware for the preparation or serving of food or drink.....	10 p.c. ad valorem
Lighters.....	10 cents per lighter
Playing cards.....	20 cents per pack
Radios.....	the greater of \$2 per radio or 15 p.c. ad valorem
Phonographs and television sets.....	15 p.c. ad valorem
Electron tubes, priced under \$5 per tube, not including television picture tubes.....	10 cents per tube
Television set picture tubes.....	15 p.c. ad valorem
Slot machines—coin, disc or token-operated games or amusement devices.....	10 p.c. ad valorem
Matches.....	10 p.c. ad valorem
Tobacco—pipe tobacco, cut tobacco and snuff.....	90 cents per lb.
Tobacco pipes, cigar and cigarette holders and cigarette rolling devices	10 p.c. ad valorem
Toilet articles, including cosmetics, perfumes, shaving creams, antiseptics, etc.....	10 p.c. ad valorem
Wines—	
Manufactured in Canada—*	
Wines of all kinds containing not more than 7 p.c. absolute alcohol by volume.....	25 cents per gal.
Non-sparkling wines containing more than 7 p.c. absolute alcohol by volume but not more than 40 p.c. proof spirit....	50 cents per gal.
Sparkling wines.....	\$2.50 per gal.
Additional tax applying to all wines whether imported or produced in Canada—	
Wines of all kinds containing not more than 7 p.c. absolute alcohol by volume.....	2½ cents per gal.
Wines of all kinds containing more than 7 p.c. absolute alcohol by volume.....	5 cents per gal.
Insurance premiums paid to British or foreign companies not authorized to transact business in Canada or to non-resident agents of authorized British or foreign companies.....	10 p.c. of net premium for property, surety, fidelity and liability insurance. (Most other kinds of insurance are exempt.)

All the foregoing items, except insurance premiums, are also subject to the general sales tax of 9 p.c. and the old age security tax of 3 p.c. Cigarettes, cigars and tobacco are subject to further taxes, referred to as excise duties (see below).

Excise Duties

The Excise Act levies taxes (referred to as excise duties) on alcohol, alcoholic beverages and tobacco products produced in Canada. These duties are not levied on imported goods but the customs tariff on these products includes a levy to correspond with the duties levied on domestic production. These duties are not levied on goods exported.

Spirits.—The duties are on a proof-gallon basis. These duties do not apply to denatured alcohol intended for use in the arts and in industry, or for fuel, light or power, or for any mechanical purpose. The various duties are as follows:—

On every gallon of the strength of proof distilled in Canada.....	\$14.25
On every gallon of the strength of proof used in the manufacture of—	
Medicines, extracts, pharmaceutical preparations, etc.....	\$1.50 per gal.
Approved chemical compositions.....	15 cents per gal.
Spirits sold to a druggist and used in the preparation of prescriptions.....	\$1.50 per gal.
Imported spirits when taken into a bonded manufactory in addition to other duties.....	30 cents per gal.

* The customs tariff on wines includes a levy to correspond with these taxes on domestic production.

Canadian Brandy.—Canadian brandy, a spirit distilled exclusively from juices of native fruits without the addition of sweetening materials, is subject to a duty of \$12.25 per proof gallon.

Beer.—All beer or other malt liquor is subject to a duty of 42 cents per gallon.

Tobacco, Cigars and Cigarettes.—The excise duties make up nearly as large a part of the total tax on tobacco products as the special excise taxes already described. The rates are as follows:—

On manufactured tobacco of all descriptions, except cigarettes.....	35 cents per lb.
Cigarettes weighing not more than 3 lb. per thousand (nearly all of the cigarettes used in Canada are of this type).....	\$4.00 per thousand
Cigarettes weighing more than 3 lb. per thousand.....	\$5.00 per thousand
Cigars.....	\$2.00 per thousand
Canadian raw leaf tobacco when sold for consumption.....	10 cents per lb.

Combined Effect of Excise Taxes and Excise Duties on Tobacco Products

Bringing together the taxes imposed on tobacco products under the Excise Tax Act and the duties imposed under the Excise Act gives the following total taxes:—

Cigarettes.....	\$10.00 per thousand (20 cents per pack of 20 cigarettes) plus the 12-p.c. sales tax on the manufacturer's sale price
Manufactured tobacco.....	\$1.25 per lb. plus the 12-p.c. sales tax on the manufacturer's sale price
Cigars.....	\$2.00 per thousand plus the 17½-p.c. special excise tax and the 12-p.c. sales tax on the manufacturer's sale price.

Customs Duties*

Most goods imported into Canada are subject to customs duties at various rates as provided by tariff schedules. Customs duties, which once were the chief source of revenue for the country, have declined in importance as a source of revenue to the point where they now provide less than 10 p.c. of the total. Quite apart from its revenue aspects, however, the tariff still occupies an important place as an instrument of economic policy.

The Canadian Tariff consists mainly of three sets of rates, namely, British Preferential, Most-Favoured-Nation and General. The British Preferential rates are, with some exceptions, the lowest rates. They are applied to imported dutiable commodities shipped directly to Canada from countries within the Commonwealth. Special rates lower than the ordinary preferential duty are applied on certain goods imported from designated Commonwealth countries.

The Most-Favoured-Nation rates apply to goods from countries that have been accorded tariff treatment more favourable than the General Tariff but which are not entitled to the British Preferential rate. Canada has Most-Favoured-Nation arrangements with almost every country outside the Commonwealth. The most important agreement providing for the exchange of Most-Favoured-Nation treatment is the General Agreement on Tariffs and Trade.

The General Tariff applies to imports from countries not entitled to either the Preferential or Most-Favoured-Nation treatment. Few countries are in this category and, in terms of trade coverage, are negligible.

In all cases where the tariff applies there are provisions for drawbacks of duty on imports of materials used in the manufacture of products later exported. The purpose of these drawbacks is to assist Canadian manufacturers to compete with foreign manufacturers of similar goods. There is a second class of drawbacks known as "home consumption" drawbacks. These apply to imported materials used in the production of specified classes of goods manufactured for home consumption.

The tariff schedules are too lengthy and complicated to be summarized here but the rates that apply on any particular item may be obtained from the Department of National Revenue, which is responsible for administering the Customs Tariff.

* See also p. 1109.

Subsection 2.—Provincial Taxes

All of Canada's ten provinces impose a wide variety of taxes to raise the revenue necessary for provincial purposes. All provinces levy a tax on the income of individuals and corporations resident within their boundaries or deriving income from activities or operations carried out therein. Only the Provinces of Ontario and Quebec impose special taxes on corporations in addition to income tax and only the Provinces of Ontario, Quebec and British Columbia impose a tax on property passing at death; the remaining provinces receive payment from the Federal Government of their 75-p.c. share of estate tax levies. Under the terms of the existing federal-provincial fiscal arrangements, the Federal Government makes "equalization payments" to some provinces in recognition of the fact that the potential tax yield in those provinces, measured on a per capita basis, is lower than the national per capita tax yield. For some provinces, the equalization payments constitute a very important source of revenue.

Some of the more important provincial levies are reviewed briefly on this and following pages.

Individual Income Tax

All provinces levy a tax on the income of individuals who reside within their boundaries or who earn income therein. In nine of the ten provinces, these taxes are computed as a percentage of federal "basic tax". As previously explained, "basic tax" is federal income tax (excluding old age security tax and the social development tax) otherwise payable at full federal rates before the abatement under the federal-provincial fiscal arrangements and before allowance for the federal tax reduction passed in 1966. These provincial taxes are collected by the Federal Government on behalf of these provinces. In Quebec, provincial income tax is levied at graduated rates that progress from 5.5 p.c. on the first \$1,000 of taxable income to a maximum of 40.0 p.c. on the excess over \$400,000. In addition, a 6-p.c. surtax was levied for the taxation years 1968, 1969 and 1970. The determination of taxable income for Quebec tax is based on exemptions and deductions which, with the exception of deductions for dependent children eligible for family allowances,* are similar to those for federal tax. Quebec taxpayers whose net income does not exceed \$4,000 if married or in a situation recognized as equivalent and \$2,000 in other cases are exempt from payment of the tax. If the taxpayer's income exceeds such amounts, the tax to be paid will not reduce his income to less than \$4,000 or \$2,000 as the case may be. The Province of Quebec collects its own tax.

The percentages that provincial income tax liability is of federal "basic tax" for 1970 are: Prince Edward Island, Nova Scotia, Ontario and British Columbia each 28 p.c., Newfoundland and Alberta 33 p.c., Saskatchewan 34 p.c., New Brunswick 38 p.c., Manitoba 39 p.c. and Quebec approximately 50 p.c.

Corporate Income Tax

All provinces levy a tax on the profits of corporations derived from activities carried out within their boundaries. In all provinces except Ontario and Quebec, the provincial tax imposed on taxable income in the province is determined on the same basis as for federal income tax. In Ontario and Quebec, the determination of taxable profits for purposes of provincial tax follows closely the federal rules. Six of the ten provinces levy corporate income taxes at rates in excess of the 10-p.c. abatement allowed by the Federal Government. The rate that applies in Saskatchewan and Alberta is 11 p.c., in Ontario and Quebec, 12 p.c. and in Newfoundland and Manitoba, 13 p.c. All provinces except Ontario and Quebec have signed agreements for the collection of the corporate income taxes by the Federal Government.

* Quebec has a family allowance program which supplements the federal program; it provides for half-yearly allowances that range from \$15 for one child to \$142.50 for six, and an extra \$35 for each child after the sixth. The Quebec program is in lieu of exemptions for provincial income tax purposes for children eligible for family allowances. (See also p. 390.)

Taxes on Alcoholic Beverages and Tobacco

Generally speaking, the sale of spirits in all provinces is made through provincial agencies operating as boards or commissions which exercise monopolistic control over alcoholic beverages. The provincial mark-up over the manufacturer's price is the effective means of taxation. Beer and wine may be sold by retailers or government stores, depending on the province, but in all cases these sales contribute to provincial revenues. The Province of Prince Edward Island imposes a tax of 10 p.c. on all beer, wine and spirits sold at retail, collected under authority of the Health Tax Act, and in Newfoundland a tax of 7 p.c. is imposed at retail level.

All provinces except British Columbia impose special retail taxes on the sale of tobacco products. The rates of tax on cigarettes are as follows: Newfoundland, $\frac{1}{2}$ cent per cigarette; Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Ontario and Manitoba, $\frac{3}{8}$ ths cent per cigarette; and Saskatchewan and Alberta, $\frac{5}{8}$ ths cent per cigarette. In addition, the provinces impose special taxes on cigars and cut tobacco.

Retail Sales Taxes

Retail sales taxes are levied on the final purchaser or user and are collected by the retailer. All provinces except Alberta levy this type of tax at rates as follows: Newfoundland, Prince Edward Island and Nova Scotia, 7 p.c.; New Brunswick and Quebec, 8 p.c.; and Ontario, Manitoba, Saskatchewan and British Columbia, 5 p.c. These direct levies apply to tangible taxable commodities sold, with varying exemptions, for consumption in the province and to a few selected services, for example: to telephone services in all provinces; in Quebec, to telecommunications, meals and hotel and motel charges; in Prince Edward Island, to laundry and dry cleaning services, to accommodations, and to repair and installations labour; in New Brunswick, to telecommunications, to meals and hotel and motel charges and to laundry and dry cleaning charges; and in Manitoba, to a broad range of services including dry cleaning, furniture repairs, motel accommodation, etc. The sales taxes do not apply to goods sold for delivery in other provinces or to exported commodities. All provinces imposing sales taxes provide comprehensive exemptions for foodstuffs and drugs; in Quebec, pharmaceutical products are exempt only when sold on prescription.

Amusement Taxes

Each of the provinces with the exception of Newfoundland, Alberta, Saskatchewan and British Columbia has a tax on admission to places of entertainment. In Quebec, this tax is payable on race course admissions only. In addition, there is generally a licence fee imposed on the operator or owner of these amusement places. The tax on admissions is within the range of 5 p.c. to 15 p.c.

Gasoline and Diesel Fuel Oil Taxes

Each of the ten provinces imposes a tax on the purchase of gasoline by motorists and truckers. The rates vary from 13 cents per gallon in British Columbia to 21 cents in Prince Edward Island and 25 cents in Newfoundland. The amount of tax borne by one gallon of motor vehicle fuel in each province is as follows:—

	Gasoline	Diesel Fuel		Gasoline	Diesel Fuel
	cts.	cts.		cts.	cts.
Newfoundland.....	25	25	Ontario.....	18	24
Prince Edward Island ¹	21	21	Manitoba ²	17	20
Nova Scotia.....	21	27	Saskatchewan ⁴	19	21
New Brunswick.....	20	23	Alberta.....	15	17 ⁵
Quebec ³	19	25	British Columbia.....	13	15

¹ Gasoline and diesel fuel used by primary producers—farmers, fishermen, manufacturers and processors—are exempt from tax as are also gasoline and motor fuel used by owners or operators of registered pleasure craft and ski-tows, and that used by consumers engaged in the construction of the Northumberland Strait Crossing.

² Some relief from taxation is given where gasoline or fuel oil is used for farming, manufacturing, commercial fishing and in stationary engines.

³ Exemptions are allowed on purple fuel used in operating agricultural machinery, farm trucks and municipal fire apparatus, and in trapping, fishing and prospecting.

⁴ Gasoline and diesel fuel used by farmers in farm machinery and trucks are exempt from tax.

⁵ Three cents less for domestic heating. Generally, fuel oil used for agricultural and industrial purposes is taxed at three cents per gallon.

The British Columbia net tax rate (after refund) on gasoline used in logging trucks off highway, in power units of motor vehicles for stationary industrial use, and in vehicles used by amputees, paraplegics and certain war disability pensioners is one cent per gallon. Gasoline coloured purple for certain off-highway use (including marine) and motor fuels, being any fuel except gasoline not consumed on provincial highways, are also taxed at one cent per gallon. Fuel oil used for heating purposes is taxed at one half cent per gallon.

Motor Vehicle Licences and Fees

Each province levies a fee on the annual registration of motor vehicles, which is compulsory. Upon registration, a vehicle is issued with licence plates. The rates of fee vary from province to province and, in the case of passenger cars, may be assessed on the weight of the vehicle, the wheel base, the year of manufacture, the number of cylinders of the engine, or at a flat rate. The fees for commercial motor vehicles and trailers are based on the gross weight for which the vehicle is registered, i.e., the weight of the vehicle empty plus the load it is permitted to carry. Every operator or driver of a motor vehicle is required to register periodically and pay a fee for a new driver's licence. The licences are valid for periods of from one to five years and the fees vary from \$1 to \$7 a year.

Taxes on Mining Operations

All provinces except Prince Edward Island levy taxes of various kinds on mining operations. All provinces except Prince Edward Island and Alberta impose a tax on the income of firms engaged in mining operations in general or in specific kinds of mining operations. The Provinces of British Columbia, Alberta, Saskatchewan and Manitoba (gas, oil and potash only) impose a tax on the assessed value of minerals or a flat rate per acre of mining property. Quebec levies a tax on the economic value of the ore at the pit-head, ranging between 9 and 15 p.c., depending on volume. Ontario imposes a tax on the profit on the assessed value of minerals and a flat rate per acre of mining property. Manitoba imposes a flat rate of 15 p.c. if mining income exceeds \$50,000. The British Columbia mining tax rate is 15 p.c. on net income from mining in excess of \$10,000.

Tax on Logging Operations

The Provinces of Quebec, Ontario and British Columbia levy a tax on the income from logging operations of individuals, partnerships, associations or corporations engaged in this activity. In Quebec and Ontario the rate is 10 p.c. and in British Columbia 15 p.c. on net income where in excess of \$10,000 (in Quebec and British Columbia if the net income is greater than \$10,000 the whole amount is taxable with no basic exemption). In Ontario and Quebec one third and in British Columbia 20 p.c. of the tax is allowed as a deduction from provincial corporate income tax or, in Quebec, from the provincial income tax; two thirds of the provincial tax is deductible from federal income tax.

Business Taxes

The Province of Quebec imposes a tax of one fifth of 1 p.c. on paid-up capital of corporations and Ontario levies a similar tax at the rate of one tenth of 1 p.c.

The Province of Quebec has a place-of-business tax, which is generally \$50 but is reduced to \$25 when the paid-up capital is less than \$25,000; in the case of loan companies, the tax is \$100 when fixed capital exceeds \$100,000.

Both Ontario and Quebec levy special taxes on certain kinds of companies such as banks, railway companies, express companies, trust companies and sleeping-car, parlour-car and dining-car companies. In Ontario, these special taxes (except the tax payable by insurance corporations calculated on gross premiums) and the paid-up capital tax are payable over and above the corporation income tax.

The Province of Prince Edward Island charges special annual licence fees to most insurance companies, banks, acceptance companies, chain theatres and chain stores, steamship companies, telephone, telegraph and electric light companies and brokers, as well as nominal licence fees to other incorporated companies, the latter being similar to filing fees in other provinces.

Land Transfer Taxes

Ontario levies a tax based on the price at which ownership of land is transferred; one fifth of 1 p.c. is imposed on the purchase price up to \$25,000 and two fifths of 1 p.c. on anything in excess of that amount. In Alberta, a registration fee is charged proportional to the assessed value of the land; \$5 for the first \$1,000 and \$1 for each additional \$1,000 up to \$25,000 and two fifths of 1 p.c. in excess of that amount. In addition, there is an Assurance Fund fee charged on transfers of mortgages on the difference between the old purchase price and the new purchase price at the rate of \$2 per \$1,000 up to \$5,000 and \$1 for each additional \$1,000. British Columbia and Saskatchewan do not have a land transfer tax but have an equivalent in land title fees which are based on land values.

Tax on Security Transfers

The Provinces of Ontario and Quebec levy a tax on the sale price of securities transferred; the rates in both provinces are:—

Shares sold, transferred or assigned valued at—

Under \$1.....	$\frac{1}{10}$ th of 1 p.c. of value
\$ 1 to \$ 5.....	$\frac{1}{2}$ cent per share
\$ 5 to \$ 25.....	1 cent per share
\$25 to \$ 50.....	2 cents per share
\$50 to \$ 75.....	3 cents per share
\$75 to \$150.....	4 cents per share
Over \$150.....	4 cents per share plus $\frac{1}{10}$ th of 1 p.c. of value in excess of \$150
Bonds and debentures.....	3 cents for every \$100 or fraction thereof of par value.

Tax on Premium Income of Insurance Companies

All ten provinces impose a tax of 2 p.c. on the premium income of insurance companies relative to risks incurred in the province. Saskatchewan imposes a tax of 1 p.c. on the motor vehicle premium income of insurance companies to finance a comprehensive high school driver-training program.

Succession Duties

Only the Provinces of Ontario, Quebec and British Columbia levy succession duties. These duties are a tax upon the right to succeed to property and are assessed upon the interest or benefit passing at death to an heir or beneficiary. The three provinces impose succession duties on all property situated in the province belonging to the deceased and passing at his death whether the deceased was domiciled in the province or elsewhere. Personal property, wherever situated, of a person dying domiciled within the province is also liable if passing to a successor resident or domiciled in the province.

The rates of succession duty are generally governed by the value of the estate, the relationship of the beneficiary to the deceased and the amount going to any one person. In British Columbia, exemptions allowed in determination of the estate value also vary according to the relationship to the deceased. The rate of tax increases as the degree of relationship between the deceased and his successor becomes more remote.

Newfoundland, Prince Edward Island, Nova Scotia, New Brunswick, Manitoba, Saskatchewan and Alberta, while not imposing succession duties, each receives 75 p.c. of the Federal Government estate tax levied on property situated within its borders. In both Saskatchewan and Alberta the share of estate tax is rebated in full where the deceased was a bona fide resident of the province and up to 75 p.c. of the share of estate tax for a deceased domiciled out of the province whose beneficiary is domiciled in the province.

Provincial Property Taxes

In unorganized (non-municipal) areas, British Columbia levies property taxes at varying rates according to class for provincial revenue. Improved forest and tree-farm lands are taxed at 1 p.c. of assessed value; farm land at one half of 1 p.c.; wild land at 3 p.c.; coal land at 2 p.c. (non-operating) or 7 p.c. (operating); and timber land at 1½ p.c. In unorganized (non-municipal) areas, Ontario levies a property tax of 1½ p.c. of assessed value; the minimum annual tax in respect of any land is \$6. New Brunswick levies a tax of \$1.50 per \$100 market value assessment on all land and buildings in the province and a similar tax on business occupancy, to finance education, health, welfare and justice services.

Race Track Taxes

Ontario levies a tax on operators of race meets and on holders of winning tickets issued under the pari-mutuel system. Holders of winning tickets must pay a tax equal to 7 p.c. of the amount that would be payable to them if no percentage were deducted by the person holding the race meet. A number of other provinces levy a pari-mutuel tax on money bet in the province on horse races; in Newfoundland the rate is 11 p.c., in Prince Edward Island 11½ p.c., in Nova Scotia 11 p.c. on the first \$400,000 wagered and a reduced percentage on any additional money wagered (some of this money is refundable to the individual race tracks), in New Brunswick 11 p.c. less commission of 8 p.c., in Manitoba 10 p.c. less commission of 15 p.c., in Alberta 5 p.c., in Saskatchewan 10 p.c., and in Quebec 7 p.c. on ordinary pools and 9 p.c. on special pools (quinella and daily-double). In British Columbia the tax is 12 p.c. but the province returns 2½ p.c. of money bet to horsemen and track operators for purses, etc.

Miscellaneous Provincial Taxes

In Newfoundland a tax of 7 p.c. is levied on premiums paid for all types of insurance except life, accident and sickness, and marine; and a telegraph tax is levied on companies operating cables or wireless stations between Newfoundland and points outside the province at the yearly rate of \$4,000 a cable or station.

In Prince Edward Island a fire marshal's tax is levied at the rate of ¾ of 1 p.c. on premiums paid for fire insurance. In Nova Scotia a fire marshal's tax is levied at the rate of one half of 1 p.c. on premiums paid for fire insurance in the province. A tax is also levied on long-distance telephone calls at the rate of five cents on the first 50 cents with a five-cent minimum and five cents on each additional 50 cents, applying only to calls made within the province.

Subsection 3.—Municipal Taxes

The municipalities in Canada levy taxes on the owners of property situated within their jurisdiction according to the assessed value of such property. Methods of determining assessed value vary widely but for taxation purposes it is generally considered to be a percentage of the actual value or, as in Nova Scotia and New Brunswick, of the actual market value. The revenues from such taxes are used generally to pay for street maintenance, schools, police and fire protection, snow removal in certain communities and other community services; in New Brunswick the municipal levy is used only for property service. Special levies are sometimes made on the basis of street frontage to pay for local improve-

ments to the property, such as sidewalks, roads and sewers. Not only is there a widespread difference in the bases used for property tax but there is also a wide variety of rates applied, depending on the municipality.

In addition to the taxes described above, municipalities usually impose a charge for the water consumption of each property holder or a water tax based upon the rental value of the property occupied. In New Brunswick, utilities (water, domestic sewerage and treatment, and electric power) must be financed on a user-charge basis; a part of the water budget may be transferred to the general budget on a hydrant-rental basis or a percentage of the budget, depending on the size of the municipal population. There are no municipal income taxes although certain localities have retained the use of a poll tax. In Newfoundland, Quebec and Saskatchewan, municipalities are empowered to levy an amusement tax on the admission of persons to places of entertainment, although the amusement tax is generally a provincial preserve (see p. 1137). Electricity and gas are taxed at the consumer level in some western municipalities and in some New Brunswick municipalities, and coal and fuel oil for heating purposes are chargeable in urban areas of Newfoundland. Telephone subscribers are subject to a special levy in Montreal and certain Ontario municipalities impose a tax on the gross receipt of telephone companies.

In most municipalities, a tax is levied directly on the tenant or the operator of a business. In general, business tax rates are lower than those applying to property. In New Brunswick, business assessment is equal to the value of the real property occupied for business purposes. Three bases of assessment are in use—a fraction of the property assessment, the annual rental value of the premises, or the area of the premises. Certain municipalities may charge a licence fee instead of a business tax but others charge both a licence fee and a business tax.

Subsection 4.—Miscellaneous Levies

These are not generally referred to as taxes but they are similar to taxes in many ways.

Unemployment Insurance

A national program of unemployment insurance operates in Canada. Essentially, it provides relief to those qualified persons who temporarily find themselves without work. It is administered by a federal commission appointed for this purpose and financed by equal contributions from employers and employees plus a contribution from the Federal Government. The amount paid into the fund by employee and employer is directly proportional to the weekly wages of the employee. The rates of contributions, together with statistics on the operation of the program, are given at pp. 880-884.

Workmen's Compensation

Legislation in force in all provinces provides compensation for personal injury suffered by workmen as a result of industrial accidents. In general, these provincial statutes establish an accident fund administered by a Board to which employers are required to contribute at a rate proportional with the hazards of the industry. See also pp. 884-885.

Hospital Insurance

A federal-provincial hospital insurance plan has been adopted by each of the ten Canadian provinces. Under this arrangement, the Federal Government pays approximately one half of the cost of hospitalization for patients who are participants under the plan. The provinces meet the remainder of the cost. Provincial revenues for this purpose are raised by various means. The Province of Quebec has increased its personal and corporation income tax. Certain provinces require the deduction of a monthly premium from the wages of their residents as a contribution or premium for the plan. In such

provinces non-salaried people must also pay the premium directly if they wish to be covered by the plan. In some other provinces the proceeds of a retail sales tax are earmarked in whole or in part for the support of the hospital plan. See also pp. 335-337.

Canada and Quebec Pension Plans

In 1966, the Canada Pension Plan, a compulsory government-operated pension program, was introduced whereby each contributor builds up a right to a graduated pension, the amount of which is related to his earnings up to a certain level. This graduated benefit supplements the universal old age security pension which is paid out of tax revenues. It operates throughout the country except in the Province of Quebec where a similar pension plan is operated by the government of the province. Both plans have disability and survivor benefits. They are described at pp. 374-378.

Section 3.—Federal Government Finance

Subsection 1 of this Section contains financial statistics of the Federal Government prepared as far as possible in accordance with the classifications, concepts and definitions used in the preparation of provincial and municipal finance statistics. These tables differ from the information presented in Subsection 2 in that the latter has been extracted directly from the *Canada Gazette*. Detailed reports published by the Dominion Bureau of Statistics provide reconciliations of revenue, expenditure and debt as set out in Subsections 1 and 2. The *Canada Gazette* presentation is included because there is interest in and use for information on this basis.

Guaranteed Debt.—In addition to the direct debt already dealt with, the Government of Canada has assumed certain contingent liabilities. The major categories of this indirect or contingent debt are the guarantee of insured loans under the National Housing Act, the guaranteed bonds and debentures of the Canadian National Railways and the guarantee of deposits maintained by the chartered banks in the Bank of Canada. The

remainder consists chiefly of guarantee of loans made by chartered banks to the Canadian Wheat Board, to farmers and to university students and of guarantees under the Export Credits Insurance Act.

¹ In addition, the Government has an indeterminate contingent liability in respect of rental guarantee contracts which, in 1968, amounted to approximately \$12,596,000. Against this amount was a reserve of \$4,658,911 held by the Central Mortgage and Housing Corporation.

² Expressed in Canadian dollars; payable solely in United States dollars and converted on the basis of \$1 U.S. = \$1.08108 Canadian.

³ As reported (in accordance with Sect. 45, National Housing Loan Regulations) by approved lenders at Dec. 31, 1968.

⁴ Includes contingent liability in respect of alternate payments to non-participating provinces.

Table 12 summarizes the national debt position during the period 1961-70 as to interest and amount outstanding. Details of unmatured debt and treasury bills outstanding and information on new security issues of the Federal Government may be found in the *Public Accounts of Canada*. They are summarized by standard classification in DBS publication *Federal Government Finance, Revenue and Expenditure* (Catalogue No. 68-211).

Subsection 3.—Revenue from Taxation

The incidence of Federal Government taxation is dealt with at pp. 1127-1135. This Subsection includes statistical data on revenue received from individual income tax, corporation tax, estate tax, excise duties and excise taxes; customs receipts constitute a single item in the *Public Accounts of Canada* and are not included here.

Individual and Corporation Income Tax

Statistics of income tax collections are gathered at the time the payments are made and are therefore up to date. Over 85 p.c. of individual taxpayers are wage or salary earners who have almost the whole of their tax liability deducted at the source by their employers. All other taxpayers are required to pay most of their estimated tax during the taxation year. Thus, the greater part of the tax is collected during the same year in which the related income is earned and only a limited residue remains to be collected when the returns are filed. The collections for a given fiscal year include employer remittances of tax deductions and Canada Pension Plan contributions and instalments for twelve months, embracing portions of two taxation years, and a mixture of year-end payments for the first of these years and for the preceding year; they cannot therefore be closely related to the statistics for a given taxation year. As little information about a taxpayer is received when the payment is made and as a single cheque from one employer may frequently cover the tax payment of hundreds of employees, the payments cannot be statistically related to taxpayers by occupation or income. Descriptive classifications of taxpayers are available only from tax returns but collection statistics, if interpreted with the current tax structure and the above factors in mind, indicate the trend of income in advance of the final compilation of statistics.

The statistics given in Table 13 pertain to revenue collections by the Department of National Revenue, Taxation. The collections are for fiscal years ended Mar. 31.

13.—Revenue Collected by the Department of National Revenue, Taxation, Years Ended Mar. 31, 1961-70

NOTE.—All collection figures in this table are net of refunds.

Year Ended Mar. 31—	Income Tax ¹				Estate Tax	Total Collections

¹ Includes old age security tax and, from 1962, provincial income tax collected by the Department of National Revenue, Taxation.

² Includes non-resident withholding tax. From 1966, includes Canada Pension Plan contributions by employers, employees and self-employed persons; for 1969 and 1970, includes social development tax.

Income Tax Statistics.—Individual income tax statistics are presented in Tables 14 to 16 on a calendar-year basis and are compiled from a sample of all returns received. Taxpayers and amounts of income and tax are shown for selected cities and by occupation and income classes. Table 17 gives statistics of corporation income tax by industry group by size of assets.

Succession Duties and Estate Taxes

From Jan. 1, 1947 to Mar. 31, 1963, only Ontario and Quebec levied succession duties, the other provinces having leased this field to the Federal Government under the terms of the federal-provincial tax agreements (see p. 1126). However, British Columbia re-entered the field, effective for all deaths occurring on or after Apr. 1, 1963. The incidence of the estate tax is discussed at pp. 1132-1133. Federal revenue from succession duties and estate taxes in the year ended Mar. 31, 1970 amounted to \$100,630,908. In the same year, provincial revenues from succession duties in Quebec, Ontario and British Columbia were estimated at \$42,000,000, \$67,000,000 and \$17,000,000, respectively.

Excise Taxes

Excise taxes collected by the Excise Division of the Department of National Revenue are given for the years ended Mar. 31, 1968-70 in Table 18.

Excise Duties

Gross excise duties collected are given in the following statement for the years ended Mar. 31, 1968-70. The totals do not agree with net excise duties as shown in Table 8 because refunds and drawbacks are included. A drawback of 99 p.c. of the duty may be granted when domestic spirits, testing not less than 50 p.c. over proof, are delivered in limited quantities for medicinal or research purposes to universities, scientific or research laboratories, public hospitals, or health institutions in receipt of federal and provincial government aid.

Section 4.—Federal-Provincial Conditional Grants and Shared-Cost Programs*

During the year ended Mar. 31, 1969, federal expenditures on joint federal-provincial programs, which had increased rapidly over the previous decade, began to slow down. These programs take three forms: (1) the Federal Government contributes financial assistance to a program administered by a province; (2) the federal and provincial governments each assumes the sole responsibility for the construction, administration and financing of separate aspects of a joint project; or (3) the province contributes financially to a joint program administered by the Federal Government.

* As at January 1970. Prepared in the Federal-Provincial Relations Division, Department of Finance, Ottawa.

Federal-Provincial Relations Division, Department of Finance, *Federal-Provincial Conditional Grant and Shared-Cost Programmes 1962*, Ottawa, Queen's Printer, October 1963, \$3 (Catalogue No. F2-2563). Appendix to House of Commons Debates of Sept. 10, 1964. Statutes of Canada 1961-65, c. 54.

The first category of joint programs is by far the most common and such programs are commonly called conditional grant programs. They are characterized by the Federal Government agreeing to make money available to a province on certain conditions, such conditions always specifying the field, service or project to which the money must be applied. In addition to being entrusted with the administration of programs, the provinces may be required to make financial contributions to such programs, to provide certain facilities, and to meet certain specified standards in operating them. The various programs in the field of social policy are good examples of conditional grant programs. Under the hospital insurance program, for instance, the Federal Government undertakes to contribute to participating provinces a specified share of the costs incurred by the provinces in respect of public hospital insurance programs. The federal contribution in each province is equal to 25 p.c. of the average per capita cost of in-patient services in Canada as a whole plus 25 p.c. of the average per capita cost of in-patient services in the province multiplied by the average for the year of the number of insured persons in the province.

Although the hospital insurance program, with its specifications of eligible hospitals, sharable costs and the amount of the federal contribution, is characteristic of many conditional grant programs, there are others in which the conditions are nominal. For example, under the Canada Assistance Plan the Federal Government undertakes to share one half of the cost of welfare paid to recipients in need, the scale and conditions of the assistance to be determined by the provinces. In general, it may be said that the hospital insurance program conforms to the traditional pattern of conditional grants, whereas the Canada Assistance Plan marks an approach in which flexibility and adaptability to local circumstances is allowed to modify insistence on a national uniform standard.

Joint programs in the second category—those in which the federal and provincial governments accept sole responsibility for portions of a total project—are not numerous and are generally of a public works type. The irrigation projects carried out jointly by the Prairie Farm Rehabilitation Administration and the Province of Alberta on the St. Mary's and Bow Rivers in southern Alberta were of this nature. In the St. Mary's irrigation project, the Federal Government undertook the responsibility for the construction of all main reservoirs, large dams and connecting works, and Alberta assumed responsibility for the construction of the distribution system and the development and colonization of the new irrigable areas.

Joint programs in the third category are also few in number and the sums of money involved are seldom large. The South Saskatchewan River dam was an example; Canada undertook to pay the costs of the dam in the first instance, with Saskatchewan subsequently reimbursing Canada for one quarter of the federal expenditures (up to a maximum of \$25,000,000) on the dam and reservoir. By Mar. 31, 1968, the full amount had been recovered from Saskatchewan.

The federal transfers to the provinces in respect of the conditional grant and shared-cost programs increased from \$75,000,000 in the year ended Mar. 31, 1954, to an estimated \$1,626,000,000 in 1968-69. The increase was attributable largely to the introduction of the hospital insurance and diagnostic services program in 1958, medicare in 1968, increases in the level of assistance, and the integration of welfare programs under the Canada Assistance Plan. In 1968-69, federal contributions to the programs in respect of hospital and diagnostic services and welfare programs integrated with and into the Canada Assistance Plan were estimated at \$798,125,000 and \$446,902,000, respectively.

The increasing number and extent of conditional grant and shared-cost programs has occasioned some provincial criticisms and misgivings. It has been argued that the preponderant occupancy of the direct tax field in the postwar years by the Federal Government encouraged the growth of such programs, as the provinces were denied the revenues that would have enabled them to provide equivalent programs themselves. At the 1964 Federal-Provincial Conference, the Province of Quebec proposed that a province be given the option to assume full administrative and financial responsibility for certain joint

programs upon the Federal Government making available to that province the necessary additional tax room. These proposals were referred to a federal-provincial committee of officials for consideration. As a consequence of their consideration, the Prime Minister of Canada, in a letter to the provincial Premiers dated Aug. 15, 1964, proposed a temporary measure permitting a province for an interim period to assume full financial and administrative responsibility in respect of certain programs pending the development of more permanent arrangements. Parliament approved the necessary legislation—the Established Programs (Interim Arrangements) Act—in April 1965. Under the Act, the Government of Canada was authorized to enter into agreements with any province that wished to assume full financial and administrative responsibility for certain programs in return for fiscal compensation. The nature and number of programs were itemized in the schedules to the Act.

Schedule I listed the major conditional grant programs of a continuing nature and Schedule II listed smaller and more transient programs. The Schedule I programs were: (1) hospital insurance; (2) old age assistance, blind persons' allowances, disabled persons' allowances, and the welfare portion of unemployment assistance; (3) the technical and vocational training programs for youths who were not yet members of the labour force; and (4) the health grant program, except those elements that involved research and demonstration. The Schedule II programs were: (1) agricultural lime assistance; (2) the forestry programs; (3) hospital construction grants; (4) campgrounds and picnic areas; and (5) the roads to resources program. The Act was subsequently amended to include the Canada Assistance Plan.

If a province wished to avail itself of the provisions of the Established Programs (Interim Arrangements) Act in respect of a Schedule I program, it had to enter into a supplemental agreement in which it undertook to assume full responsibility for the administration and financing of the program. The Federal Government undertook to ensure that the province received revenue equivalent to the fiscal burden it assumed. The Federal Government undertook to: (a) abate by a specified percentage the individual income tax on the income of residents of the province; (b) pay associated equalization; and (c) make an operating cost adjustment. The operating cost adjustment payment or recovery was to ensure that a province did not suffer or benefit financially through assuming the financing of the federal share of the former joint program. Because of their smaller size and lack of continuity, the compensation associated with a Schedule II program did not provide for federal tax abatement or associated equalization payments. The compensation for these programs was to be paid directly to the province by the federal Minister of Finance.

The freedom of a province to vary the nature and condition of a program enumerated in the Established Programs (Interim Arrangements) Act differed between the Schedule I and Schedule II programs. Under the Act, a supplemental agreement with respect to a Schedule I program could vary the conditions of the original agreement only as to the manner in which Canada would contribute to the program and the manner in which accounts were submitted. A supplemental agreement for a Schedule II program might require the program to be continued as in the original authority or it might allow a province to substitute a provincial program having substantially similar objectives.

The Established Programs (Interim Arrangements) Act was designed to provide for an interim period during which a province might assume greater administrative and financial responsibility for the enumerated programs and during which time more permanent arrangements governing joint programs might be devised. The length of the interim period was set out in the Act for each program and varied from Mar. 31, 1967 to Dec. 31, 1970. The tax abatement associated with Schedule I programs was also set out in the Act and varied from 1 p.c. for the health grant program to 14 p.c. for hospital insurance.

The Province of Quebec alone availed itself of the provisions of the above legislation. At the federal-provincial meetings in September and October 1966, the Federal Govern-

¹ Provinces excepted are shown in parentheses.
² As here used, 50 p.c. may mean the province must contribute 50 p.c. of the cost of the project or must match the federal contribution.
³ P = a maximum limit set to the federal share; P = a maximum limit to the provincial share; and O = federal and provincial shares are open-ended.
⁴ Source: *Public Accounts of Canada, 1962*.
⁵ Represents the provincial and/or municipal share.
⁶ Includes payments to municipalities.
⁷ Not uniform.
⁸ Provinces to provide administration, services, facilities, land, loans or to undertake a specific portion of the project, etc.
⁹ Quebec under the Established Programs (Interim Arrangements) Act received \$8,584,000 for these programs.
¹⁰ Provinces to maintain existing level of expenditures or to bear residuary costs.
¹¹ Share for provision of services only.

ment offered the provinces revised and more permanent arrangements. The Federal Government proposed to abate, for the period 1967-70, 17 p.c. of the personal income tax in those provinces that would take over the financial responsibility for the hospital insurance, welfare (i.e., Canada Assistance Plan) and health grant programs. To ensure fiscal equity, equalization and operating cost adjustment payments were to be associated with the abatement. As the technical and vocational program was being discontinued in its existing form, the offer did not apply to that program. These proposals were re-offered again at the Nov. 4-5, 1968 meeting of the Ministers of Finance and Provincial Treasurers. Until the future responsibility for the joint programs, hospital insurance, Canada welfare, and health grants is finally agreed upon, the contracting-out arrangement in the Established Programs (Interim Arrangements) Act has been extended by the annual Estimates.

Section 5.—Provincial Government Finance

Provincial government accounting and reporting practices vary considerably so that certain adjustments to the *Public Accounts* figures are required in order to produce comparable statistics. For example, transactions relating to a specific function are sometimes excluded from ordinary accounts; therefore special or administrative funds of this nature have been added to provincial ordinary account in the tables of this Section. The fiscal years of all provinces end on Mar. 31.

Revenue and Expenditure.—Table 20 shows net general revenue of and cost of services provided by provincial governments for years ended Mar. 31, 1966-68. Table 21 gives details of net general revenue, which is the total revenue received from all sources with the exception of enterprises and utilities adjusted where necessary to a comparative basis for all provinces, less (a) all revenue of provincial government institutions, (b) revenue in the form of interest, premium, discount and exchange, (c) grants-in-aid and shared-cost contributions. Table 22 reflects the "cost of services provided" by provincial governments and their agencies even though these costs may be shared by other levels of government through conditional grants. Transfers from federal or municipal governments are not deducted from gross provincial expenditures. Table 23 gives details of the amounts transferred to other governments by provincial governments, according to nature of payment.

¹ Includes expenditures for primary and secondary schools which are operated on a denominational basis in Newfoundland and by the Territorial Government, the Federal Government and religious organizations in the Northwest Territories.

² Includes grants of \$9,593,000 to conservation authorities.

³ Represents interest on debt assumed from the City of Montreal, the Montreal Metropolitan Corporation and the Village of Parent.

⁴ Nova Scotia—share of Crown land leases; Ontario—share of liquor licenses; Alberta—share of liquor fines.

⁵ Represents compensation payable to municipalities in lieu of right to impose a sales tax.

⁶ Home-owners subsidies are not included in the total. It is considered that local governments merely act as agents for the provincial governments. See Table 22 for record of these payments.

⁷ Ontario—annuities and bonuses to Indians; Manitoba—water storage charges; Saskatchewan—transportation costs of certain immigrants and payments on South Saskatchewan River Dam agreement.

Debt of Provincial Governments.—Table 24 shows total bonded debt, by province, as at Mar. 31, 1966-68, Table 25 shows that the majority of bond issues are payable in Canada, and Table 26 gives details of total direct and indirect debt of provincial governments as at Mar. 31, 1968.

24.—Gross Bonded Debt (exclusive of Treasury Bills) of Provincial Governments, as at Mar. 31, 1966-68

¹ Includes bonds issued by the Ontario Junior Establishment Loan Corporation, \$11,000,000, and by the Ontario Municipal Improvement Corporation, \$21,000,000.

² Includes debts assumed by the province as follows: Metropolitan Boulevard, \$56,251,000; loans of the Quebec Municipal Commission for the settlement of school debts in 1942, \$8,934,000; loans contracted by certain university institutions, \$47,362,000; loans of the Village of Parents, \$337,000; and loan by the Institute of Microbiology and Hygiene of the Université de Montréal, \$3,450,000.

³ Includes net liability of the province re Ontario Savings Office, \$92,325,000, at Mar. 31, 1968.

⁴ Excludes debt of toll roads authority.

⁵ Amount authorized; information re amounts outstanding is not available.

⁶ In addition, the province has guaranteed the interest on school district debentures having a par value of \$3,295,000, on sewage disposal and water supply systems debentures having a par value of \$2,163,000 and on principal of mortgage loans under the Elderly Persons Housing Act of \$1,271,000.

⁷ Excludes guaranteed interest under the School Borrowing Assistance Act and the School Buildings Assistance Act on principal borrowing of \$7,435,000.

Section 6.—Municipal Government Finance

Municipal Taxation.—Table 27 shows, for the year 1967, local taxes levied by municipalities and by some school authorities and total taxes outstanding at the end of the year. Because of the considerable differences in the division of responsibility for services between the provincial governments and their respective municipalities, these figures should not be used as a basis for interprovincial comparisons of the relative burden of municipal taxation.

The interpretation of the symbols used in the tables throughout the Year Book will be found on p. vii of this volume.

In this Chapter various statistical statements and studies are presented in which broad areas of Canadian economic activity are covered in a comprehensive but summary form. These integrated aggregative economic accounts provide an interrelated framework for economic analysis and the observation of changes in the functioning of the Canadian economy and its structure and in economic and financial relationships with other countries.

Section 1.—National Income and Expenditure Accounts

The national income and expenditure accounts, which have recently undergone a complete and comprehensive historical revision, constitute a subset of the system of national accounts (also included in this system are the balance of international payments, input-output tables, indexes of real domestic product by industry and financial flow accounts). The national income and expenditure accounts provide accounting summaries for the nation as a whole and portray economic activity in terms of transactions taking place between major groups of transactors, namely, governments, corporate and government business enterprises, persons and unincorporated businesses and non-residents. By combining and summarizing these operations into their various classes, information may be obtained on the functioning of the economy, which is of particular interest to governments concerned with problems of full employment, taxation and prices, and to businessmen concerned with programs of investment and marketing.

The tables on pp. 1179-1183 are based on the historically revised series of the national income and expenditure accounts. The new accounts incorporate major statistical revisions and changes in definitions and structural presentation. A full 1926-66 coverage of the tables for national income and gross national product (Table.2) and for gross national ex-

* Section 1 was prepared in the National Income and Expenditure Division, Sections 2 and 3 in the National Output and Productivity Division and Sections 4 and 5 in the Balance of Payments and Financial Flows Division of the Dominion Bureau of Statistics. Section 6 was prepared by the authorities concerned.

penditure in current and in constant (1961) dollars (Tables 3 and 4) is available in a DBS summary report *National Income and Expenditure Accounts, 1926-68*. Definitions are as follows:—

National Income.—Net national income at factor cost measures the current earnings of Canadian factors of production (i.e., land, labour, capital) from productive activity. It includes wages and salaries, profits, interest, net rent and net income of farm and non-farm unincorporated business.

Gross National Product.—Gross national product, by totalling all costs arising in production, measures the market value of all final goods and services produced in the current period by Canadian factors of production. It is equal to national income plus net indirect taxes (indirect taxes less subsidies), plus capital consumption allowances and miscellaneous valuation adjustments.

Personal Income.—Personal income is the sum of current receipts of income whether or not these receipts represent earnings from production. It includes transfer payments from government (such as family allowances, unemployment insurance benefits and war service gratuities) in addition to wages and salaries, net income of unincorporated business, interest and dividends and net rental income of persons. It does not include undistributed profits of corporations and other elements of the national income not paid out to persons.

Gross National Expenditure.—Gross national expenditure measures the same aggregate as gross national product, namely, total production of final goods and services at market prices, by tracing the disposition of production through final sales to persons, to governments, to business on capital account (including changes in inventories) and to non-residents (exports). Imports of goods and services, including net payments of interest and dividends to non-residents, are deducted since the purpose is to measure only Canadian production.

Economic Activity in 1969

The Canadian economy maintained its momentum through 1969. The value of goods and services produced rose by 9.9 p.c. to reach \$78,537,000,000. This expansion, which compares with an 8.7-p.c. increase in the previous year, occurred despite the imposition of restrictive fiscal and monetary measures and despite numerous labour disputes which were reflected in a record number of man-hours lost. The rate of inflation accelerated during the year; the rise of 4.7 p.c. in the implicit price deflator for gross national product, which was the highest recorded since 1961, compares with increases of about 3.5 p.c. in the two preceding years. In real terms, gross national product rose by 5.0 p.c., about the same rate as in 1968.

Widespread buoyancy of demand in the first quarter gave a strong initial impetus to the economy. Although the rate of advance slackened in the second quarter, when the value of production rose only moderately, good advances were again shown in the summer and fall quarters. For the year as a whole, two key developments were an acceleration in the rate of consumer spending, and renewed high rates of business investment in plant and equipment after two years of declines. With the economy performing vigorously, employment grew by 3.2 p.c. and the labour force increased by 3.1 p.c. As a result, the unemployment rate for the year declined from the 1968 level of 4.8 p.c. to 4.7 p.c.

Personal expenditure on consumer goods and services rose by 9.8 p.c. compared with 8.6 p.c. in 1968. This was the largest percentage increase shown in the current expansion. Much of the increased expenditure reflected price movements rather than real gains, but the constant dollar estimates also showed a sizable rise of 5.6 p.c.—the largest since 1965. Thus, consumer spending in 1969 was more than maintained in the face of sharply increasing income taxes (up over 20 p.c.) and historically high interest rates. The latter factor may, however, have affected spending on automobiles which, with a 3-p.c. rise, was one of the few major items to show a substantially smaller rate of increase than in 1968, when it rose by 10 p.c.

After the very high rates of increase in investment of 15 to 20 p.c. that prevailed in the mid-1960s, business gross fixed capital formation registered small advances of about 1 p.c. in both 1967 and 1968; in 1969 it rose by 9.4 p.c. Business residential construction made a further impressive gain (18.4 p.c. versus 15.8 p.c. in 1968) and accounted for nearly half of the increase in the total. The upswing in activity in residential construction starting in the spring of 1967 and accelerating through 1968 slowed down in the second half of the year, as credit tightness in mortgage markets contributed to a sharp drop in the number of starts in the spring. The acceleration in the rate of business gross fixed capital formation was due largely to the marked pick-up in business investment in plant and equipment, which rose by 6.3 p.c. compared with declines of 3.5 p.c. in 1968 and one half of 1 p.c. in 1967. The increase of 3.5 p.c. in non-residential construction was considerably smaller than the 15 p.c. indicated by the mid-year forecast of business intentions and, in fact, non-residential construction declined in real terms by 2.6 p.c.

Canada's balance of transactions in goods and services deteriorated in 1969 from a deficit of \$193,000,000 to one of \$866,000,000, as the rate of increase of imports accelerated while exports slowed somewhat. Although the rise in imports was very broadly based, automotive products and capital goods accounted for about half of the increase in the merchandise account. Highlighting the increase in service imports was an exceptionally large rise of 26 p.c. in Canadian tourist and travel expenditures abroad. The rise in exports, which was entirely oriented to United States markets, consisted very largely of automotive products, in line with the continuing rationalization of that industry resulting from the Canada-United States automotive trade agreement. Other exports rose only moderately.

On the income side, wages and salaries rose by 12.2 p.c.; only the boom year 1966 showed a larger gain in the current expansion. Most of the increase was due to higher rates of pay. Within the year, there was a deceleration in the quarterly rate of increases in labour income, from a 3.6-p.c. increase in the last quarter of 1968 to one of 2.5 p.c. in the closing quarter of 1969. Corporation profits for the year 1969 rose by 5.5 p.c.; they rose substantially in the first quarter of the year, declined in the following two quarters, especially in the summer, and showed little change in the fall quarter. This slow performance of profits was due in part to the large number of strikes in 1969, but cost pressures combined with smaller productivity gains were probably additional factors. Among other income components, the major movements were shown by interest and miscellaneous investment income which moved up 23.9 p.c., and by accrued net income of farm operators from farm production which increased 15.2 p.c.

Aggregate price change as measured by the implicit price index of gross national expenditure rose by 4.7 p.c. in 1969 compared to 3.5 p.c. in 1968. All major components except personal expenditure on consumer goods and services showed higher rates of increase than in 1968. The decline in the rate of price increase of personal expenditure coupled with the increase in the price index of imports (which is a negative item) dampened the total price increase.

In personal expenditure, price deceleration occurred in durable and non-durable goods and prices of semi-durable goods rose at about the same rate as in 1968; service prices, on the other hand, accelerated. Home furnishings, furniture and new cars contributed to the slowdown in prices of durable goods. Within the non-durable group, there were offsetting movements, with higher rates of increase in the prices of food, women's and children's clothing, drugs and cosmetics, auto parts and accessories, and newspapers and magazines, and lower rates in electricity, tobacco products, alcoholic beverages, men's and boys' clothing and footwear. In services, increases were widespread, particularly in personal services and care, transportation, domestic servants, communication, medical care and rents.

Strong increases occurred in the implicit price indexes of residential and non-residential construction; labour costs rose by about 11 p.c. and the materials component advanced by about 5 p.c. Machinery and equipment prices increased by 2.5 p.c.

Components of Demand.—Personal expenditure on goods and services rose by \$4,171,000,000 to reach \$46,531,000,000. This increase of 9.8 p.c.—compared with one of 8.6 p.c. in 1968 which was the largest recorded since 1951—was very broadly based. In real terms, however, the increase of 5.6 p.c. was smaller than the rates of increase in 1964 and 1965 but larger than the 4.5 p.c. recorded in 1968.

There was an acceleration in the expenditure on most components. The sharp increases in the rates of furniture and home furnishings may be related to the high levels of residential construction in 1967 and 1968. In real terms, outlays on furniture rose by 3.4 p.c. after a marginal decline in 1968. The accelerations in the rates of increase of expenditure on shelter and household operations and in total transportation are also notable. The latter's increase of 7.0 p.c., however, was due entirely to price increases. A feature of the year in consumer expenditure was a jump of 28 p.c. in travel expenditures by Canadians abroad. The only major items to show sharply reduced rates of increase in 1969 were tobacco and new and used cars. The former increased by 2.2 p.c.—much lower than the over 6-p.c. gains achieved in recent years. In real terms, however, tobacco consumption declined by 2.6 p.c. against a decline of 4.8 p.c. in 1968. The rise in outlays on new and used cars of 2.8 p.c. occurred after an exceptionally strong rise in 1968; the increase in new car purchases in 1969 was heavily centred on cars of European manufacture.

Business capital outlays totalled \$14,018,000,000 in current dollars in 1969, an increase of \$1,204,000,000 or 9.4 p.c. over the level of the previous year. Among the components, new housing expenditures increased 18.4 p.c., adding \$600,000,000, investment in new machinery and equipment rose 8.8 p.c. or \$44,000,000 and non-residential construction, although its increase was markedly lower than that of the other components, added \$160,000,000. Government capital outlays remained practically unchanged at a level of approximately \$3,000,000,000, as increases in non-residential construction were offset by declines in machinery and equipment spending.

House-building activity set a new record in 1969 with starts of dwelling units numbering 210,415 compared with the previous high of 196,878 starts in 1968. This increase was made possible in part by a large carryover of institutional mortgage loans which were approved in 1968 but did not lead to starts until 1969. Housing starts reached an annual total of 267,300 in the first quarter but dropped off in each quarter to an annual rate of 186,000 in the last quarter of 1969. New housing investment outlays, which follow developments in starts, rose throughout 1968 and until the last quarter of 1969.

Investment in non-farm business inventories was \$534,000,000 in 1969 compared with \$473,000,000 in 1968. The largest accumulation occurred in the first quarter—over \$1,000,000,000 at annual rates. Manufacturing and retail trade each contributed about 30 p.c. and wholesale trade more than 40 p.c. to the total build-up in 1969.

In manufacturing, the accumulation of inventories was concentrated in the durable-goods-producing industries. Stock increases occurred in all groups except transportation industries, which showed a depletion. Within non-durable-goods-producing industries, offsetting movements left on balance a nominal increase. The stock increases in both retail and wholesale trade showed heavy strength in durable goods. In retail trade, the increases in the stocks of durables were widespread, whereas for non-durables the accumulation was almost entirely centred in the stocks of food.

Most of the increase in external trade* in 1969 took place in the first and fourth quarters. Merchandise exports rose by almost 10 p.c., primarily spurred by sharp gains in automotive products and to a lesser extent in crude petroleum, pulp and newsprint. They increased by \$1,348,000,000, comprised of higher sales of \$1,384,000,000 to United States markets, a drop in sales of \$122,000,000 to United Kingdom markets, and a rise of \$86,000,000 to all

* Based on data from 1968 publication (*Quarterly Estimates of the Canadian Balance of International Payments, First Quarter 1970* (Catalogue No. 67-001), with further adjustments for national accounts concepts.

others. Merchandise imports rose by 15.3 p.c., half of which was accounted for by machinery and transportation and communication equipment (mainly automotive products). The deficit on external account increased from \$193,000,000 to \$866,000,000. The merchandise trade surplus dropped by \$508,000,000 to \$868,000,000 which was accompanied by a deterioration of \$165,000,000 in the non-merchandise deficit. The main element in the larger service deficit was the worsening by \$178,000,000 in the net balance on tourist and travel transactions; receipts increased by \$87,000,000 but payments rose by \$265,000,000.

The Government Sector.—Total revenues of all levels of government combined, including those from the Canada and Quebec Pension Plans, rose by just over 16 p.c. in 1969 compared with somewhat smaller increases in 1968 and 1967. Almost half of the rise took place in revenue from personal income taxes and was partly associated with higher rates of taxation, particularly the imposition of the social development tax at the federal level. Revenue from indirect taxes also rose substantially during the year and reflected higher rates and broadened tax bases as well as greater sales. The other revenue categories registered smaller gains.

Total current expenditures of all governments rose by about 13 p.c., somewhat less than revenues. There were increases in all categories but more than half of the rise took place in outlays on goods and services, reflecting primarily higher wage and salary payments. Transfer payments to persons rose sharply with roughly equivalent increases at the federal and provincial levels. Government capital expenditures declined slightly during the year to the level of 1967.

With revenues advancing more rapidly than expenditures, the surplus of the government sector, on a national accounts basis, more than doubled, moving from \$994,000,000 in 1968 to \$2,175,000,000 in 1969. A large part of the change took place at the federal level, as it moved from a deficit of \$33,000,000 to a surplus of \$775,000,000.

Components of Income.—Total labour income advanced by 12.2 p.c. during 1969 as compared with rates of 9.1 p.c. in 1968 and 10.6 p.c. in 1967. Most of the advance resulted from increases in average weekly earnings. Wages and salaries in the goods-producing industries were 9.7 p.c. higher than in 1968, compared with gains of 5.7 p.c. in 1968 and 6.7 p.c. in 1967. Manufacturing increased by 10.7 p.c., construction by 9.0 p.c. and the primary industries, which were seriously affected by labour disputes in mining, by 4.8 p.c. In the service-producing industries, wages and salaries increased 14.2 p.c. as compared with gains of 11.3 p.c. in 1967 and 13.7 p.c. in 1968. Transportation, communication and other utilities increased 11.4 p.c., trade 13.1 p.c., finance, insurance and real estate 14.8 p.c., public administration and defence 16.3 p.c. and service 15.5 p.c.

Corporation profits before taxes increased 5.5 p.c. in 1969 over 1968 to reach \$7,852,000,000, partly reflecting their rapid rise during 1968. Within 1969, only the first quarter showed a significant increase. Because of rising costs, tight money and labour, they declined in the second and third quarters and increased only marginally in the closing quarter.

Accrued net income of farm operators from farm production increased over 15 p.c. in 1969 above the 1968 level. The value of livestock production and the cash income from the sale of other farm products were higher but the value of grain production declined, reflecting a somewhat lower estimated value of the new crop and lower Canadian Wheat Board profits as both exports and export prices continued to decline. Operating expenses, which had been rising at diminishing rates in the previous few years, showed little change in 1969. Net income of non-farm unincorporated business, including rent, increased 4.6 p.c., one of the smaller increments in recent years. Lower than normal increases took place in the net income of the construction and retail trade industries, while normal increases occurred in the finance, personal and business service industries. Other industry groupings showed little change.

Section 2.—Industry Production Trends

Indexes of Real Domestic Product

The Dominion Bureau of Statistics in 1971 released a revised set of production data pertaining to the entire spectrum of Canadian industries. These data, in the form of volume of production indexes, are measures of value added for each industry expressed in the dollars of a base year. Technically, they are termed "indexes of real domestic product (RDP) at factor cost originating by industry".* The value added, or RDP, volume indexes can be regarded as an extension of the index of industrial production† to encompass the remainder of the economy. Concepts and basic methods used to construct both indexes are the same. Thus, industry production index coverage is extended from mining, manufacturing and electric power and gas utilities, for which volume indexes have been published since the 1920s, to include all other major industrial divisions. The RDP indexes can also be regarded as an elaboration of the supply side of the national income accounts.*

In measuring the output of a single product such as steel, it is normal to think in terms of tons of steel when the question of quantity arises. When measuring the combined production of steel and natural gas, there is an obvious need for a common denominator and it is appropriate to use the average unit prices of a certain time period (chosen as the base) to value the quantities produced before adding them together. The resultant quantity, volume or real output measure can be subsequently left in its constant or base period dollar form or it can be expressed in index number form. The latter is accomplished by dividing the constant dollar aggregate of the current period by the dollar aggregate for the base period and multiplying by 100. In constructing a quantity index for a combination of industries where the output of one industry becomes the input of another, the portion double-counted must be eliminated. This is accomplished by revaluing both intermediate input (materials, fuel, etc.) and total output in terms of the dollars of a common base year and subtracting the constant dollar value of the former from the latter to yield a constant dollar value added aggregate.* This aggregate is the quantity or volume measure represented by the indexes presented herein.

The annual indexes are well suited for studies of production trends, growth rates and inter-industry comparisons, but the quarterly indexes provide a much better tool for the study of the cyclical behaviour of industries, short-term changes in production and, in fact, for most types of current analysis. Statistics computed for less than annual intervals, however, are frequently subject to strong seasonal influences, and variations in the number of working days during a quarter may cause differences in the levels of output between two quarters which otherwise would not exist. Accordingly, the quarterly real output indexes have been adjusted for both seasonal and calendar variation.

Factors Underlying Industrial Output Trends.—The early postwar period was marked by several major expansions. The first was based on satisfying the backlog of war-deferred investment and consumer demand and on supplying the needs of the war-devastated countries, especially for various materials. This was followed by some slowing down in production but the requirements of defence-supporting industries after the outbreak of the Korean hostilities and stockpiling requirements at home and abroad introduced a second expansionary period. The third was the investment boom of the mid-1950s during which output reached a new high level. These strong demand influences combined to make most of this period one of fairly rapid and sustained growth. During the late 1950s the rate of increase diminished, as external sources of supply for many commodities multi-

* *Indexes of Real Domestic Product by Industry, 1961-1969, 1961=100*, DBS Occasional Paper (Catalogue No. 61-510). For the period 1935-60, see *Indexes of Real Domestic Product by Industry, 1961 Base* (Catalogue No. 61-506). For a detailed explanation of concepts, methods and limitations, see *Indexes of Real Domestic Product by Industry of Origin, 1935-61* (Catalogue No. 61-505). Current data on a quarterly or monthly basis are published in DBS monthly *Index of Industrial Production* (Catalogue No. 61-005).

† See *Revised Index of Industrial Production, 1935-57* (Catalogue No. 61-502) and the current monthly publication *Index of Industrial Production* (Catalogue No. 61-005).

plied and as competition intensified. At the same time, there was an absence of strong stimulants to domestic demand, such as the deferred demand and the population growth of the preceding period.

During the 1960s, however, the first waves of the postwar generation exercised a growing influence on the demand for goods and services and this proved to be a sustaining factor throughout most of the period to date. There was particular strength in the durable manufacturing sector of the economy in response to both domestic and external demands. Exports of goods and services advanced vigorously throughout most of the period, with sales of wheat and motor vehicles and parts providing major thrusts. As a result of this buoyancy of foreign demand for Canadian goods and services, exports increased their share of total final demand. The underlying strength of the economy provided a healthy climate for investment. Both residential and non-residential construction as well as investment in machinery and equipment made good gains, particularly up to 1966. Partially reflecting the high import content of heavy investment in machinery and equipment and the impact of the Canada-United States Agreement on Automotive Products, the growth of imports outpaced the increase in total final demand over most of the 1961-69 period. Government current expenditure on goods and services also increased significantly during the 1960s.

Even more remarkable than some of the demand-induced changes were the striking changes brought about by the technological discoveries and innovations that transformed whole production processes and opened up previously unknown areas in the fields of manufacturing, transportation and communication. Newer industries, such as air transport, assumed major importance in a comparatively short time; entirely new industries, such as gas pipelines, appeared; and a profusion of new products were created, such as the petro-

Hoisting into place the top section of a 238-foot propylene refining column, part of a \$5,500,000 expansion to a Montreal East petrochemicals complex. The new facilities, to be completed in mid-1971, will permit the refining of propylene at rates in excess of 100,000,000 lb. annually.

chemicals of the chemicals industry and the television and other electronic products of the telecommunication equipment industry. As was to be expected, the industries in a position to benefit from such innovations were among the most rapidly expanding in the economy, although the impact of the expansion spread through the entire economic system. The changes in production and demand also influenced the level of employment in the various industries; there was a considerable shift in employment during the postwar period from the goods-producing to the service-producing industries and most of the loss in the former took place in agriculture.

¹ No data are available prior to 1961 on a 1961 base due to a break in historical continuity resulting from the implementation of the 1960 standard industrial classification and the 1961 weight and reference base for the indexes.

Although all the major industry groups expanded, development was not uniform throughout the postwar period. For example, there was a marked and fairly general acceleration in output growth in Canada during the 1960s. Despite some deceleration in the later years of that decade, total real domestic product grew at a rate of 5.8 p.c. in the 1961-69 period. In contrast, the average rate of growth in real domestic product for the 1946-61 period was 4.7 p.c. per annum. Three important types of factors affecting the expansionary paths of industries were in evidence at some point during the period. The first may be described as some special factor at work in a particular industry, the effects of which would be most noticeable in that industry—for example, the demand for uranium which had an important influence on the mining industry during the latter half of the 1950s,

the opening up of new mineral resources such as the iron ore mines in Quebec-Labrador, and certain technological innovations such as the development of synthetic materials or television. The second type of factor is much more general in its effects and in its causes. Such factors as increased demand for consumer goods resulting from a rising standard of living and a growing population, shifts in world trading patterns or shortages causing increased demand for export goods, the surge of investment activity associated with replacement cycles, as well as attempts to broaden the base of economic activity through investment in research, social overhead capital, education, improved management and marketing techniques, or a more efficient production process (or a confluence of all these factors) appear to lie at the root of such postwar expansions as the investment boom of the mid-1950s or the expansion in production since 1961. The third type of factor would be some unique and far-reaching event, of which the Korean War might serve as a conspicuous example.

All three factors, jointly or in turn, have reacted on the various industries to result in the upswings in aggregate production. The percentage growth of each of the main industrial groups in the 1946-69 period was as follows:—

<i>Industry</i>	<i>Growth</i>	<i>Industry</i>	<i>Growth</i>
	p.c.		p.c.
Agriculture.....	1.5	Transportation, storage and communication.....	4.9
Forestry.....	2.5	Trade.....	4.9
Fishing and trapping.....	1.4	Finance, insurance and real estate.....	1
Mines (incl. milling), quarries and oil wells.....	8.2	Community, business and personal service.....	4.7
Manufacturing.....	5.1	Public administration and defence.....	1
Construction.....	6.0	REAL DOMESTIC PRODUCT.....	4.8
Electric power, gas and water utilities.	8.9		

¹ For these industries the 1946-61 and the 1961-67 periods are not considered sufficiently comparable to have been linked following conversion to the 1960 standard industrial classification and the 1961 weight and reference base—see *Indexes of Real Domestic Product by Industry, 1961 Base*, Appendix I (Catalogue No. 61-506). The 1961-69 growth rate for Finance, insurance and real estate was 4.5 p.c. and for Public administration and defence 2.8 p.c.; the 1946-61 rates were 5.0 p.c. and 4.6 p.c., respectively.

Foremost in growth was the electric power and gas utilities industry, followed by the mining and construction industries. All three were strongly affected by technological advances, new discoveries and a fairly well sustained demand for their products. The demand in mining frequently came from abroad, resulting in relatively high export sales and providing incentive for the opening up and developing of new mineral resource areas. Some slackening in construction activity was evident following the unusually high levels reached during the mid-1950s but since 1963 the swing has again been upward, although there was some flattening from the latter part of 1966.

Over the period as a whole, most of the other industry divisions (except agriculture, forestry and fishing and trapping) expanded at roughly the same average rate of about 5 p.c. Manufacturing, trade, and transportation, storage and communication industry divisions, which together accounted for almost one half of the total output, also showed strikingly similar cyclical patterns. Within manufacturing it was the durables component that expanded particularly rapidly during the cyclical upturns and that benefited from the need for machinery and equipment in the periods of heavy investment and from increased consumer demand for such products as motor vehicles and electrical appliances during the 1961-69 period. Non-durables maintained a fairly steady rate of expansion for most of the postwar period, largely in response to increased population and demand for industrial materials. A similar pattern was observable in trade, with retail trade exhibiting a relatively smooth expansionary trend.

The community, recreation, business and personal service industry division was relatively insensitive both to cyclical and irregular influences but, along with some other steadily expanding industries such as finance, insurance and real estate, non-durables and retail trade, it helped to sustain aggregate production and growth during periods of contraction and expansion. Although this division as a whole showed an average rate of growth for the 1946-69 period, some of its components, such as business services and education, were among the most rapidly expanding in the economy. During the 1960s, this resulted in a marked acceleration of the rate of expansion of the division, i.e., from 3.8 p.c. in 1946-61 to 6.9 p.c. in 1961-69.

The rates of growth in the forestry, agriculture, and fishing and trapping divisions were below average and were subject to pronounced irregular fluctuations in output—forestry because of the nature of its production processes and also, to some extent, because of its sensitivity to changes in world demand and price; agriculture because of marked year-to-year differences in output more often caused by weather conditions and similar factors than by changes in prices and demand conditions; and fisheries because of its dependence on the vagaries of nature.

Production of Goods-Producing Industries

The data contained in the tables under this heading are published in the DBS report *Survey of Production*.^{*} The scope of the survey of production is limited to industries engaged chiefly in the production of goods and it measures production in current dollars. This is in contrast to the real domestic product series (p. 1184) which encompasses all industries and measures production in terms of the dollars of a base year.

Tables 13 and 14 give "census value added" production data, classified by province and industry, respectively. Census value added is derived by deducting the cost of materials from the gross value (exclusive of excise and other sales taxes) of shipments (adjusted for change in inventory of finished goods and goods-in-process) or revenue. The figures include interim classification and valuation changes in mining, manufacturing and forestry brought about by the adoption of the 1960 standard industrial classification of establishments. However, the three industry aggregates continue to consist of census value added accruing from their primary activity only.^{*} Standard industrial classification changes have not yet been implemented for other industries.

^{*} DBS Catalogue No. 61-202. See Appendix of the 1968 issue for census value added in mining, manufacturing and forestry on an all-activities basis.

Section 3.—Aggregate Productivity Trends

Increasing interest in questions of economic growth, cost-structure and international competitiveness, and in the relationships between output, employment, earnings and prices has focused attention on productivity as a framework within which such problems can usefully be discussed. Recognizing this interest, the Dominion Bureau of Statistics now publishes annual indexes of output per person employed and per man-hour in Canada covering the commercial industries as a whole, with separate detail for agriculture and the commercial non-agricultural industries, manufacturing and the residual commercial non-manufacturing industries. Similar indexes are also published for the total and non-agricultural commercial goods-producing industries, and the commercial service-producing industries of the same aggregate.*

Although these measures relate output to a single input only, namely labour time, they do not measure the exclusive contribution of labour to output. Changes in indexes of output per unit of labour input reflect the combined influence of a number of separate but interrelated factors such as the amount and quality of capital equipment, the extent of utilization of available capacity, managerial efficiency and the impact of technological progress, as well as the skill and effort of the work force.

Sources of Data.—The output components of the various indexes of output per unit of labour input referred to here are the historical indexes of “real domestic product (RDP) by industry”, described in Section 2, p. 1184. These indexes, which were developed within the conceptual framework of the national accounts and which measure in constant dollar terms the unduplicated contribution of each component industry to total output, are considered basically suitable for productivity measurement when matched with the corresponding input measures.

The major sources for the employment and man-hour indexes were the monthly labour force and employment surveys, and these were supplemented by data from such sources as the annual censuses of manufactures and mining and the decennial census of population. Since the data from these diverse sources varied considerably in their coverage, concepts and methods of compilation, care had to be exercised in their selection, adaptation and combination into aggregate measures of labour input which would be conceptually and statistically consistent, both internally and in relation to the output data. Labour force survey data were used for the paid worker estimates of agriculture and of fishing and trapping, while those for manufacturing and mining were based on adjusted annual census data. Estimates for most of the remaining industry divisions were derived from adjusted employment survey data. Estimates of other than paid workers (own-account workers, employers and unpaid family workers) were derived mainly from the labour force survey. The estimates of average hours worked, which were needed for the indexes of output per man-hour, were also based on labour force survey data, except in the case of manufacturing, where estimates of man-hours paid from the census of manufactures were adjusted to the man-hours worked concept.

Growth Rates.—Output per person employed in the commercial non-agricultural industries grew at an average annual rate of 2.8 p.c. between 1946 and 1969. Because of the decline in average hours worked per person, this was a lower rate of growth than that of output per man-hour which, during the same period, increased by 3.3 p.c. per annum. Corresponding figures for manufacturing were 3.7 p.c. and 4.0 p.c. and those for the residual non-manufacturing industries of the commercial non-agricultural sector were 2.4 p.c. and 3.0 p.c., respectively.

* See DBS Reference Paper *Indexes of Output per Person Employed and per Man-Hour in Canada, Commercial Non-agricultural Industries, 1947-63* (Catalogue No. 14-501) and *Aggregate Productivity Trends, 1946-69* (Catalogue No. 14-201).

In agriculture, the average annual rates of growth of output per person employed and per man-hour between 1946 and 1969 were 5.2 p.c. and 5.5 p.c., respectively. However, in view of the difficulties of measuring the number and especially the man-hours of persons employed in agriculture, data presented for this industry division should be regarded as approximate. In the commercial industries as a whole, output per person employed increased between 1946 and 1969 at an average annual rate of 3.4 p.c., and output per man-hour increased by 4.2 p.c. per annum. Corresponding figures for the total commercial goods-producing industries were 5.0 p.c. and 5.6 p.c., respectively, per annum; for the commercial non-agricultural goods-producing industries, 4.2 p.c. and 4.5 p.c.; and for the commercial service-producing industries, 1.4 p.c. and 2.1 p.c.

Inter-industry Shift Effects.—In addition to measuring the changes in productivity within the component industries, the aggregate productivity indexes measure the effect of shifts in employment and production between industries having different levels of productivity. One of the most significant such shifts within the commercial industries of Canada during the postwar years was from agriculture to the non-agricultural industries, where a higher level of output per unit of labour input prevails. The effect of this shift can be measured in various ways and a number of alternative calculations have been carried out for the 1946-65 annual publication,* all of which confirm, to a greater or lesser extent, that the decline in the relative importance of agriculture made a positive contribution to the total increase in output per person employed in the commercial industries during the postwar period.

* DBS Catalogue No. 14-201.

Production of printed matter has undergone great change in the past few years and investment in expensive, high-speed, efficient machinery is necessary to keep a plant competitive. This new machine in an Ottawa printing plant automatically assembles, stitches and trims publications of all sizes.

Section 4.—Canadian Balance of International Payments

The Canadian balance of international payments is a measure of the flow of goods, services and capital between Canada and the rest of the world. It is normal practice to allocate flows within three major accounts—current, capital and international reserves.

Merchandise trade, consisting of imports and exports, comprises a very significant item in the current account section both in magnitude and in its over-all economic impact in Canada. Although with decreasing emphasis in recent years, a favourable balance of trade has long been regarded by many countries as a measure of economic strength. In recent years, Canada has been successful in achieving a merchandise trade surplus but the increasing outflow of Canadian dollars in the form of interest and dividends (as foreign investment in Canada has risen), the cash requirements of Canadians travelling outside Canada, the heavy freight and shipping expenses incurred in the transport of Canadian imports, and the official contributions to developing countries have assisted in creating a heavy imbalance in the area termed "invisibles". Canada, of course, is the recipient of substantial revenues from invisibles, including among other items immigrants' cash resources, returns on foreign investments, travel expenditures by foreigners accruing to Canadians, and freight receipts.

The capital account includes the flows associated with long-term and short-term investment in the Canadian economy together with Canadian investment in foreign countries. Through the years, confidence in the Canadian market by foreign investors has encouraged them to make significant purchases of long-term Canadian securities. On a yearly basis, these investments have exceeded both Canadian investment abroad and the relinquishment of investments in Canada by non-residents. In addition to heavy and sustained purchases of new security issues of governments, railways, utilities and other corporations, sizable investments have been made by non-residents in corporations in which the investor acquires some degree of control.

Short-term capital flows are complex and extremely volatile. Accounts receivable and payable of resident Canadian corporations with non-residents, holdings of foreign bank balances by Canadians and, similarly, Canadian dollar deposits of non-residents in Canada are some of the accounts for which flows are consolidated in the short-term capital sector.

More detailed information on the structure of the Canadian balance of international payments is obtainable from the various publications produced by the Balance of Payments and Financial Flows Division of DBS, in particular the annual reports.

Summary of 1969 Transactions.—In a year of continuing expansion, resulting in a more than 9-p.c. gain in the value of the nation's output, there was a sharp rise in international transactions in goods and services both demanded and supplied by Canada. The total value of goods and services imported rose 14 p.c. and exports advanced 10 p.c. Reflecting these differing rates of growth in imports and exports, the current account deficit in 1969 rose to \$751,000,000, some \$644,000,000 above the 1968 level. The major factor in this change was the \$515,000,000 reduction in the merchandise trade surplus to \$860,000,000. The export pattern was severely distorted by the curtailment of supplies from strike-bound industries and continued difficulties were also experienced in the marketing of commodities such as wheat. Exchange rate changes for the deutschemark and French franc made in the second half of the year did not appear to have had any noticeable impact on Canadian trading patterns. As an anti-inflationary measure, the timing of tariff reductions under the Kennedy Round was accelerated by the Canadian Government and reductions introduced in mid-year had competitive effects for the products of certain industries. Non-merchandise transactions led to a larger deficit of \$1,611,000,000, principally due to increased net disbursements on the travel account.

Inflows of capital in long-term forms increased by \$603,000,000 to \$2,257,000,000, as new Canadian issues sold to non-residents rose by \$150,000,000 to exceed \$2,000,000,000

for the first time. Resort to foreign borrowing on this scale reflected the extreme tightness in the availability of domestic funds and relatively lower interest rates prevailing abroad. The main factor in the increased inflow was, however, the swing in foreign security transactions from an outflow of \$467,000,000 in 1968 to an inflow of \$106,000,000 in 1969, as Canadian investors, particularly institutions, adjusted their holdings in the light of their over-all portfolio requirements and current market conditions. Short-term capital outflows rose by \$243,000,000 to reach \$1,441,000,000. Increases in Canadian holdings of bank balances and other short-term funds abroad produced an outflow of \$1,604,000,000, as interest rates in the Euro-dollar market rose appreciably above short-term rates in Canada.

Canada's net official monetary assets increased by \$65,000,000 over the year. Quarterly fluctuations in these assets were not nearly as volatile in 1969 as in the previous year when the Canadian dollar came under speculative attack. Speculative interest centred more on the role of gold and the strengths of the deutschmark, French franc and sterling. By the end of the year conditions in foreign exchange markets generally were settled, awaiting the introduction of the Special Drawing Rights system of the International Monetary Fund on Jan. 1, 1970.

Current Account Transactions.—Based on generally strong demand conditions in the United States and in Canada, which persisted in the face of severe anti-inflationary measures, merchandise trade continued to expand in 1969. World trade rose sharply during the year and Canadian exports and imports advanced at a pace more or less in line with this development, the former increasing 10 p.c. to \$14,874,000,000, and the latter, 15 p.c. to \$14,014,000,000. A significant part of the increased levels reflected price rises. The export growth rate, which fell below that of imports, contrasted with the 1968 performance when exports rose much the faster. As a result of the slowdown in the growth of exports and increased growth of imports, the merchandise trade surplus fell by about \$515,000,000 to \$860,000,000. Except for 1968, however, this surplus was the highest recorded since the Second World War.

A combination of factors contributed to this change. In 1969, exports of metals tended to slow down due to the return to a more usual demand pattern following the settlement of labour problems in the United States in 1968; moreover, supplies for export markets suffered because of prolonged strikes in the Canadian iron, steel, nickel and copper industries in 1969. Sales of wheat continued to decline, reflecting increased production in importing countries and world oversupply. To meet the increasing competition which had driven prices below the International Grains Arrangement minimum, Canadian wheat prices were reduced in the second quarter of 1969. While there was a decline in the relative share of exports of crude materials from about 19 p.c. in 1968 to 17 p.c. in 1969, the share of end products rose by nearly five percentage points to about 37 p.c. of total domestic exports. Most of the advance in exports consisted of increased sales of automotive products but substantial increases were also recorded for lumber, wood pulp, newsprint, petroleum and various items of equipment. There were, however, significant reductions in exports of iron ore, nickel and copper.

On the imports side, the high level of demand in Canada, the disruptive effects of labour disputes on domestic supplies, the improvement in the export capability of Canada's suppliers of imports and the continuing effects of industrial rationalization particularly in the automobile industry gave new impetus to the upward trend in imports. The acceleration of the Kennedy Round tariff cuts introduced by the Canadian Government about the middle of 1969 to increase price competition and help check inflationary price rises was also a factor. Imports of automotive products increased briskly, although less than exports of these commodities. Increases were general but the more notable occurred in meat, raw sugar, petroleum, chemicals, fabricated iron and steel, copper, nickel and machinery.

In 1969, there was a deficit of \$1,611,000,000 on non-merchandise transactions, an increase of \$129,000,000 over the 1968 deficit. Total receipts rose 15 p.c. to \$4,221,000,000

and total payments went up about 11 p.c. to \$5,832,000,000. The rise in the deficit on non-merchandise transactions was due principally to higher net disbursements on the travel account of \$218,000,000 in 1969. Besides such factors as the increase in the number of residents travelling abroad and a rise in their average expenditures, higher travel payments to non-residents in 1969 also occurred as a result of the increased patronage by Canadians of foreign airlines during the Air Canada strike in the second quarter of the year. Rising prices in most of the major tourist centres were also a factor in the higher spending levels recorded in 1969.

¹Includes all net exports of monetary gold.

Capital Movements.—The net inflow of capital into Canada almost doubled to \$816,000,000 in 1969 from \$456,000,000 in the previous year. Capital movements in long-term forms led to a net inflow of \$2,257,000,000 for the year, as inflows of approximately equal size occurred in each quarter while short-term transactions gave rise to outflows in each quarter, totalling \$1,441,000,000 in the year. Despite the large increase in the inflow from total capital movements in 1969, only \$65,000,000 was added to Canada's official monetary assets, as the year's current account deficit rose more sharply to \$751,000,000.

Direct investment in foreign-controlled enterprises in 1969 gave rise to a moderately higher net capital inflow of \$655,000,000, as sharply lower inflows from the United Kingdom were more than offset by higher investment from the United States and other countries. About 70 p.c. of the year's inflow came from the United States, and two fifths of it occurred in the second quarter. By far the largest part of the inflow was allocated to the manufacturing and petroleum and natural gas industries. Capital inflows for the takeover of existing Canadian enterprises, notably enterprises engaged in the manufacture of food and beverages, forest products, electronics and steel, and in asbestos production, finance and life insurance, were substantially higher.

The net outflow for direct investment abroad during 1969 reached a high of \$255,000,000, compared with the 1968 outflow of \$225,000,000. About three fifths of the 1969 investment was in the United States, one fifth in Europe, and the remainder chiefly in other Western Hemisphere countries.

At \$1,832,000,000, the net inflow from portfolio transactions in long-term securities in 1969 reached unprecedented proportions. The two main elements accounting for the size of this inflow were the continued high level of sales of Canadian new issues abroad, which exceeded \$2,000,000,000 for the first time, and a sharp turnaround of over \$500,000,000 in trading in outstanding foreign securities. The net inflow of \$106,000,000 from transactions in foreign securities, after five years of successive annual outflows totalling \$1,437,000,000, was largely attributable to transactions in United States equities. At a time when stock-market prices were depressed in Canada and the United States, Canadians became net sellers of these securities (to the extent of \$114,000,000) for the first time since 1963.

Buoyant economic conditions and exceptionally high interest rates, both in Canada and abroad, had a far-reaching impact not only on stock-market conditions but also on the sources and type of financing adopted by Canadian borrowers. Canadian interest rates, already at very high levels at the end of 1968, continued to rise throughout 1969. In late December, the yield on the index of 10 long-term industrial bonds produced by McLeod, Young, Weir had reached 9.29 p.c. Canadian borrowers took advantage of the relatively lower rates abroad by continuing to raise large amounts of capital not only in the United States but, for the second successive year, in Germany. (Of interest in 1969 was the entry of municipalities into this market, which had been utilized almost exclusively by more senior governments and their agencies in 1968.) Provincial governments again borrowed heavily in Germany, so that total inflows from new issues of Canadian securities in continental Europe rose from \$491,000,000 in 1968 to \$556,000,000 in 1969.

Capital movements in short-term forms in 1969 gave rise to a larger net outflow of \$1,411,000,000 compared with \$1,198,000,000 in 1968, which masked to some extent very large opposing flows. The outflow for the acquisition by Canadians of foreign currency deposits and other short-term funds abroad almost quadrupled in the year to \$1,604,000,000. Partially offsetting inflows resulted from increased non-resident holdings of Canadian finance company paper and other short-term obligations. A large year-to-year reduction in outflows was evident in the "all other transactions" category. This account includes changes in loans and accounts receivable and payable as well as the balancing item representing the difference between direct measurements of the current and capital accounts (including the reserves).

Official Reserves.—Canada's net official monetary assets totalled U.S. \$3,105,000,000 at Dec. 31, 1969, a rise of U.S. \$60,000,000 over the year. A large increase of U.S. \$150,000,000 in the fourth quarter more than offset the decreases that took place in the first three quarters of 1969. Total official monetary liabilities remained constant over the year at U.S. \$1,000,000. The annual change expressed in Canadian dollars showed an increase in net official monetary assets of \$65,000,000, all reflecting the rise in international reserves, as changes in associated liabilities, noted above, were negligible in the year.

Section 5.—Canada's International Investment Position*

Canada's balance of international indebtedness reached a book value of over \$27,000,000,000 by the end of 1969, an almost sevenfold increase over the past two decades. Long-term foreign investment rose by about \$3,500,000,000, reflecting both an inflow of long-term capital and an increase in earnings accrued to and reinvested by non-residents. Other non-residents' claims on Canadians brought the total of Canada's external liabilities to about \$46,000,000,000. Total outflow of domestic long-term capital together with an increase in earnings accrued to Canadians abroad caused the total book value of Canadian long-term investment abroad to rise to over \$10,000,000,000 at the end of 1969. Due mainly to the large rise in private holdings of foreign exchange, total Canadian assets abroad registered an increase of about \$2,000,000,000, well exceeding \$18,000,000,000 at the end of 1969.

The balance of international indebtedness is a phrase generally accepted in balance-of-payments terminology to include equity investments as well as contractual borrowings. Its size and character have a considerable influence on Canada's balance of payments. This is true not only through the servicing of capital involving interest, dividends and miscellaneous income payments but also through the influence of foreign investment on the Canadian economy and on the shape and direction of its external demands.

Canada has been among the world's largest importers of private long-term capital. The very substantial capital formation which was a feature particularly since the 1950s was associated with an unprecedented growth in the country's external liabilities. These investments contributed to a rapid rate of growth in the Canadian economy, particularly in the exploitation of natural resources, and added significantly to Canadian production, employment and income. At the same time they added substantially to the continuing burden of Canada's external debt and to the proportion of Canadian industry controlled by non-residents.

* This review covers Canada's international investment position in 1967, although a few estimated totals for 1969 available at the time of writing are included in the first paragraph. An extended historical review appears in DBS report *Canada's International Investment Position, 1926 to 1954* (Catalogue No. 67-503) and more recent statistics in the annual report *Canadian Balance of International Payments and International Investment Position* (Catalogue No. 67-201), and in the *Quarterly Estimates of the Canadian Balance of International Payments* (Catalogue No. 67-001). Additional detailed material will be found in the annual report under the Corporations and Labour Unions Returns Act.

Canada's gross external liabilities amounted to \$40,200,000,000 at the end of 1967; non-resident-owned long-term investments in Canada reached a book value of \$34,700,000,000. The part of these investments in enterprises controlled outside of Canada totalled \$20,700,000,000. Investments in other Canadian equities, although smaller, were also substantial and there were periods in recent years of sharp increase in foreign holdings of Canadian bonds and debentures.

Investments of non-resident capital have been closely related to the high rate of growth in Canada and to the heavy demands placed on capital markets by this factor and by the financial needs of governments and municipalities. Large development projects have been initiated and financed by investors from other countries and the growth effects from this investment have, in turn, led to Canadian borrowing in capital markets outside Canada. While capital inflows have been the principal source of the increased indebtedness abroad, another substantial contributor has been the earnings from non-resident-controlled branches and subsidiaries which were retained in Canada. New resource industries depending to a large extent on non-resident financing include all branches of the petroleum industry, iron ore, potash and other mining, aluminum, nickel, pulp and paper, and chemical industries. In addition, secondary industry has also benefited from non-resident investment.

Canada's gross external assets totalled \$15,000,000,000 at the end of 1967 and government-owned assets made up a substantial part of that total. Canada's net balance of international indebtedness, including equity investments, at the same date was estimated at \$25,200,000,000.

Foreign Investments in Canada.—Dependence upon external sources of capital for financing in periods of heavy investment activity has been characteristic of Canadian development. During the exceptional growth that occurred before World War I, non-resident investment was very high and the main source of that investment was London. However, during the first part of the inter-war period, the United States became the principal source of external capital and by 1926 the portion of Canada's international debt owned in that country exceeded that owned in the United Kingdom. With some interruption during the 1930s, United States investment in Canada continued to increase, particularly after 1947 when the period of intense activity in the petroleum industry got under way. At \$28,030,000,000, United States long-term investments in 1967 represented about 81 p.c. of all non-resident long-term investment in Canada. The main rise occurred in direct investments in companies controlled in the United States.

United Kingdom long-term investments in Canada totalled \$3,576,000,000 at the end of 1967 and accounted for only about 10 p.c. of the total non-resident investments in Canada compared with 36 p.c. at the end of 1939 before most of the wartime repatriations. After reaching a low point in 1948, the value of United Kingdom investments in Canada increased each year to 1962, declined slightly in 1963, partly as a result of Canadian repatriation of investments in railways and further provincial takeover of other utilities, then increased again in subsequent years.

Long-term investments of countries other than the United States and the United Kingdom reached a record total of \$3,096,000,000 at the end of 1967. About two and one half times the 1957 figure, this represented a much higher rate of increase than had occurred in either United States or United Kingdom investments, and large increases had taken place in direct as well as in miscellaneous investments. At about 9 p.c. of the total, compared with 7 p.c. in 1957, this group of countries, mostly in Western Europe, accounted for a slightly larger proportion of total foreign investments than in 1966. Over 85 p.c. of the direct investment, which totalled \$1,547,000,000 in 1967, came from Europe; about one quarter was of Netherlands origin, with French, Belgian, Swiss and German investments making up the next largest groups.

The degree of dependence on non-resident capital for financing Canadian investment has been relatively much less in the postwar period than in the earlier periods of exceptional expansion, even though the rise in non-resident investments has been so great. Thus, from 1950 to 1953 the net use of foreign resources amounted to about one seventh and direct

foreign financing to almost 30 p.c. of net capital formation in Canada. But from 1958 to 1961, when these ratios had increased considerably to 34 p.c. and 47 p.c., respectively, they were still less than the corresponding ratios in the 1929-to-1930 period when inter-war investment activity was at its highest point. In that shorter period, more than one half of net capital formation was financed from outside of Canada, and in the period of heavy investment before World War I an even larger ratio of investment was financed by external capital. After 1961 these ratios declined somewhat; from 1962 to 1965 the net use of foreign resources comprised 19 p.c. of net capital formation in Canada and direct foreign financing, 43 p.c. In considering these changes it should be noted that for a decade and a half, between 1934 and 1949, Canada was a net exporter of capital and that Canadian assets abroad have been rising over a long period.

It should also be noted that the above ratios relate to the place of non-resident investments in all spheres of development including those where Canadian sources of financing predominate such as in merchandising, agriculture, housing, public utilities and other forms of social capital. Thus, non-resident financing of manufacturing, petroleum and mining has been much higher than the over-all ratios indicate and has provided the major portion of the capital investment in this field in the period since 1948. The most recent comprehensive calculation of the ratios of non-resident ownership in Canadian manufacturing, mining and petroleum is for the year 1966. In that year the Canadian manufacturing industry was 53 p.c. owned by non-residents but capital subject to foreign control was 58 p.c. These proportions compared with 50 p.c. and 56 p.c., respectively, as recently as the end of 1957. In the field of petroleum and natural gas, non-resident ownership and control amounted to 63 p.c. and 74 p.c., respectively, at the end of 1966, whereas at the end of 1957 non-resident ownership and control had amounted to 63 p.c. and 76 p.c., respectively; in mining and smelting, non-resident ownership and control amounted to 59 p.c. and 62 p.c., respectively, compared with 56 p.c. and 61 p.c. in 1957.

However, resident-owned Canadian capital continued to play a leading role in the financing of such areas of business as merchandising, railways and other public utilities. Hence, non-resident ownership in a broad range of business activity, including manufacturing, petroleum, mining, merchandising and railways and utilities, rose only slightly from 32 p.c. in 1948 to 36 p.c. in 1966. But, in the same years, companies subject to non-resident control increased from 25 p.c. to 34 p.c. their share of the total capital even in this broad area of business, a trend also evident in many subdivisions of the manufacturing and extractive industries.

Another basis of judging the place of foreign-controlled business in Canadian industry is provided by a special study of production and employment in the larger Canadian manufacturing establishments controlled by non-residents. Enterprises having an investment in Canada of \$1,000,000 or more accounted for about 40 p.c. of Canadian manufacturing production in 1961 and 29 p.c. of employment in that field. About 33 p.c. of Canadian manufacturing production and 22 p.c. of employment originated with United States-controlled plants. These ratios in United States-controlled plants were somewhat higher than in 1953—the previous year for which a study of this kind was made. In some industries the proportions of production and employment in plants controlled by non-residents were much higher than this. Automobiles, for example, are produced mainly in United States-controlled plants, but this is exceptional. Other industries in which well over one half of the production is in non-resident-controlled firms include the smelting and refining of non-ferrous metals, petroleum refining, motor vehicle parts, aircraft and parts, and industrial chemicals. In several major industries like fruit and vegetable canning and preserving, and miscellaneous machinery and equipment manufacturing, the distribution of production between Canadian and foreign-controlled companies is more even. In such industries as pulp, paper and miscellaneous food manufacturing, the non-resident share is large although less than one half of the total.

There are, however, many industries where the largest part of production is in Canadian-controlled plants. Prominent among these are such important branches of industry as iron

and steel mills, sawmills, feed manufacturing, clothing, and such divisions of the food and beverage group as bakeries, slaughtering and meat packing, pasteurizing and butter and cheese plants.

Canadian Assets Abroad.—Although there has been a great growth in non-resident investment in Canada and in the balance of Canadian indebtedness to other countries, it will be noted that Canadian assets abroad (Tables 21, 24 and 25) have continued to rise in value. These now equal a larger proportion of liabilities abroad than was the case before World War II, but more than one quarter of the increase since then has been in government-owned assets such as the official reserves and the loans by the Canadian Government to other governments which were extended during the war and early postwar years. At the end of 1967, the government credits outstanding had a value of \$1,406,000,000 while official holdings of exchange and Canada's net International Monetary Fund (IMF) position amounted to some \$2,934,000,000 (Cdn.). Other official Canadian assets included Canada's subscriptions to the capital of the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation and the Asian Development Bank. These assets were partly offset by liabilities to these institutions.

The portion of the assets in private investments, particularly in the form of direct investments abroad by Canadian companies, is still small in relation to the corresponding non-resident stake in equities in Canada. At the end of 1967, Canadian direct investment abroad totalled \$4,030,000,000 and portfolio investment abroad by Canadians amounted to \$2,566,000,000. About two thirds of the privately owned investments were located in the United States. Direct investments in that country by Canadian businesses have grown rapidly and are found in many fields, among which the beverage and farm implement industries are particularly noteworthy.

Private investments in overseas countries are widely distributed. Somewhat more than one half of the total in 1967 were located in Commonwealth countries, with the United Kingdom accounting for nearly 50 p.c. of the total investment in the Commonwealth. Most of the direct investments in the United Kingdom were in manufacturing, while in other Commonwealth countries investments in mining were of almost equal importance with those in manufacturing. In other overseas countries the largest part was in the countries of South and Central America where Canadian holdings in public utilities are substantial.

Section 6.—Government Economic Planning Agencies

Subsection 1.—The Economic Council of Canada

The Economic Council of Canada was established by Act of Parliament (SC 1963, c. 11) assented to on Aug. 2, 1963. The Council is an economic advisory body with broad terms of reference. The central feature of its duties is "to advise and recommend . . . how Canada can achieve the highest possible levels of employment and efficient production in order that the country may enjoy a high and consistent rate of economic growth and that all Canadians may share in rising living standards; to recommend what government policies . . . will best help to realize the potentialities of growth of the economy; to consider means of strengthening and improving Canada's international financial and trade position; . . . to study how national economic policies can best foster the balanced economic development of all areas of Canada; . . .".

In addition, Parliament made provision for the Council to undertake special studies at the request of the Government in areas that fall within the purview of its general terms of reference. The Council has had two such References. In its first Reference, the Government asked the Economic Council to launch an examination into prices, costs, incomes and productivity and their relationship to sustained economic growth. The Council reported to the Government and to the Canadian public on this Reference in its *Third Annual Review*. A second Reference from the Government asked the Council: "In the light of the Government's long-term economic objectives, to study and advise regarding: (a) the interests of the consumer particularly as they relate to the functions of the Department of the Registrar General (now the Department of Consumer and Corporate Affairs); (b) combines, mergers, monopolies and restraint of trade; (c) patents, trade marks, copyrights and registered industrial designs". An interim report under Sect. (a) of this Reference was published in July 1967; an interim report under Sect. (b) was published in the summer of 1969; and a third and final report under Sect. (c) will be released in the winter of 1971.

The Council has no operational responsibilities. It does not implement or administer any policies or programs nor does it have the authority to make research grants, although it may make contractual arrangements with persons other than its staff for the purpose of advising and assisting the Council in the performance of its duties.

The Council consists of up to 28 members appointed by the Governor in Council, including a chairman and two directors who serve full time in their professional capacity, and up to 25 members who are selected from industry, labour, finance and commerce, agriculture and other primary industries, and the general public. The chairman and the directors (one of whom is elected as vice-chairman by the Council) are appointed for seven-year terms. The other members are appointed for three-year terms "after consultation with appropriate representative organizations" and are intended to reflect a very wide diversity of interests from the different private sectors of the economy and different regions of the country, but they sit on the Council as individuals and not as delegates of particular organizations or groups. The Council is therefore a mixed body rather than an expert professional body, although it is served in its deliberations by an expert staff. There are no government members appointed to the Council. Under the Act, the chairman is the chief executive officer of the Council and has supervision over, and direction of, the work and staff of the Council.

The publications policy of the Economic Council is based on two provisions of the Act, one that requires the Council to publish annually a review of the medium- and long-term prospects and problems of the Canadian economy, and a second that empowers the Council to publish, as it sees fit, such studies and reports prepared for its use. These provisions enable the Council to carry out a most vital function, namely, the dissemination of information to the public as a means of stimulating informed appraisal and discussion of economic problems and policies.

The Council's publications* fall into three broad categories: (1) The Annual Reviews which summarize the results of the Council's studies and present its conclusions and recommendations (seven of which have been issued to date); (2) Staff and Special Studies which provide more detailed statistical, technical, and analytical results of the various research projects; and (3) Conference papers and other reports.

In its *First Annual Review* the Council stated its underlying philosophy of approach in this way:—

We are concerned not with the question of inventing new forms of intervention, but rather with ordering and developing our policies and social programmes in a rational and coherent manner designed to accomplish consistently what the society has declared to be its economic and social goals. For this purpose it is essential to bring to bear the needs of the future on the decisions of today. This applies not only to decisions by governments but also to decisions in the private sector of the economy.

Canada's Economic Potential

The Canadian economy since the Second World War has encountered at one time or another inflation, higher unemployment, slow rates of economic growth, and even crises in the balance of international payments. This experience serves well to demonstrate that the real problem is not how to achieve one particular economic or social objective, but rather how to attain all of them—consistently—at the same time. This is another way of saying that the various goals are not always compatible with one another; there is always an overriding requirement to reconcile conflicts.

Once there is general public agreement on the broad set of goals to be pursued, the next task is to define them quantitatively in accordance with Canadian circumstances and possibilities. This the Council has done, publishing "targets". These targets are not forecasts or prophecies but are intended to be measures of desirable performance of the economy—that is, concrete aims of public policy. These objectives or targets were first set out by the Council in its *First Annual Review*, were revised and updated in the *Fourth Annual Review*, and again in the *Sixth Annual Review*.

Full Employment.—The Council believes that, over the medium-term future, economic policies should be actively directed toward achieving 97 p.c. employment—that is, no more than 3 p.c. of the labour force unemployed. But this is not regarded by the Council as an ultimate or satisfactory goal for all time; as it has stated, "We would hope that with sustained improvement in our economic performance it may eventually become realistic to aim for an even better performance in the level of employment". The Council also emphasized that the target rate is an average annual rate allowing for seasonal variation, and is a national average within which there will be some regional variation. Con-

* The Reviews, like all Council publications, are available from Information Canada, Ottawa. They are: *First Annual Review: Economic Goals for Canada to 1970* (\$2.50, Catalogue No. EC21-1/1964); *Second Annual Review: Towards Sustained and Balanced Economic Growth* (\$2.75, EC21-1/1965); *Third Annual Review: Prices, Productivity and Employment* (\$2.75, EC21-1/1966); *Fourth Annual Review: The Canadian Economy from the 1960's to the 1970's* (\$2.75, EC21-1/1967); *Fifth Annual Review: The Challenge of Growth and Change* (\$2.75, EC21-1/1968); *Sixth Annual Review: Perspective 1975* (\$2.75, EC21-1/1969); and *Seventh Annual Review: Patterns of Growth* (\$2.50, EC21-1/1970). Each of these Reviews includes a chapter on economic performance in relation to medium-term goals. In 1970, the Council expanded this appraisal and published it under the title *Performance and Potential: Mid-1950's to Mid-1970's* (EC21-1/1970-1).

Among other Council publications of more general interest are: *Business Cycles in Canada*, by Derek A. White (\$2.25, EC22-1/17); *Perspective on Canada's International Payments*, by David W. Slater (\$1.60, EC22-2/3); *Incomes Policies—Some Foreign Experiences and Their Relevance for Canada*, by David C. Smith (\$1.75, EC22-2/4); *Internal Migration in Canada, 1921-1961*, by Isabel B. Anderson (\$1.60, EC22-1/13); *Enrolment in Educational Institutions, by Provinces, 1951-52 to 1980-81*, by Z. E. Zsigmond and C. J. Wenaas (\$3.00, EC22-1/25); *Population, Family, Household and Labour Force Growth to 1980*, by W. M. Illing, et al. (\$1.00, EC22-1/19); *Canadian Policies for Rural Adjustment—A Study of the Economic Impact of ARDA, PFRA and MMRA*, by Helen Buckley and Eva Tihanyi (\$2.25, EC22-2/7); *National Conference on Labour-Management Relations, Ottawa, March 21-22, 1967* (\$2.00, EC22-367); *Interregional Disparities in Income*, by S. E. Chernick (\$1.75, EC22-1/14); *Scale and Specialization in Canadian Manufacturing*, by D. J. Daly, B. A. Keys, and E. J. Spence (\$1.75, EC22-1/21); *Canadian Growth Revisited, 1950-1967*, by Dorothy Walters (\$1.50, EC22-1/28); *Science, Technology and Innovation*, by Andrew H. Wilson (\$1.50, EC22-2/8); *Interim Report—Consumer Affairs and the Department of the Registrar General* (\$2.25, EC22-1067); *Medium-Term Capital Investment Survey 1969*, by B. A. Keys, F. G. Thompson and M. Heath (available from the Economic Council of Canada). A complete list of Council publications is available from the Secretary, Economic Council of Canada, P.O. Box 527, Ottawa. Also available from the Secretary are the Annual Reports of the Chairman, which include the Act establishing the Council and the membership of the Council.

sidering the rapid rate of increase in the numbers of people entering the labour force in Canada—close to 240,000 persons a year, on average, between 1965 and 1975—this goal would mean that the economy would have to grow fast enough to provide 2,400,000 new jobs over that ten-year period.

A High Rate of Economic Growth.—In calculating a potential rate of increase in total production (and thus incomes) the Council views economic growth as arising from: (1) increases in the *quantity* and *quality* of resources (for example, more manpower and capital, and higher levels of education and more efficient equipment); and (2) increases in productivity or in the efficiency with which men and capital are used and combined.

For the period to 1975, the Council has projected an average annual growth of 5.5 p.c. in the *volume* of production of all goods and services (*volume* in the sense that price increases are deducted from the value of production). Approximately two fifths of this gain in output would come from the employment increase, with a slight increase in the average educational level of the labour force. Another one fifth, roughly, would come from increased investment by government and industry. The remaining portion of the growth rate, around one third, would stem from productivity gains. The potential growth rate of 5.5 p.c. a year is high by both historical and international standards. It implies an increase in the total volume of output from \$36,000,000,000 in 1967 to about \$100,000,000,000 by 1975. This would mean an increase in the average standard of living in Canada—that is, total income divided by total population—of approximately one third.

Reasonable Price Stability.—In its projections to 1975, the Council assumed that the GNP price index would rise at an average annual rate of 2 p.c. The Council said it would regard this as consistent with the attainment of a satisfactory degree of price and cost stability over the medium-term future, at least under conditions of reasonable price stability abroad, particularly in the United States. Such an average rate of price increase would imply that some demand components—government expenditures, housing, and business investment in plant and equipment—would rise at a somewhat faster rate than the total and that the rate of advance in consumer prices and in export and import prices would be somewhat less. The Council added:—

We recognize that the achievement of this degree of price and cost stability will be extraordinarily difficult under conditions of high demand and high employment, as has been amply demonstrated by developments of the past three years. However, we continue to regard it as one of the basic goals towards which Canadians should continue to strive in the conduct of their economic affairs, with particular emphasis on longer-range policies designed to deal with basic structural and regional problems—that is, policies which would facilitate the consistent achievement of both our employment and price goals.

A Viable Balance of Payments.—After careful reappraisal in 1967, the Council concluded that the balance-of-payments goal set out in 1964 was appropriately formulated in terms of a current account deficit (and accompanying net capital inflow) at potential input in 1970 in the order of \$1,500,000,000 to \$2,000,000,000 and that this goal is still relevant.

From the mid-1950s to the end of the 1960s, the current account deficit (and the net capital inflow) declined from close to 5 p.c. of GNP to about 1 p.c. Changes in the merchandise trade balance mainly accounted for the large relative decline in the current account balance: the trade balance shifted from a deficit equivalent to 2 p.c. of GNP in the mid-1950s to a surplus equivalent of about 2 p.c. of GNP by the end of the 1960s. Apart from 1967, the services deficit remained in a range of 2 to 3 p.c. of GNP. Over this period, net inflows of capital in long-term forms decreased significantly in relation to output (from about 4 p.c. of GNP in the mid-1950s to about 2 p.c. in the latter part of the 1960s).

From early 1969 to early 1970, virtually all of the increase in real GNP went into expanded Canadian exports. The floating of the dollar in June 1970 is attributed to Canada's decision that it would not continue to finance a very rapidly increasing volume of exchange reserves at the previous fixed rate of exchange, especially in the light of the possi-

bility of a massive speculative inflow of capital. The huge merchandise trade surplus (about \$1,300,000,000 in the first half of 1970) and a strong capital inflow swiftly drained away the Canadian dollar balances of the Government of Canada that were required for purchasing foreign exchange accumulating in the official reserves. Policies of restraint in Canada tended to slow the growth of imports and thus contributed to the increased trade surplus.

Whether Canada could maintain medium- and longer-term balance-of-payments viability with the Canadian dollar at a level that was close to par with the U.S. dollar is an open question. The exchange rate is, in fact, a very important *price* in Canada's over-all price system, and changes in it tend to have far-reaching consequences for many parts of the economy.

Equitable Distribution of Rising Incomes.—This is an extremely complex goal, defying simple formulation. The Council believes that much more information is needed about the distribution of income among individuals, families and various occupational groups. For example, why do some groups receive little benefit from the general rise in incomes and living standards? What elements lie behind the vicious circle of poverty that still traps far too many people? Although some of these problems may range far beyond the field of economics, the Council has said that these difficult matters will have to be understood and faced if appropriate policies are to be devised to achieve the goal of equitable distribution of rising incomes. To date, the Council's work in this area has been concentrated on two aspects of the fifth goal, namely, regional disparities and poverty.

The problem of assuring an appropriate participation on the part of each region in the over-all process of national economic development has long been an elusive goal and a continuing concern of the people of Canada. The Council's analysis showed that over the past four decades there has been relatively little progress toward the achievement of a better balance in this respect. Despite various policies and programs, very wide disparities have continued to exist in average per capita income. Also, there have continued to be wide differences in the extent to which the human and material resources of each region have found opportunities for productive use. Although national prosperity has always tended to have a favourable influence everywhere, rapid national growth has not by itself served to bring about any significant or lasting reduction in these large and stubborn differences.

The emergence of some slack in the late 1960s and the development of more slack in 1970 is again being accompanied, as in earlier similar conditions, by the slower growth of employment and high unemployment rates in the lower-income regions. Employment growth in the Atlantic Provinces has averaged only 4,000 a year over the past three years (total employment in the Atlantic Provinces was 605,000 in 1969). Similarly, in this three-year period, employment growth in Quebec averaged less than 20,000 a year (total employment in Quebec was over 2,130,000 in 1969).

Rates of unemployment have become very high in the Atlantic Provinces, Quebec and British Columbia, in all of which the unemployment rates tend to be relatively high when slack develops in the Canadian economy generally. An unusual feature in the recent pattern of increases in unemployment rates is that the Prairie Provinces, which typically have a rate below that of Ontario, had a higher rate in mid-1970. This was a reflection of special difficulties with wheat and potash marketing and problems in the construction industry. Another unusual feature is the exceptionally high rate of unemployment in British Columbia in mid-1970, reflecting, in part, the effects on the regional economy of increased industrial disputes and perhaps also a stepped-up flow of migration to that province.

Like the objective of improved regional balance, the elimination of poverty is one aspect of the still broader goal of an equitable distribution of rising incomes. Poverty is a relative matter, and generally accepted conceptions of it vary through time and space. Poverty today is not the same as poverty in the Great Depression of the 1930s and poverty today in Canada is not the same as poverty in the underdeveloped countries of Southeast

Asia. In order to get a statistical grip on the problem of poverty, the Council agreed to define it as "an insufficient access to certain goods, services, and conditions of life which are available to everyone else and have come to be accepted as basic to a decent, minimum standard of living". Thus stated, the definition begs many questions, most of which could become the subject of a long and inconclusive debate. Rather than engage in such a debate, the Council proceeded directly to a statistical embodiment of the definition sufficiently simple that it could be appreciated and judged by a broad public in relation to personal, everyday economic experience.

On the basis of information regarding family spending patterns, so-called "poverty lines" were traced for individuals and families of different sizes. A basic assumption for the main set of estimates was that any family or individual spending more than 70 p.c. of total income on food, clothing and shelter was in a low-income situation and likely to be suffering from poverty. These poverty lines were expressed in the *Fifth Review* in terms of 1961 dollars; adjusted to dollars of 1968 purchasing power, they come out at \$1,800 a year for a single person, \$3,000 for a family of two, \$3,600 for a family of three, \$4,200 for a family of four and \$4,800 for a family of five. Obviously, these are conservative cut-offs; living standards at or just above such levels would be modest indeed.

Using income data derived from the 1961 Census, it was possible to analyse some of the characteristics such as the age, sex and education of family heads, size of family, geographical region of residence, and place of residence (metropolitan, other urban or rural) of those falling below the poverty lines. As of 1961, some 916,000 non-farm families plus 416,000 individuals were living below these levels. The total number of persons involved was 4,200,000, including 1,700,000 children under 16 years of age. In all, they accounted for some 27 p.c. of the total non-farm population of Canada in that year.

Statistics cannot adequately describe poverty but, used with care, they are capable of furnishing important clues to types of policies likely to be effective against poverty.

It is evident from the incidence figures that income is more likely to be low when one or more of the following characteristics are present: (1) the head of the family has no formal education beyond elementary school; (2) the family lives in a rural area; (3) the family lives in the Atlantic Provinces; (4) the head of the family is not a member of the labour force; (5) no member of the family worked during the year; (6) the head of the family is 65 years of age or over; (7) the head of the family is a woman. From that list, it is all too easy to form a picture of poverty in Canada that consists of a relatively few stereotyped categories, but a more balanced picture of the total low-income population of Canada is necessary. In view of the following observations, it is therefore vital in framing policy not to be over-influenced by rates of incidence: (1) 62 p.c. of the low-income non-farm families in 1961 lived in urban areas and of this group more than half lived in metropolitan areas; (2) 83 p.c. of low-income non-farm families lived elsewhere than in the Atlantic Provinces—53 p.c. of them lived in Ontario and the Western Provinces; (3) 68 p.c. of the same group of families had heads who were in the labour force for at least part of the year; (4) 76 p.c. of the group had one or more earners in the family; (5) 77 p.c. of the family heads in the group were under 65 years of age; (6) 87 p.c. of the families in the group were headed by men. It can thus be seen that a set of anti-poverty policies directed toward major groups or geographical areas showing a very high incidence of low incomes would almost certainly fail to deal adequately with poverty.

The Council called for a more concerted and purposeful attack on poverty in Canada. The challenge, in the short run, is to alleviate conditions which today thrust many Canadian families and individuals into involuntary poverty and hold them there. In the long run, the challenge is to prevent the development of these conditions.

Challenges for the 1970s

There are many economic challenges for Canada in the 1970s. A large number of them arise from questions about how Canadians wish to make use of their growing resources to meet the future aspirations of their society. Another group of challenges are the

economic performance challenges which arise in the context of five basic economic and social goals—full employment, a high and sustained rate of economic growth, reasonable price stability, a viable balance-of-payments position, and an equitable distribution of rising incomes. The key requirement for sustained good performance in relation to these goals is that they must be achieved concurrently, even though they are not all complementary and reinforcing.

To attain potential output in 1975, GNP (in constant 1969 dollars) will need to rise at an average annual rate of about $5\frac{1}{2}$ p.c. from 1969 to 1975. This would imply an increase (in terms of 1969 dollars) of over \$30,000,000,000 to a level of close to \$110,000,000,000 in 1975. Over the last half of the 1970s, the potential growth rate of the Canadian economy would still be high—over 5 p.c. This would imply a further increase in GNP in the latter part of the 1970s of about an equivalent real dollar magnitude, so that potential GNP by 1980 would be roughly of the order of \$140,000,000,000 (in 1969 dollars).

A very large rise in employment will be needed to reach the full-employment potential of the economy by 1975—about 1,300,000 to 1,400,000 more jobs than existed in 1970. Moreover, over the 1975-80 period, about 1,200,000 additional jobs will be required. In other words, at least 2,500,000 net new jobs will be required in Canada over the coming decade.

A new ingredient in the challenges both for adequate job creation and for productivity growth in the 1970s will be the unprecedented flow into the labour markets of high-level manpower from the post-secondary educational systems. The returns from the expansion in education could be substantial during the 1970s but greater attention needs to be directed to the possibilities here, and various adjustments are needed in the private and government sectors of the economy in order to employ effectively and productively the rapidly rising volume of high-level manpower.

No less important in the 1970s will be the challenge of reconciling good performance in price stability with good performance in relation to employment and growth potentials. Full employment and price stability have never been regarded as "either/or" objectives. Rather, the essential challenge is to pursue both of these goals together in a balanced way and in a longer-run time perspective.

The maintenance of a strong international position will also be an important performance challenge for the 1970s. Increased exports and the maintenance of adequate access to external sources of capital are needed in order to finance both the increased imports of goods and services that Canadians will demand and increased Canadian foreign investment and aid. Canada's potential in international trade in the 1970s cannot be achieved unless producers and exporters struggle unrelentingly, with appropriate supporting government policies and programs, to enhance their competitiveness in domestic and world markets. Moreover, they may well have to do so under conditions that may not be as favourable as in the 1960s, when the substantial devaluation of the Canadian dollar was an important factor strengthening the international competitive position of many industries.

The more equitable distribution of rising incomes will undoubtedly come into greater prominence as an economic and social goal in the 1970s. In particular, the challenges of narrowing regional economic disparities and eliminating poverty clearly need, and will claim, increasing emphasis.

Commercial Policy Issues in the 1970s

Against the background of a substantial reduction in trade barriers since the Second World War, Canada, like other industrial countries, has come to rely more and more on foreign trade to sustain and improve its economic performance. Many factors besides commercial policy have, of course, contributed to Canada's trade growth, including the growth of domestic markets which have provided a stronger base for successful export expansion in various industries. Exports now equal about half the goods of Canada's goods-producing industries, and nearly half the goods supplied to Canadians are imported.

Growth of exports and imports facilitates more efficient use of productive resources, permits greater specialization, and helps to reduce costs and to increase real income per capita.

A strong upsurge of Canadian exports in the 1960s was led for the first time by advanced manufactures, and sustained by rising sales of industrial materials. Automotive and other highly manufactured products accounted for about 40 p.c. of the export total in 1969.

In the past, Canadian commercial policy focused strongly on two themes: (1) negotiation of reduced tariff and other barriers to its exports to foreign countries, particularly for resource-based products in which it was considered that Canada had a "natural advantage"; and (2) the maintenance of protection for a considerable range of manufactured products. Only in more recent years, with the advent of the Kennedy Round and the special trade arrangements with the United States, has there been some tendency to focus on free trade opportunities for exports and imports of manufactured products in order to gain the benefits of specialization and large-scale production in the more advanced manufacturing industries.

There are good economic reasons for dissatisfaction with some of the results of Canada's commercial policies—in particular the emergence of a high-cost structure of production for advanced manufactures. Canada's manufacturing industries are often characterized by small-scale—and, more important, by rather specialized—production and by high unit costs, despite their advantages in supplies of basic materials and labour and their access to first-rate technology.

There are four essentially unresolved problems from the 1960s that remain to be tackled internationally: (1) improved arrangements for agricultural trade, particularly wheat, feed grains and beef; (2) the reduction of non-tariff distortions in trade; (3) special trade arrangements for developing countries; and (4) the modification of the preferential tariff system and the resolution of other trade problems that would arise from British entry into the European Economic Community. Beyond these more immediate tasks, there is the more fundamental issue of how Canada will respond to the "new generation" of big industrial markets, big international firms, and the acceleration of technological change. Access to a large market for industrial products will undoubtedly be even more important in the future than it has been in the past.

It is relevant to recall that Canada's position among industrial countries has special features: Canada is one of the few industrial countries without duty-free access to a large market for all its manufactured products; Canada has some special trade arrangements with the United States which provide an integrated market for some manufactured products; and Canadian duties in several trade sectors are sufficiently high for this country to be regarded now as having a relatively high tariff.

In summary, the Council discerns three broad alternative paths along which world commercial policy could develop: (1) a continued, gradual reduction of trade barriers such as occurred between 1947 and 1967; (2) a positive and constructive response by the United States and the EEC to the issue raised by the creation of a huge trading bloc in Western Europe; and (3) a possible turn toward protectionist trade policies on the part of the United States and/or the EEC.

Patterns of Growth

One of the Council's principal duties is to advise on how to achieve high, stable, sustained and widely shared growth in the economy. This mandate implies that economic growth, especially productivity growth, provides an essential basis for meeting human needs and aspirations of many kinds—not only those reflected in material living standards but also broader human and social aims in health and education, the reduction of large-scale poverty, and other diverse goals. Since the inception of its work, the Council has devoted considerable effort to the development of improved understanding of the nature and sources of growth and is continuing its work in this field by focusing attention on in-

dustrial growth patterns. The present analysis is directed mainly at clarifying the basic elements in growth of labour and capital and the efficiency with which these have been used in major groups of industries over the past two decades.

The focusing of attention on industrial growth patterns is an initial step toward the future development of potential output analysis on an industry basis, taking into account various important interrelationships between industries. Such analysis should provide, by industries, estimates of future growth of output, investment and employment, consistent with potential output for the whole economy.

For present purposes, ten "industry" groups under three broad headings have been chosen: (1) the *primary* industries, with agriculture, forestry and fishing treated as one group; (2) four groups of other *goods-producing* industries—mining, oil and gas, manufacturing, construction and utilities—as a second group; (3) five *service* industries—transportation, storage and communication; trade (wholesale and retail); finance, insurance and real estate; community, business and personal services; and public administration.

The Council calculated trends in annual growth rates of output by industry group for the 1946-67 period. With the exception of the primary group, the over-all growth rates in current dollars for all industries fell into a range of 7 to 10 p.c.; for agriculture, forestry and fishing combined, the growth rate was only about 2 p.c. Also, a rough estimate was made of what portion of the over-all growth rate was due to price increases. The general pattern is that the output of the goods industries grew more rapidly in real terms and had a lower price component; utilities and mining had the highest rates of growth in real output and relatively very small increases in prices; and in the service industries the price advance was generally much more pronounced.

Components of Growth

The growth analysis of these ten parts of the economy will follow the same approach used in the Council's earlier examinations of over-all economic growth. In this framework, growth is traced to changes over time in three broad groups of elements—labour, capital and factor productivity.

There appears to be an association between the scale of price increases indicated in some industries over the 1946-67 period and the extent to which these industries relied on particular growth elements more than on others. In general, price increases were less pronounced in the industry groups that experienced relatively high rates of growth in factor productivity. Price increases were highest over that period in the construction, trade, public administration, financial, and community, business and personal service industries, and they generally obtained much of their growth over the postwar period with higher labour inputs and relatively little improvement in factor productivity.

In the mining and utilities groups, increases in capital stock accounted for well over half their total growth in the 1946-67 period and both groups had substantial gains in factor productivity and the lowest rates of price increase over that period.

The transportation, storage and communication industry, with a fairly small reliance on capital stock increases for its over-all growth, experienced a situation in which factor productivity accounted for about 60 p.c. of its total gain in average annual real output over the two decades.

Structural Shifts

The largest part of Canada's labour force is now engaged in the production of services. Since the end of the Second World War, these service industries have increased their share of total Canadian employment from about 40 p.c. to almost 60 p.c. Their proportion of the total value of output, which was approximately 50 p.c. in 1946, now is also approaching 60 p.c.

Subsection 2.—The Department of Regional Economic Expansion

The Department of Regional Economic Expansion, which is responsible for Federal Government efforts to overcome regional economic disparities, came officially into existence on Apr. 1, 1969. However, the process of forming the new Department began in July 1968 with the bringing together of a number of existing agencies and programs concerned with regional development.

These programs and agencies included the Agricultural and Rural Development Act (ARDA) and the Fund for Rural Economic Development (FRED) from the Department of Forestry and Rural Development; the Area Development Agency (ADA) from the (then) Department of Industry; the Atlantic Development Board (ADB); the Experimental Projects Branch (Canada NewStart Program) from the Department of Manpower and Immigration; and the Prairie Farm Rehabilitation Administration (PFRA) from the Department of Agriculture. The Minister at the same time became responsible for the Cape Breton Development Corporation (DEVCO), and the National Capital Commission (NCC).

The new Department was formally created by the Government Organization Act, 1969 (SC 1968-69, c. 28), and this legislation also provided the Department with the first of two major new weapons in the fight against regional disparities. This was the authority to prepare and implement, in co-operation with the provincial governments and other federal agencies, development plans and programs designed to meet the special needs of areas where the growth of employment and incomes was lagging behind other parts of Canada. The second major piece of legislation, the Regional Development Incentives Act, was approved by Parliament in July 1969. This provides a strong and effective program of industrial incentives to encourage manufacturing and processing industries to establish, expand or modernize in parts of the country where new jobs are badly needed. The program provides generous capital grants of up to \$12,000,000 to encourage firms to create new jobs by establishing, expanding or modernizing manufacturing and most kinds of processing plants in "designated regions" of the country. These designated regions include all of the Atlantic Region, with the exception of Labrador, much of eastern Quebec, and parts of every other province.

The amount of incentive offered in an individual case is determined on the basis of an assessment of the various financial and economic implications of the project. Factors analysed include such things as the economic impact of the project on the region concerned and the company's need for an incentive in order to create a viable operation in the designated region. Experience to date has shown that the incentives available under the program are able to exert a strong pull on industry to undertake new activity in the designated regions. In the period from the introduction of the program in July 1969 to Apr. 30, 1970, 136 applicants accepted offers of incentives. These projects are expected to create more than 6,500 new jobs in various parts of the country when they go into production.

"Special Area" Program.—To make industrial incentives as effective as possible in overcoming regional disparities, there must be centres in the slow-growth regions which are attractive sites for industrial and population growth. These centres must be able to provide the utilities and services that industry requires, as well as a wide variety of social facilities to meet the needs of a growing population. Therefore, one of the major purposes of the Department's "special area" program is to ensure and speed the development of such centres by helping the provincial government to build up the essential municipal services.

Under the program authorized by Part IV of the Government Organization Act, 1969, special areas can be designated by the Federal Government, in co-operation with the province concerned, where it is determined that special action is needed to promote economic expansion and social adjustment. The "special action" involved is a development approach designed, through federal and provincial co-operation, to meet the needs of the area concerned. Therefore, the type of federal action will vary from area to area according to the need.

The first 22 special areas under the program were designated in March 1970 and federal-provincial agreements have been signed covering specific infrastructure development projects to begin in 1970 in 18 of these areas. In the other four areas, the main federal assistance will be in the form of incentives to industry. The agreements that have been signed commit the Department to provide the various provinces with a total of up to \$230,000,000 in grants and loans over the period to June 30, 1972. This is additional to any federal money that may be provided in industrial incentives. The agreements also call for the federal and provincial governments to co-operate in preparing further four-year development plans for the areas involved. In addition, there will be consultation with the provinces regarding the possible designation of further special areas in the future.

Agricultural and Rural Development Act (ARDA).—ARDA is a federal-provincial shared-cost program in which all provinces have participated since its introduction in 1962. The program to date has operated under two separate federal-provincial agreements, the first covering the period to 1965 and the second the 1965-70 period. Five-year ARDA agreements for the 1970-75 period were signed with Ontario and British Columbia in May 1970. New agreements are expected with all provinces except Prince Edward Island, which is covered by a comprehensive rural development plan. The federal ARDA budget for the fiscal year 1970-71 is \$25,000,000.

Canada Land Inventory (CLI).—The Canada Land Inventory, being undertaken under the ARDA legislation, is a classification of more than 1,000,000 sq. miles of land according to its capabilities for agriculture, forestry, recreation, wildlife and sport fish (see also p. 543). In addition, it includes one pilot-scale land-use planning project in each province. The inventory data are being reproduced on conventional and computer-input maps as an aid to making decisions on land use. Inventory information is available to both the federal and provincial governments.

Fund for Rural Economic Development (FRED).—FRED was a federal fund of \$300,000,000, established in 1966 to finance comprehensive federal-provincial development plans in various parts of the country. The FRED legislation was replaced, when the Department of Regional Economic Expansion was established, by the "special area" powers given to the Department. Therefore, no new programs will be initiated under FRED but the five programs already in operation, for terms ranging from five to 15 years, will continue to completion, with financing through the Department's annual estimates: the northeast and Mactaquac areas of New Brunswick; the Lower St. Lawrence-Gaspé area of Quebec; the interlake area of Manitoba; and the whole of Prince Edward Island.

Prairie Farm Rehabilitation Administration (PFRA).—Since its creation in 1935, PFRA has turned 2,500,000 acres of marginal and submarginal land into community pastures, and has been instrumental in the construction of many large irrigation and water control projects, notably the Bow River and St. Mary irrigation schemes in Alberta, the South Saskatchewan River Project, the Shellmouth Dam and the Portage Diversion Project. At the farm level, PFRA has assisted 100,000 "dugout" projects for irrigation, stock-watering and domestic water supplies. It has also distributed, free of charge, up to 10,000,000 seedlings a year for farm shelterbelts. PFRA continues as an entity within the organization of the Department of Regional Economic Expansion and has been given new responsibility in implementing departmental programs in the Prairie Provinces.

Canada NewStart Program.—Part of the function of the Department's Social and Human Analysis Branch is to serve as the federal arm of "Canada NewStart" by helping to devise, test and apply programs that will motivate and train disadvantaged adults for stable and rewarding employment. Professional staff act as consultants to the six NewStart corporations that have been established in areas of New Brunswick, Nova Scotia, Prince Edward Island, Manitoba, Saskatchewan and Alberta.

Newfoundland Resettlement Program.—This is a federal-provincial shared-cost program established to help people in Newfoundland move from areas where economic prospects are poor to other parts of the Island where there are better employment opportunities and public services.

Atlantic Development Council.—The Atlantic Development Board ceased to exist with the passage of the Government Organization Act, 1969, but projects begun by it are being continued by the Department. The Board's former advisory role is carried on by the new 11-member Atlantic Development Council, appointed by the Federal Government in consultation with the governments of the Atlantic Provinces. It advises the Minister of Regional Economic Expansion with regard to plans and programs for economic and social development and their effects on the region.

Canadian Council on Rural Development (CCRD).—The function of the CCRD is to advise the Minister of Regional Economic Expansion on rural development policies; it is composed of representatives of private organizations concerned with rural development, who are appointed by the Minister to serve on the Council.

Subsection 3.—The Cape Breton Development Corporation

The Cape Breton Development Corporation was created by an Act of Parliament, assented to on July 7, 1967 (SC 1967-68, c. 6) and came into existence by proclamation on Oct. 1, 1967, as a proprietary Crown corporation. The Corporation was established to promote and assist the financing and development of industry on the Island and to provide employment outside the coal producing industry to broaden the base of the economy of the Island.

The Corporation has acquired the former interests of the major coal producer in the Sydney coalfield and, in accordance with its approved plan as required by Sect. 17 of the Act, is operating and reorganizing four mines with a view to the rationalization of coal production.

The Act provides for a board of directors, comprised of a chairman, a president and five other directors. Head office is located in Sydney, N.S. The Corporation reports to Parliament through the Minister of Regional Economic Expansion. Its operations are financed by the Government of Canada with some assistance from the Government of Nova Scotia for industrial development projects. During 1969, approximately \$36,000,000 was expended for all purposes.

Subsection 4.—Provincial Government Economic Planning Agencies

In a number of provinces, economic planning agencies have been set up or are in the formative stage. Only those that are currently active are described here. Other sources of information on economic planning are listed in the Directory of Sources of Official Information in Chapter XXVII, under the heading "Economic Planning".

Nova Scotia Voluntary Economic Planning Board

The Voluntary Economic Planning Board (VEP), formed by an Act of the provincial Legislature in 1963, is an autonomous body and represents non-government elements in the community. It was set up to enable the private sector to participate in the provincial planning process on a purely voluntary basis. Its purpose is to assist the government in preparing an economic development strategy for the province.

During the first years of its existence, it was, in effect, the only economic planning group in the province; it completed its first plan for the economic development of Nova Scotia in 1966. This plan, which set a number of growth targets for the provincial economy and outlined policies for future growth, emanated largely from the private sector and was

advisory to the government. The Board, however, was not set up to handle the on-going economic planning for the province. This function has now been assumed by the provincial government (Cabinet Committee on Planning and Programs).

The Board's inputs into the provincial economic planning process now under way are as follows:—

- (1) Policies, strategies, proposals and/or recommendations emanating from segment and sector committees are channelled through the Board to the Cabinet Committee on Planning and Programs.
- (2) Simultaneously with (1), draft papers prepared by the government are forwarded to the Board for consideration at the sector and segment level. The relationship between government planners and the economic "grass-roots" are now maintained by nine sector committees and 38 segment committees served by VEP sector secretaries. About 700 people serve under the Board.

Quebec Planning and Development Board

An Act passed by the provincial Legislature in June 1968 authorized the establishment of the Quebec Planning Board, which was set up in the same year. Under amending legislation of June 9, 1969, this organization became the Quebec Planning and Development Board and, in addition to its previous functions, now includes ARDA and the Eastern Quebec Development Board and is charged with the administration of special development funds such as those available under the Canada-Quebec agreement for the development of the Quebec City, Trois-Rivières and Sept Îles-Port Cartier areas of the province.

The Board is a corporate body administered by a director-general, who is chairman, and five other members appointed by the Lieutenant-Governor in Council. It is authorized to act as an agent of government in the acquiring or disposing of goods on behalf of the government.

The functions of the Board are: to prepare plans, programs and projects for economic and social advancement and for area development, with the object of making the best possible use of the natural and human resources of the province, and in so doing to gather required information from provincial government departments and agencies on their policies, programs, projects and accomplishments; to undertake or commission research, studies, surveys and inventories, the results of which are needed to carry out its functions, and to co-ordinate like activities of other departments and agencies; to make recommendations to the government based on its own research and studies and advise the government on policies and programs prepared by other departments and agencies; to direct and implement the execution of any plan, program, project or development with which it is charged by the Lieutenant-Governor and to act as liaison between the departments or agencies involved; and to administer the funds made available to be used for the carrying out of its projects.

The Act authorizes the establishment of an Interdepartmental Planning and Development Commission comprised of all Deputy Ministers of the Quebec Government which will act as adviser to the Board on the conduct of its affairs.

The Ontario Economic Council

The Ontario Economic Council was formed initially by Order in Council on Feb. 1, 1962, and established by An Act to Establish the Ontario Economic Council on May 30, 1968. The Council was conceived as a vehicle whereby representatives of a broad cross-section of knowledgeable persons throughout the province could pool their information and experience regarding social and economic matters, commission research and formulate policy recommendations to the public and private sectors.

Twenty Ontario citizens serve as members of the Council: six represent business and industry; one each the financial community and the Consumers' Association of Canada; three, organized labour; three, agriculture; and one, the provincial universities. One member comes from the senior ranks of the Ontario Civil Service and the remaining four are drawn from the Ontario Research Foundation, the Ontario Regional Development Council, The Hydro-Electric Power Commission of Ontario, and the Ontario Northland

Railway. Each serves as an individual citizen without compensation for a term of one, two or three years. The Council meets monthly in Toronto.

Essentially, the Council operates as an advisory body to the Government of Ontario. Some of its findings are reported directly to the government; other reports and recommendations are published and distributed more widely. Recent reports cover the fields of immigration, forestry policy, reform of government, poverty, transfer taxation, education, labour, skill-training and plant location. Also published, annually between 1965-69 and now biennially, is an index of research projects carried on within provincial government agencies and departments and certain industrial companies operating in Ontario.

The Council shares the view of the Government of Ontario that the economy of Ontario is not an entity separate from Canada. For this reason the Council does not undertake separately for Ontario what the Economic Council of Canada has done and is doing for Canada as a whole. Projects are undertaken with the Economic Council of Canada on a co-operative basis and information is exchanged between the two Councils. Another way in which the Ontario Economic Council pursues its responsibilities is through the work of *ad hoc* committees which involve a broad cross-section of the Ontario community.

A small permanent Council staff undertakes direct assignments and superintends the design and administration of projects assigned to others. Close contact with government departments avoids unnecessary duplication of effort. Research facilities, academic personnel and graduate students in Ontario universities have been used for certain projects, which have included the professional services of members of the departments of economics, political science, geography and business administration in provincial universities. From time to time, the Council engages the professional services of private consulting firms.

The new 1,250-foot stack at the Copper Cliff nickel smelter looks down on three smaller stacks it will replace. This multi-million-dollar answer to the challenge of pollution control, when fully operational in 1971, will result in the extraction of 40 p.c. of the sulphur in the smelter gases.

PART I.—BANKING AND OTHER COMMERCIAL FINANCE

Section 1.—Banking

Subsection 1.—The Bank of Canada*

Canada's central bank, the Bank of Canada, began operations on Mar. 11, 1935, under the terms of the Bank of Canada Act of 1934 which charged it with the responsibility for regulating "credit and currency in the best interests of the economic life of the nation", and conferred on it specific powers for discharging this responsibility. Through the exercise of these powers, the Bank broadly determines the combined total of the most common forms of Canadian money held by the community—chartered bank deposits and currency. The 1967 revision of the Bank of Canada Act contained a number of technical amendments designed to assist the Bank in discharging its responsibilities and account is taken of these changes in the following description of the Bank's operations.

The provisions of the Bank of Canada Act enable the central bank to determine the total amount of cash reserves available to the chartered banks as a group and thus to control the rate of expansion of the total assets and deposit liabilities of the banking system

* Revised (December 1970) by the Research Department of the Bank of Canada.

as a whole. The Bank Act, which regulates the operation of the chartered banks, requires that each chartered bank maintain a stipulated minimum average amount of cash reserves, calculated as a percentage of its Canadian dollar deposit liabilities, in the form of deposits at the Bank of Canada and holdings of Bank of Canada notes. (The minimum cash reserve requirement, which came into effect under the new legislation beginning Feb. 1, 1968, is 12 p.c. of demand deposits and 4 p.c. of other deposits.) The ability of the chartered banks as a group to expand their total assets and deposit liabilities is therefore limited by the total amount of cash reserves available. An increase in cash reserves will encourage the banks as a group to expand their total assets (which consist chiefly of loans and marketable securities) with a concomitant increase in their deposit liabilities; a decrease in cash reserves will bring about a decline in their total assets and deposit liabilities as they seek to restore their cash reserve ratios.

The chief method by which the Bank of Canada alters the level of cash reserves of the chartered banks, and through them the total of chartered bank deposits, is by purchases and sales of government securities. Payment by the central bank for the securities it purchases in the market adds to the cash reserves of the chartered banks as a group and puts them in a position to expand their assets and deposit liabilities. Conversely, payment to the central bank for securities it sells causes a reduction in the cash reserves of the chartered banks and requires them to reduce their holdings of assets and deposit liabilities.

The influence that the Bank of Canada exerts on credit conditions (i.e., on the interest cost and other terms of borrowing in financial markets) stems from its ability to limit the growth of bank credit and of the community's holdings of bank deposits and currency. The growth rate of the banking system is one of the factors exerting an important influence on the level of interest rates and other terms of access to credit prevailing in financial markets generally. Current credit conditions (and expectations about future trends in such conditions) in turn have an influence on business and household decisions to spend or to save. Many other factors also have an important effect on spending decisions, however, and the behaviour of the economy is subject as well to such influences as economic and financial developments abroad; the investment, price and wage policies of business firms in Canada; and the character of public policies at all levels of government with regard to expenditure and taxation. In using the powers at its disposal, the Bank attempts to help bring about credit conditions appropriate to both domestic and external conditions. Its operations must be based, not on any simple mechanical formula, but rather on continuous observation and appraisal of the constantly changing prospects for the economy as reflected in the complex pattern of economic and financial developments.

In a technical sense, the powers which the central bank possesses allow it to exert a strong influence over economic activity but, in practice, the range through which credit conditions can be permitted to vary is necessarily limited. Changes in credit conditions in Canada affect the position of some groups in the economy much more than that of others, and this uneven impact is bound to inhibit the central bank's operations. Furthermore, interest rates in Canada cannot change greatly in relation to those abroad without producing large capital movements which might complicate Canada's international payments position. These considerations suggest that monetary policy must be used in appropriate combination with other public economic policies in order to help achieve national economic goals.

Although the Bank of Canada has the power to determine the rate of growth of the combined total of currency and chartered bank deposits, it has no means of determining how much of this total is held in the form of currency and how much in the form of chartered bank deposits. This depends entirely on the preferences of the public, since bank deposits can be converted freely into notes and coin and back again.

Although the cash reserve system in Canada—which is similar to that in a number of other countries—enables the central bank to determine within broad limits the total amount of chartered bank assets and deposit liabilities, the Bank of Canada leaves the allocation of bank and other forms of credit to the private sector of the economy. Each

chartered bank is free to attempt to gain as large a share as possible of the total cash reserves available by competing for deposits and to decide what proportion of its funds to invest in particular kinds of securities and in loans to particular types of borrowers. The influence of the central bank—based in essence on its power to expand or contract chartered bank cash reserves through its market purchases or sales of securities—is both indirect and impersonal and is brought to bear on financial conditions generally through the chartered banks and the numerous inter-connected channels of the capital market.

The powers of the Bank are contained in the Bank of Canada Act, 1934 (RSC 1952, c. 13), revisions in which were made in 1936, 1938, 1954 and 1967. Some of these powers are outlined below.

The Bank may buy or sell securities issued or guaranteed by Canada or any province, short-term securities issued by Britain, treasury bills or other obligations of the United States and certain types of short-term commercial paper. The Industrial Development Bank Act authorizes the Bank to purchase securities issued by that institution. The Bank may buy or sell gold, silver, nickel and bronze coin, or any other coin, and gold and silver bullion as well as foreign exchange and may accept non-interest-bearing deposits from the Government of Canada, the government of any province, any chartered bank and any bank regulated by the Quebec Savings Bank Act. The Bank may open accounts in other central banks. It may accept deposits from other central banks, the International Monetary Fund, the International Bank for Reconstruction and Development, and any other official international financial organization, and it may pay interest on such deposits. The Bank does not accept deposits from individuals nor does it compete with the chartered banks in the commercial banking field. The Bank acts as the fiscal agent for the Government of Canada in the payment of interest and principal and generally in respect of the management of the public debt of Canada. The sole right to issue paper money for circulation in Canada is vested in the Bank.

The Bank of Canada may require the chartered banks to maintain, in addition to the legal minimum cash reserve requirement mentioned above, a secondary reserve which the Bank may vary within certain limits. The secondary reserve, which consists of cash reserves in excess of the minimum requirement, treasury bills and day-to-day loans to investment dealers, cannot be more than 6 p.c. of total deposits when first introduced nor can it exceed 12 p.c.; effective April 1968, the required level was 7 p.c. In the event the Bank wishes to introduce or increase the secondary reserve requirement, one month's notice to the chartered banks is required; the amount of any increase in the requirement cannot exceed 1 p.c. per month. In the case of a lowering of the secondary reserve requirement, however, the percentage change in any one month is not restricted.

The Bank of Canada may make loans or advances for periods not exceeding six months to chartered banks, or to banks to which the Quebec Savings Bank Act applies, on the pledge of certain classes of securities. Loans or advances may be made under certain conditions and for limited periods to the Government of Canada or of any province. The Bank of Canada is required to make public at all times the minimum rate at which it is prepared to make loans or advances; this rate is known as the Bank Rate. From Nov. 1, 1956 until June 24, 1962, the Bank Rate was established weekly at a fixed margin of $\frac{1}{4}$ of 1 p.c. above the latest weekly average tender rate for 91-day treasury bills. Since June 24, 1962, the Bank Rate has been fixed from time to time as follows:—

<i>Date of Change</i>	<i>Per Cent per Annum</i>	<i>Date of Change</i>	<i>Per Cent per Annum</i>	<i>Date of Change</i>	<i>Per Cent per Annum</i>
June 24, 1962.....	6.00	Jan. 30, 1967.....	5.00	Dec. 18, 1968.....	6.50
Sept. 7, 1962.....	5.50	Apr. 7, 1967.....	4.50	Mar. 3, 1969.....	7.00

Nov. 14, 1966.....	5.25	Sept. 3, 1968.....	6.00		

From June 24, 1962 to Nov. 12, 1970, the Money Market Rate—the rate at which the Bank of Canada is prepared to enter into purchase and resale agreements with money-market dealers—was either $\frac{1}{4}$ of 1 p.c. above the average rate on 91-day treasury bills at the preceding weekly tender or the Bank Rate, whichever was lower; since Nov. 12, 1970, the minimum rate is the Bank Rate less $\frac{3}{4}$ of 1 p.c.

The Bank of Canada is not required to maintain gold or foreign exchange reserves against its liabilities.

Prior to the 1967 amendment of the Bank of Canada Act, there existed some uncertainty about the exact relationship between the central bank and the Government. The changes in the Bank of Canada Act in 1967 were designed to clarify this matter. They provide for regular consultation between the Governor of the Bank and the Minister of Finance as well as for a formal procedure whereby, in the event of a disagreement between the Government and the Bank which cannot be resolved, the Government may, after further consultation has taken place, issue a directive to the Bank as to the monetary policy that it is to follow. Any such directive must be in writing, it must be in specific terms, and it must be applicable for a specified period. It must be published immediately in the *Canada Gazette* and tabled in Parliament. The amendment makes it clear that the Government must take the ultimate responsibility for monetary policy and it provides a mechanism for that purpose but the central bank is in no way relieved of its responsibility for monetary policy and its execution.

The Bank is under the management of a Board of Directors composed of a Governor, a Deputy Governor and twelve Directors. The Governor and Deputy Governor are

appointed for terms of seven years each by the Directors, with the approval of the Governor in Council. The Directors are appointed by the Minister of Finance, with the approval of the Governor in Council, for terms of three years each. The Deputy Minister of Finance is a member of the Board but does not have the right to vote. There is an Executive Committee of the Board composed of the Governor, the Deputy Governor, two Directors and the Deputy Minister of Finance (who is without a vote); this Committee has the same powers as the Board except that its decisions must be submitted to the Board at its next meeting. In addition to the Deputy Governor who is a member of the Board, there may be one or more Deputy Governors appointed by the Board of Directors to perform such duties as are assigned by the Board.

The head office of the Bank is in Ottawa. It has agencies in Halifax, Saint John, Montreal, Ottawa, Toronto, Winnipeg, Regina, Calgary and Vancouver and is represented in St. John's and Charlottetown.

The Industrial Development Bank.—The Industrial Development Bank, a subsidiary of the Bank of Canada, was incorporated by Act of Parliament during 1944 and its banking operations commenced on Nov. 1, 1944. Its functions are described in the preamble to the Act as follows:—

To promote the economic welfare of Canada by increasing the effectiveness of monetary action through ensuring the availability of credit to industrial enterprises which may reasonably be expected to prove successful if a high level of national income and employment is maintained, by supplementing the activities of other lenders and by providing capital assistance to industry with particular consideration to the financing problems of small enterprises.

The President of the Industrial Development Bank is the Governor of the Bank of Canada and the Directors are the Directors of the Bank of Canada and the Deputy Minister of Industry, Trade and Commerce. The authorized capital of the Bank is \$75,000,000 and it may also raise funds by the issue of bonds and debentures provided that its total direct liabilities and contingent liabilities in the form of guarantees and underwriting agreements do not exceed ten times the aggregate of the Bank's paid-up capital and Reserve Fund.

The Bank may extend financial assistance to industrial enterprises in Canada which, by definition in the Act, include any industry, trade or other business undertaking of any kind. With respect to such enterprises, the Bank is empowered to lend money or guarantee loans and where an enterprise is a corporation the Bank may also enter into underwriting agreements with regard to any issue of stock, bonds or debentures; acquire stock, bonds or debentures from the issuing corporation or any person with whom the Bank has entered into an underwriting agreement; and acquire certificates issued by a trustee to finance the purchase of transportation equipment. The total amount of commitments of the Bank, in the form of loans, guarantees, etc., in excess of \$200,000 each, may not exceed \$200,000,000.

The Bank may accept any form of collateral security against its advances, including realty and chattel mortgages which constitute the usual kind of security taken. The Bank is intended to supplement the activities of other lending agencies, not to compete with them, and the Act of incorporation provides that it should extend credit only when, in the Bank's opinion, credit or other financial resources would not otherwise be available on reasonable terms and conditions. Its lending takes the form of fixed-term capital loans rather than current operating loans. The Bank is specifically prohibited from engaging in the business of deposit banking. It has branch offices in the following cities: St. John's, Halifax, Saint John, Moncton, Rimouski, Quebec, Trois-Rivières, Montreal,

Sherbrooke, Ottawa, Toronto, Hamilton, Waterloo, London, Windsor, Sudbury, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Kelowna, Vancouver, Victoria and Prince George.

2.—Assets and Liabilities of the Industrial Development Bank, as at Sept. 30, 1966-70

¹ Includes investments; the change in loans outstanding does not equal the difference between disbursements and repayments because of year-end accounting adjustments.

² Includes agreements of sale.

Subsection 2.—Currency

Note Circulation.—The development by which bank notes became the chief circulating medium in Canada prior to 1935 is described in the 1938 Year Book, pp. 900-905. Those features of the development which then became permanent are outlined in the 1941 Year Book, pp. 809-810.

When the Bank of Canada commenced operations in 1935 it assumed liability for Dominion notes outstanding. These were replaced in public circulation and partly replaced in cash reserves by the Bank's legal tender notes in denominations of \$1, \$2, \$5, \$10, \$20, \$50 and \$100. Deposits of chartered banks at the Bank of Canada completed the replacement of the old Dominion notes of \$1,000 to \$50,000 denomination that had previously been used as cash reserves. The chartered banks were required under the Bank Act of 1934 to reduce gradually the issue of their own bank notes during the years 1935-45 to an amount not in excess of 25 p.c. of their paid-up capital on Mar. 11, 1935. Bank of Canada notes thus replaced chartered bank notes as the issue of the latter was reduced. Further restrictions introduced by the 1944 revision of the Bank Act cancelled the right of chartered banks to issue or re-issue notes after Jan. 1, 1945, and in January 1950 the chartered banks' liability for such of their notes issued for circulation in Canada as then remained outstanding was transferred to the Bank of Canada in return for payment of a like sum to the Bank of Canada.

3.—Bank of Canada Note Liabilities, as at Dec. 31, 1965-69

Coinage.*—Under an amendment to the Currency, Mint and Exchange Fund Act (RSC 1952, c. 315), assented to Mar. 7, 1968, gold coins may be issued in the denomination of twenty dollars (nine tenths fine or millesimal fineness 900); subsidiary coins in denominations of one dollar, 50 cents, 25 cents, 10 cents (five tenths fine or millesimal fineness 500, or pure nickel); pure nickel five-cent coins; and bronze (copper, tin and zinc) one-cent coins. Provision is made for the temporary alteration of composition in the event of a shortage of prescribed metals. A tender of payment of money in coins is a legal tender in the case of gold coins issued under the authority of Sect. 4 of the Currency, Mint and Exchange Fund Act for the payment of any amount; in the case of silver coins for the payment of an amount up to \$10; nickel coins for payment up to \$5; and bronze coins up to 25 cents.

* Revised by the Master of the Royal Canadian Mint, Ottawa.

5.—Canadian Coin in Circulation, as at Dec. 31, 1960-69

¹ Tombac, a copper-zinc alloy, was used to conserve nickel for war purposes; no coins of this metal have been issued since 1944.

The Royal Canadian Mint.—The Ottawa Mint, established as a branch of the Royal Mint under the (Imperial) Coinage Act of 1870, was opened on Jan. 2, 1908. On Dec. 1, 1931, it became the Royal Canadian Mint and operated as a branch of the Department of Finance. Under the provisions of the Government Organization Act, 1969, the Mint was established as a Crown (agency) corporation, reporting to Parliament through the Minister of Supply and Services. The latter change was designed to provide for a more industrial type of organization and for flexibility in producing coins of Canada and other countries; buying, selling, melting, assaying and refining gold and precious metals; and producing medals, plaques and other devices.

The Master of the Mint is its chief executive officer and one of a Board of seven Directors appointed by the Governor in Council. The Master of the Mint is appointed to hold office during pleasure, the Chairman of the Board is appointed for a term of four years subject to re-appointment, and the other five Directors for terms of one to three years.

Financial and budgeting arrangements are similar to those of other Crown companies carrying on industrial or commercial operations. Loans are made from the Consolidated Revenue Fund for operating and capital expenses, with the total outstanding at any time limited to \$35,000,000. Provision is made for loans for temporary purposes and a reserve is established against losses. Operations are conducted with the aim of making a small profit.

¹ Less total float, i.e., cheques and other items in transit.**Subsection 3.—The Chartered Banks**

Canada's commercial banking system consists of nine privately owned banks. Eight have been in operation for many years and one commenced operations in July 1968. At the end of December 1969, these banks operated 6,038 banking offices in Canada and 203 abroad. Canadian chartered banks engage in a very wide range of activities; they accept various types of deposits from the public including accounts payable on demand, both chequing and non-chequing, notice deposits and fixed-term deposits. The banks, in addition to holding a portfolio of securities, make loans under a wide variety of conditions for commercial, industrial, agricultural and consumer purposes. They also deal in foreign exchange, receive and pay out bank notes, provide safekeeping facilities and perform a variety of other services. For the most part, these operations are carried out in Canada by the extensive network of bank branches. The head offices of the banks confine their activities largely to general administration and policy-making functions, the management of the banks' investment portfolio and related matters. A detailed account of the branch banking system in Canada is given in the 1967 Year Book, pp. 1126-1128.

All banks operating in Canada are chartered (i.e., licensed) by Parliament under the terms of the Bank Act. The Act regulates certain internal aspects of bank operations such as the auditing of accounts, the issuing of stock, the setting aside of reserves and similar matters. In addition, the Bank Act regulates the banks' relationship with the public, the Government and the Bank of Canada.

It has been the practice in Canada to revise the Bank Act at approximately ten-year intervals. The most recent revision was enacted by Parliament early in 1967 and came into effect on May 1 of that year. The remainder of this Subsection deals with the principal changes incorporated in the new Bank Act.

Acceptance by the Government of some of the main recommendations of the Royal Commission on Banking and Finance for increased competition and flexibility in the Canadian banking system was reflected in various new Bank Act provisions. These imposed certain restrictions on corporate and other relationships between banks and other financial institutions, while removing certain existing restrictions on the banks' operations which had placed them at some competitive disadvantage in recent years compared with their principal financial competitors.

In the past, various forms of intercorporate financial relationship between chartered banks and other financial enterprises had developed in Canada. In some instances this involved investment by banks in the shares of these enterprises, and vice versa; in others the relationship involved interlocking directorships. These practices are severely restricted under the terms of the new Bank Act, which limits bank ownership of any Canadian corporation to 10 p.c. of the voting shares and also provides that no more than one fifth of the directors of any company may become directors of a bank. In addition, after a two-year period a director of a trust or mortgage loan company which accepts deposits from the public may not be appointed or elected a director of a bank. In order to ensure that competition is not curtailed by agreements among the banks on interest rates to be paid on deposits or charged for loans, the new Bank Act prohibits the making of such agreements (except with the consent of the Minister of Finance). At the same time the provision that was formerly in the Bank Act limiting to 6 p.c. the interest rate which chartered banks could charge on loans, was abolished effective Jan. 1, 1968. Under the new Bank Act, the determination of interest rates on loans and deposits is left to market forces.

The new Bank Act also granted the banks new mortgage-lending powers. Banks may now charge current rates of interest on mortgage loans under the National Housing Act, and they may also make conventional residential mortgage loans for the first time. In the case of conventional residential mortgages, the amount of an individual mortgage cannot exceed 75 p.c. of the appraised value of the property. After 1973 the maximum amount of a bank's assets to be held in the form of conventional residential mortgages must not be more than 10 p.c. of the bank's Canadian dollar deposit liabilities plus debentures. In the interval, the percentage limitation will rise by 1 p.c. each fiscal year; it was 4 p.c. until Oct. 31, 1968 when it rose to 5 p.c. for the subsequent fiscal year and will so continue until the 10-p.c. maximum is reached.

The banks have also been given authority to issue their own debentures with an original term to maturity of at least five years; such securities are not subject to a reserve requirement and rank in priority after deposit liabilities. The amount of debentures that any bank may have outstanding is limited by restricting the increase per annum to 10 p.c. of the paid-up capital and rest fund and an upper limit of one half of the bank's paid-up capital and rest fund.

The amendments to the Bank Act in 1967 contained a number of revisions respecting the ownership of Canadian chartered banks. No individual or associated shareholders may vote more than 10 p.c. of a bank's total shares outstanding and, if more than 25 p.c. of a bank's shares are owned by non-residents, the total outstanding liabilities of the bank may not exceed twenty times its authorized capital stock.

The Bank Act also stipulates the minimum statutory cash reserve requirement that the chartered banks must observe. The minimum amount of Bank of Canada notes and deposits each bank must hold as cash reserves was changed in a series of monthly steps from 8 p.c. of all Canadian dollar deposits under the old Bank Act to 12 p.c. of demand deposits and 4 p.c. of other deposits as of February 1968. In addition, the Bank of Canada has been given stand-by powers to require the banks to hold a "secondary reserve" which would consist of cash in excess of their statutory requirements, holdings of treasury bills and day-to-day loans to investment dealers. When initially introduced, this secondary reserve cannot exceed 6 p.c. of a bank's deposit liabilities. Thereafter it may be increased in monthly steps of 1 p.c. to a maximum of 12 p.c. The Bank of Canada may reduce or remove such a secondary reserve at any time. Effective April 1968, the required level was 7 p.c. and, effective June 1969, it was increased to 8 p.c.

Branches of Chartered Banks.—Although there are fewer chartered banks now than at the beginning of the century, there has been a great increase in the number of branch banking offices. As a result of amalgamations, the number of banks declined from 34 in 1901 to 10 in 1931, and remained at that figure until the incorporation of a new bank—The Mercantile Bank of Canada—in 1953 brought the total to 11. Since then the amalgamation in 1955 of the Bank of Toronto and the Dominion Bank as The Toronto-

Dominion Bank, the amalgamation of Barclays Bank (Canada) with the Imperial Bank of Canada in 1956 and the amalgamation of the Canadian Bank of Commerce and the Imperial Bank of Canada as the Canadian Imperial Bank of Commerce on June 1, 1961 reduced this number to eight. The Bank of British Columbia was granted a charter by Parliament in December 1966 and commenced operations in July 1968, increasing the number of chartered banks to nine. The number of branches of chartered banks in each province periodically from 1920 to 1969 is given in Table 8.

8.—Branches of Chartered Banks, by Province, as at Dec. 31 for Certain Years 1920-69

NOTE.—Figures include sub-agencies in Canada receiving deposits for the banks employing them; there were 620 such sub-agencies at Dec. 31, 1969.

12.—Canadian Cash Reserves, 1960-69

NOTE.—Bank of Canada deposits are averages of the juridical days in the month shown; Bank of Canada notes and Canadian dollar deposits are averages of the four consecutive Wednesdays ending with the second last Wednesday in the previous month. Until June 1967 the required cash reserve ratio was 8 p.c. on both demand and notice deposits. For the next eight months the required minimum monthly average on demand deposits was increased by $\frac{1}{2}$ of 1 p.c. per month and that on notice deposits was decreased by $\frac{1}{2}$ of 1 p.c. Since February 1968 the required ratios have been 12 p.c. for demand deposits and 4 p.c. for notice deposits as prescribed under the Bank Act.

(Millions of dollars)

¹ Excluding realized profits and losses on securities held in investment account which are included in the item "Loss experience not included in other operating expenses".

² Includes provision for losses based on five-year average loss experience which in 1969 amounted to \$29,600,000 or 0.136 p.c. of related loans, and also includes taxes other than income taxes.

³ Before provision for income taxes and appropriations for losses other than those included in "Other operating expenses".

⁴ General and tax-paid appropriations for losses: net after any transfers out of accumulated appropriations for losses to undivided profits or rest account.

Cheque Payments.—Historical data on a monthly basis are available from 1924 on the amount of cheques charged to customer accounts in 35 major clearing house centres. The value of payments rose steadily throughout the country from 1924 to 1929. From 1929 to 1932 the value declined sharply and thereafter fluctuated within rather narrow limits until the outbreak of the Second World War. Since 1939 the total value of cheques cashed in these centres has increased steadily. The value of cheques cashed in 35 clearing centres during 1969 reached a high of \$714,993,156,000, an increase of 15.6 p.c. above the value of \$618,313,206,000 for 1968. All five economic regions showed an increase, with British Columbia recording a gain of 21.9 p.c., Ontario 21.5 p.c., the Atlantic Provinces 21.0 p.c., the Prairie Provinces 9.5 p.c. and Quebec 7.4 p.c. Payments in the two leading centres also reached all-time highs, Toronto advancing 23.1 p.c. and Montreal 7.6 p.c. over the previous year.

Subsection 4.—Other Banking Institutions

In addition to the savings departments of the chartered banks and of trust and loan companies, there are provincial government savings banking institutions in Ontario and Alberta, as well as two important savings banks in the Province of Quebec—the Montreal City and District Savings Bank and La Banque d'Économie de Québec—established under federal legislation and reporting monthly to the Department of Finance. Co-operative credit unions also encourage savings among low-income classes and extend small loans to their members.

Province of Ontario Savings Office.—The establishment of the Province of Ontario Savings Office was authorized by the Ontario Legislature at the 1921 Session and the first branches were opened in March 1922. Interest at the rate of 6 p.c. per annum (as of Nov. 1, 1970), compounded half-yearly, is paid on accounts and deposits are repayable on demand. Total deposits as of Mar. 31, 1970 were \$109,000,000 and the number of depositors was approximately 68,000; 21 branches are in operation throughout the province.

Province of Alberta Treasury Branches.—Savings deposits are accepted at 70 Treasury Branches throughout the province and the total of such deposits at Mar. 31, 1970 was \$152,071,924. Of that amount, \$43,769,964 was payable on demand, on which cash orders can be drawn and on which interest is paid at the rate of 4 p.c. per annum; \$24,669,810 was in Super Savings, bearing interest at the rate of 6 p.c. per annum; and \$83,632,150 was in Term Deposits, for terms ranging from 30 days to five years and bearing interest at rates comparable with those paid on the open market.

Province of Quebec Savings Banks.—The Montreal City and District Savings Bank, founded in 1846 and operating under a federal charter since 1871, had, at Oct. 31, 1970, a paid-up capital and reserve of \$20,500,000, savings deposits of \$527,979,571, and total liabilities of \$559,574,169. Assets of a like amount included \$159,846,003 of federal, provincial, municipal and other securities.

La Banque d'Économie de Québec, founded in 1848 (as La Caisse d'Économie de Notre-Dame de Québec) under the auspices of the St. Vincent de Paul Society, incorporated by Act of the Canadian Legislature in 1855 and given a federal charter by SC 1871, c. 7, became part of the Provincial Bank of Canada on Aug. 3, 1970. At the time of the merger,

savings deposits amounted to \$60,920,791, paid-up capital and reserve combined totalled \$3,500,000 and assets and liabilities each amounted to \$67,593,212.

Credit Unions.—The first credit union in Canada was founded in Lévis, Que., in 1900, its purposes being to promote thrift by encouraging saving and to provide loans to members who could not get credit elsewhere or could get it only at high interest rates. For many years growth was slow; in 1911, when the first figures were available, assets amounted to \$2,000,000 and by 1940 they were only \$20,000,000. However, since that time there has been a spectacular increase. Assets of the Quebec credit unions amounted to over \$1,000,000,000 at the end of 1964 and to over \$2,200,000,000 at the end of 1969. In other provinces, credit unions have not attained the same importance as they have in Quebec; the first credit union legislation was passed in Nova Scotia in 1932 followed by legislation in Manitoba and Saskatchewan in 1937 and in Ontario and British Columbia in 1938.

Credit unions are under provincial legislation. Almost all local offices in each province belong to central credit unions operating within the province either directly or through regional unions. There is a considerable difference between Quebec and the other provinces in the asset-holding of credit unions; Quebec unions have a large proportion of their investments in the form of mortgages and government bonds while unions in the other provinces have a greater percentage in loans. Credit unions probably play their most important role in smaller communities where they may function to a large extent as local banks. The number of chartered credit unions in Canada at the end of 1969 was 4,769, of which 4,485 reported a total membership of 5,003,000 and assets of \$4,064,065,000. Quebec, with 2,756,887 members and assets of \$2,202,680,000, accounted for 55 p.c. of both total membership and total assets of all credit unions in Canada. Credit unions classified by bond of association on a percentage basis were: occupational 28, residential 59 and associational 13.

Canadian credit unions in the 1960-69 decade have continued the steady growth generally in evidence since credit unions were first organized in Quebec in the early part of the present century. Loans granted by credit unions increased by 3 p.c. in 1969 to reach \$1,525,655,000, being a 217-p.c. increase over the corresponding figure of \$481,192,000 in 1960. Assets at \$4,064,065,000 increased by 209 p.c. and savings at \$3,657,500,000 increased by 206 p.c. in the same comparison. Membership of 5,003,000 represented 24 p.c. of the total population, compared with 2,544,000 and 14 p.c., respectively, in 1960.

There were 20 central credit unions in 1969; these unions act as credit unions for the credit unions, mainly by accepting deposits of surplus funds from them and providing a source of funds for them to borrow when they cannot meet the demand for local loans. Most of the centrals also admit co-operatives as members. Total assets of the centrals increased by 8 p.c. to \$562,399,000 and loans to members increased 19 p.c. to \$437,000,000 over the previous year. The Canadian Co-operative Credit Society serves as a central credit union for the provincial centrals and large co-operatives all across Canada.

Section 2.—Other Commercial Finance

Subsection 1.—Trust and Mortgage Loan Companies

Trust and mortgage loan companies are registered with either the federal or provincial governments. They operate under the Loan and Trust Companies Acts (RSC 1952, c. 170 as amended in 1953, 1958, 1961 and 1964-65, and RSC 1952, c. 272 as amended in 1953, 1958, 1961 and 1964-65, respectively) or under corresponding provincial legislation.

The first mortgage loan companies were established in Ontario in the 1840s as co-operative associations to provide mortgage finance for their members. These associations evolved under legislation which was amended to give them permanent corporate status as mortgage-lending institutions. They obtained their funds principally by selling medium- and long-term debentures to the public but also had the power to open deposit accounts. Trust companies were first incorporated in Ontario in the 1880s. Although the trust company legislation prevented them from borrowing funds, they had the power to accept funds in guaranteed trust accounts and invest them in specified types of assets. This feature of trust company legislation is now general throughout Canada. The trust companies operate as financial intermediaries in the same way as mortgage loan companies, chartered banks or savings and other financial institutions and are the only corporations in Canada with power to act as trustees for property interests and to conduct other fiduciary business. In this capacity they act as executors, trustees and administrators under wills or by appointment, as trustees under marriage or other settlements, as agents in the management of estates of the living, as guardians of minor or incapable persons, as financial agents for municipalities and companies, as transfer agents and registrars for stock and bond issues, as trustees for bond issues and, where so appointed, as authorized trustees in bankruptcies.

Trust and mortgage loan companies were established and grew rapidly under provincial legislation in the late nineteenth and early twentieth centuries. Some companies were chartered by special Acts of Parliament but it was not until 1914 that federal legislation was passed and the Federal Government began to regulate trust and loan companies registered under its Acts. In 1967 there were nine federal trust companies and 12 federal loan companies. The Superintendent of Insurance examines these companies and also, by arrangement with the provinces, trust and loan companies incorporated in Nova Scotia and trust companies incorporated in New Brunswick and Manitoba. Companies must be licensed by each province in which they wish to operate.

Although there are many differences among the various federal and provincial Acts, the broad lines of the legislation are common. In their intermediary business the companies have the powers mentioned above to borrow or, in the case of trust companies, accept funds in guaranteed accounts subject to maximum permitted ratios of these funds to shareholders' equity. The funds may be invested in specified assets which include first mortgages on real property, government securities and the bonds and equity of corporations having established earnings records, and the companies may grant loans on the security of such bonds and stocks. Trust and loan companies are not required to hold specified cash reserves, as are the chartered and savings banks, but there are broadly defined "liquid asset" requirements in a number of the Acts.

The trust and mortgage loan companies have been substantial members of the Canadian financial system since their early years. In the 1920s they held about one half of the private mortgage business in Canada but their growth rate fell off sharply because of the impact of the depression of the 1930s and World War II on the mortgage business. In the years since the War the re-emergence of strong demands for mortgage financing and the willingness of many trust and loan companies to compete aggressively for funds have led to sustained rapid expansion.

According to DBS figures, mortgage loan companies had assets before investment in subsidiaries of \$3,007,136,000 at the end of 1969 compared with \$2,762,364,000 a year earlier. Their holdings of mortgages amounted to \$2,507,943,000, or 83 p.c. of total assets. To finance their investments, these companies had borrowed \$2,141,384,000 or 71 p.c. of their total funds by the sale of debentures and \$440,571,000 from demand deposits.

At the end of 1969, company and guaranteed funds of trust companies in the DBS survey were \$5,770,682,000 compared with \$4,971,582,000 a year earlier, an increase of 16 p.c. Trust companies, while not specializing in mortgage financing to the same extent as loan companies, in recent years have been putting a high proportion of their funds into these investments with the result that mortgages were 57 p.c. of their assets at the end of 1969 compared with 48 p.c. six years earlier. The trust companies had \$3,849,754,000

term deposits outstanding and \$1,338,975,000 demand deposits in December 1969, accounting for 90 p.c. of total funds. About one third of the demand or savings deposits were in chequable accounts. There is considerable variety among the trust companies and a few have developed a substantial short-term business, raising funds by issuing certificates for terms as short as 30 days and also operating as lenders in the money market. Nevertheless, it remains true that the main business of the trust companies in their intermediary role is to channel savings into mortgages and other long-term investments. In addition, trust companies, as of Dec. 31, 1968, had \$18,796,962,000 under administration in estate, trust and agency accounts.

More complete and up-to-date financial information may be found in quarterly balance sheet statements published by the DBS and the Bank of Canada, the reports of the Superintendent of Insurance on Loan and Trust Companies and the reports of provincial supervisory authorities.

Subsection 2.—Licensed Small Loans Companies and Licensed Money-Lenders*

Small loans companies and money-lenders are subject to the Small Loans Act (RSC 1952, c. 251, as amended by SC 1956, c. 46). This Act, first passed in 1939, sets maximum charges on personal cash loans not in excess of \$1,500 and is administered by the Department of Insurance. Lenders not licensed under the Act may not charge more than 1 p.c. per month. Those wishing to make small loans at higher rates must be licensed each year by the Minister of Finance under the Small Loans Act. The Act allows maximum rates, including charges of every kind, of 2 p.c. per month on unpaid balances not exceeding \$300, 1 p.c. per month on the portion of unpaid balances exceeding \$300 but not exceeding \$1,000 and one half of 1 p.c. on any remainder of the balance exceeding \$1,000. Loans in excess of \$1,500 are not regulated and lenders operating entirely above this limit and the larger loans of licensed lenders are thus exempt from the Act. Nor does the Act regulate charges for the instalment financing of sales. Prior to Jan. 1, 1957, the Act applied only to loans of \$500 or less and the maximum rate was 2 p.c. per month.

At the end of 1969, there were five small loans companies and 52 money-lenders licensed under the Act. Small loans companies are incorporated by special Acts of the Parliament of Canada, the first of them commencing business in 1928; the money-lenders include provincially incorporated companies and one partnership. Many of the small loans companies and money-lenders are affiliated with other financial institutions, principally Canadian sales finance companies and United States finance or loan companies, and these subsidiary companies account for a high proportion of the total business of licensed lenders. The affiliations with sales finance companies reflect the close relationship between instalment financing and the consumer loan business. The Dominion Bureau of Statistics publishes quarterly balance sheets for sales finance and consumer loan companies as a whole and does not attempt to distinguish the two groups within the industry.†

The subsidiary small loans companies and money-lenders obtain most of their funds through their parent companies. A few of the larger companies have supplemented their bank loans by selling short-term paper in the market but the amount has been small compared with the short-term market borrowing of the sales finance companies. The smaller independent companies rely mainly on their shareholders and on borrowing from the chartered banks.

The annual figures of assets and liabilities given in Table 24 for 1966-69 are from the Department of Insurance report.‡

* Prepared by the Superintendent of Insurance for Canada.

† See *Financial Institutions* (Catalogue No. 61-006). More complete data on the business of licensed lenders are given in the *Report of the Superintendent of Insurance for Canada on Small Loans Companies and Money-Lenders* for the year ended Dec. 31, 1969 (Catalogue No. In 3-4/1969).

Other.....	66,802,483	79,740,140	93,095,263	173,198,250

There was little change in 1969 compared with 1968 in the amount of small loans business done by the combined companies. Small loans made to the public during the year numbered 1,351,092 as against 1,455,816 in 1968, a drop of about 7.2 p.c.; the amount of such loans decreased from \$878,186,607 to \$823,277,807, a drop of about 6.3 p.c. The average small loan made was \$609 in 1969 and \$603 in 1968. At the end of the year, small loans outstanding numbered 1,155,108 for an amount of \$595,658,632, or an average of \$516 per loan; comparable figures for 1968 were 1,203,993, \$619,217,638 and \$514, respectively.

Gross profits of small loans companies and money-lenders before income taxes and before taking into account any increase or decrease in reserves for bad debts increased from \$35,580,033 in 1968 (\$11,110,435 being the profit on small loans and \$24,469,598 the profit on business other than small loans) to \$51,348,419 in 1969 (\$8,427,200 being the profit on small loans and \$42,921,219 the profit on other business).

In comparing balances of large loans and other contracts, and gross profits on business other than small loans for the years 1968 and 1969, it should be noted that one lender acquired the business of an associate company on Jan. 1, 1969, which contributed significantly to the totals for these items in that year.

Subsection 3.—Foreign Exchange

The dollar, established officially as the currency of the united provinces of Canada on Jan. 1, 1858, and extended to cover the New Dominion by the Uniform Currency Act of 1870, was defined as 15/73 of the British gold sovereign.* That is, the par rate of exchange between the dollar and the pound sterling was fixed at \$4.866, making the Canadian currency the equivalent of the United States dollar at parity. With minor variations between the import and export gold points representing the cost of shipping gold in either direction, the value of the pound sterling in Canada remained at this level until the outbreak of World War I. The United States dollar, on the other hand, was at a discount in terms of Canadian funds for the first eleven years after Confederation since it was not redeemable in gold from February 1862 to January 1879. On the basis of gold equivalents it would appear that the greatest monthly average discount on the United States dollar after Confederation was approximately 31 p.c., reached in August 1868. From 1879 to 1914 the dollars of the two countries remained at par, varying only within the gold points or under \$2 per thousand.

On the outbreak of World War I, Canada and Britain suspended the gold standard. For some weeks both the pound and the Canadian dollar rose to a premium in New York. Subsequently both fell back with the pound going to a slight discount. In January 1916 the pound was officially pegged at \$4.76 in American funds. This level was maintained with the help of funds realized by sales of United States securities owned by residents of Britain, by borrowing in the United States and, after the American entry into the War, by the United States Government financing Allied purchases in that country.

From 1915 to the end of 1917, fluctuations in the rate of exchange between the Canadian and United States dollars did not exceed 2 p.c. on either side of parity; the pound was stable in terms of United States dollars during this period. In 1918 the Canadian dollar began to weaken. After the pound was unpegged in 1919, the Canadian dollar declined further and in 1920 it fell to 82 cents in New York with sterling going as low as \$3.18.

By the latter half of 1922 the Canadian dollar had returned practically to par in New York. Despite some further weakness in sterling, the dollar remained close to that level during the next two years, averaging 98.04 and 98.73 cents in terms of the United States dollar in 1923 and 1924, respectively, and fluctuating between a discount of about

* The gold sovereign remained the standard for the Canadian dollar until 1910 when the currency was defined in terms of fine gold, making it the exact gold equivalent of the United States dollar. Both British and United States gold coins were, however, legal tender in Canada for this whole period.

3.6 cents and a premium of approximately 0.4 cents. After Britain resumed gold payments in April 1925, the range of fluctuation of the Canadian dollar narrowed further. From Canada's return to the gold standard in the period July 1, 1926 to January 1929, the exchange rate remained within the gold points. The Canadian dollar then went to a slight discount in New York. With the exception of the period July to November 1930, when it went to a small premium in New York, the dollar remained below parity until Britain abandoned the gold standard in September 1931. After that month the pound sterling depreciated sharply and the Canadian dollar followed, reaching lows* in New York of 80.5 cents in December 1931 and 82.6 cents in April 1933.

Following the prohibition of gold exports in the latter month by the United States, the pound and the Canadian dollar strengthened rapidly in terms of American funds. By November 1933 both currencies had reached a premium in New York. Meanwhile, in a series of steps beginning with permitting the export of newly mined gold in August 1933, the United States moved toward resumption of the gold standard. As of Feb. 1, 1934, the United States Treasury undertook to buy all gold offered at \$35 per ounce. After that the exchange rate between the Canadian and United States dollars stabilized. Until the outbreak of war in 1939 much of the trading was conducted within one cent of parity although the Canadian dollar in New York did go as high as 103.6 cents (September 1934) and as low as 98.0 cents (September 1938).*

On the outbreak of World War II in September 1939, Britain and other sterling countries introduced foreign exchange control involving fixed buying and selling rates of \$4.02½ and \$4.03½, respectively, in terms of the United States dollar. The Canadian dollar in New York declined until Sept. 16, 1939, when the Government instituted foreign exchange control† in Canada and established fixed buying and selling rates of \$1.10 to \$1.11 for the U.S. dollar and \$4.43 to \$4.47 for sterling. As compared with previous months, the depreciation of the Canadian dollar in terms of United States funds was approximately half as great as that of the pound sterling.

Apart from a minor adjustment on Oct. 15, 1945, when selling rates for U.S. dollars and sterling were lowered to \$1.10½ and \$4.45, respectively, the official rates for the Canadian dollar remained unchanged until July 5, 1946. At that time the rate on the U.S. dollar was restored to par, with buying and selling rates for that currency of \$1.00 to \$1.00½ and for sterling \$4.02 to \$4.04. These rates continued in effect until Sept. 19, 1949 when, following a 30.5-p.c. reduction by Britain in the value of sterling to \$2.80 U.S. (an action which was paralleled in varying degrees by numerous other currencies), Canada returned to the former official rates of \$1.10 and \$1.10½ for United States funds. Sterling was quoted at \$3.07½ and \$3.08½ on the basis of the New York cross rate.

On Sept. 30, 1950, the Minister of Finance announced that official fixed foreign exchange rates which had been in effect at varying levels since 1939 would be withdrawn effective Oct. 2, and that the rate would henceforth be determined in the market for foreign exchange. This policy was carried out within the framework of exchange control until Dec. 14, 1951, at which time the Foreign Exchange Control regulations were revoked by the Governor in Council, terminating the period of exchange control that had prevailed in Canada since 1939. The Foreign Exchange Control Act was repealed in 1952. On May 2, 1962, the Minister of Finance announced that the Canadian dollar was being stabilized at a fixed par value of 92½ cents in terms of United States currency. This action was taken with the concurrence of the International Monetary Fund and, in accordance with the Articles of Agreement of that organization, the Government of Canada undertook to maintain the Canadian exchange rate within a margin of 1 p.c. on either side of the established par value.

* Noon quotations. Daily highs and lows may have exceeded these rates.

† The operations of the Foreign Exchange Control Board from the time of its establishment to the termination of exchange control in December 1951 are reviewed in the 1941 to 1952-53 editions of the Year Book.

On May 31, 1970, the Government of Canada announced a decision not to maintain the exchange rate of the Canadian dollar within the 1-p.c. parity band prescribed by the IMF for the time being. The movements of the U.S. dollar in Canadian funds from January 1961 to December 1970 are shown in Table 25.

¹ Convertible foreign currency holdings of the Exchange Fund Account, the Receiver General for Canada and the Bank of Canada. ² Valued at official parity rates in terms of U.S. dollars. ³ A positive figure indicates a net commitment to take delivery of foreign exchange in the future and a negative figure indicates a commitment to deliver foreign exchange in the future.

⁴ Insofar as forward transactions between the Exchange Fund Account and the Bank of Canada are matched by spot transactions, they do not have any effect on total official holdings of gold and U.S. dollars. ⁵ Includes overnight suspense transactions with the Bank of Canada and others, as well as the net forward position with the market. The transactions of the Exchange Fund Account with the market are carried out by the Bank of Canada.

Subsection 4.—The Bond Market*

Sales of Canadian Bonds.—A net total of \$3,774,000,000 was raised in the bond market by Canadian government and corporate borrowers in 1969. This amount was about \$925,000,000 less than that raised in 1968, and was more than accounted for by the declines of \$1,200,000,000 in net new issues of the Government of Canada, the major bond borrower historically.

As a result of rising consumer prices, fiscal and monetary policy became restrictive and the rate of real growth of the economy slackened. The curtailment of expenditure growth relative to increases in revenue, improved the net position of the senior levels of government substantially. The debt operations of the Government of Canada consisted mostly of the refunding of maturing issues in the domestic market.

The \$2,101,000,000 of net new issues of provincial governments included \$805,000,000 purchased by the Canada Pension Plan Investment Fund and about \$165,000,000 through the Quebec Pension Plan. Part of the Canada Pension Plan proceeds were channelled to local governments. In addition, local government securities amounting to \$285,000,000 were sold to provinces and their financing agencies. This is not included in the total of bonds outstanding shown in Table 27. Net new market issues of municipal government bonds amounted to \$278,000,000. Corporations resorted to bond financing to the extent of \$969,000,000 in 1969, and institutions had net new issues in 1969 of \$80,000,000.

Bond-yield averages increased considerably in 1969. Government of Canada securities for terms of ten years and over yielded 8.33 p.c. at the end of Dec. 31 compared to 7.30 p.c. a year earlier. Comparable figures for 10 provincials were 9.19 p.c. and 7.92 p.c., and for 10 municipals, 9.29 p.c. compared to 8.18 p.c.

There was an increase of \$229,000,000 in finance and loan company paper, and of \$245,000,000 in other short-term paper in 1969. Yields on 90-day finance company paper increased to 9.17 p.c. at year-end compared to 6.65 p.c. a year earlier. Bank loans to business increased during the year as did net issues of preferred and common stock, especially the latter which rose by 50 p.c.

Bonds Outstanding.—Total government and business bonds outstanding at the end of 1969 amounted to \$64,974,000,000, an increase of 6 p.c. over 1968 and of 40 p.c. since 1964. In the 1964-69 period, the largest increase was one of 76 p.c. in the bonded debt of provincial governments. This increase includes issues held in the Canada Pension Plan Investment Fund and the Quebec Deposit and Investment Fund since the inception of the plans in 1966. Corporate bonds outstanding increased by 57 p.c. and municipal government bonds by 30 p.c. between 1964 and 1969.

* A study of developments in Canadian bond markets dealing with behavioural aspects, 1962-69, was published in *DBS Financial Flows Accounts, System of National Accounts, Fourth Quarter, 1969* (Catalogue No. 13-002).

27.—Canadian Bonds Outstanding as at Dec. 31, 1964-69, and Annual Changes in Bonds and in Short-Term Paper Outstanding

NOTE.—Federal, provincial and municipal bonds include direct and guaranteed issues; institutional bonds exclude bonds payable in Canadian dollars of the International Bank for Reconstruction and Development and certain foreign governments, amounting to \$65,000,000, \$84,000,000, \$102,000,000, \$119,000,000, \$133,000,000 and \$116,000,000 in the years 1964-69, respectively. ¹ Changes in bonds outstanding do not agree with Bank of Canada figures on net new issues due to takeovers, bankruptcies, etc.

Distribution of Bond Holdings.—Table 28 shows the estimated distribution as at Dec. 31, 1969 of government and corporate bonds among the major purchasers of securities. Governments and the financial institutions specified in the table held one half of the total; of the remainder, non-residents held 22 p.c. and all other residents held 28 p.c. Of the 28 p.c., however, 10 p.c. was made up of holdings by persons of Canada Savings Bonds. The largest identified holders of bonds were chartered banks with 10 p.c. of the total, life insurance companies with 8 p.c. and trustee pension plans with 8 p.c.

28.—Estimated Distribution of Bond Holdings, as at Dec. 31, 1969

NOTE.—Federal, provincial and municipal bonds include direct and guaranteed issues; "other" bonds include bonds of religious and other institutions; and a small amount of foreign bonds payable in Canadian dollars; short-term commercial borrowing is excluded. SOURCE: *Bank of Canada Statistical Summary 1970*, pp. 530, 959 and 960.

¹ Held by the Canada Pension Plan Investment Fund.

² Includes Canada Savings Bonds of \$6,683,000,000. Corporations and other businesses, churches, charities and other associations were made eligible to purchase Canada Savings Bonds for the first time with the 1967-68 series. For the 1969-70 series, Canada Savings Bonds could not be registered in the name of a corporation or other business.

PART II.—INSURANCE***Section 1.—Life Insurance**

Life insurance in force in Canada with companies registered by the Federal Government (exclusive of fraternal benefit societies) amounted to \$102,785,000,000 at the end of 1969, an increase of \$9,572,000,000 during the year. The ratio of gain in business in force, expressed as a percentage of the amount in force at the beginning of the same year, was 10.3 p.c. in 1969.

Subsection 1.—Summary of Life Insurance in Canada

Table 1 summarizes insurance premiums, claims, amounts of new policies effected and amounts of insurance in force on Dec. 31, 1968 and 1969. These data are presented according to supervising government authorities for the companies and societies concerned, and according to nationality of company or society.

* Material in this Part, except as otherwise indicated, was prepared under the direction of the Superintendent of Insurance for Canada, Ottawa. More detailed data are available in the annual reports of the Department of Insurance.

Subsection 2.—Operational Statistics for Life Insurance Transacted in Canada by Companies under Federal Registration

The amount of life insurance in force in Canada has shown an almost continuous advance year by year since the beginning of the record in 1869. The amount per capita of the estimated population has more than doubled since 1955.

The operations analysed in the tables of this Subsection, with the exception of Table 6, include only those of companies under federal registration and are exclusive of fraternal organizations and provincial licensees. However, companies under federal registration account for over 93 p.c. of the life insurance in force in Canada.

2.—Life Insurance Effectuated and in Force in Canada by Companies under Federal Registration, Decennially 1880-1960 and Annually 1961-69

NOTE.—Figures for 1869-1900 are given in the 1938 Year Book, p. 958; for 1901-39 in the 1942 edition, p. 855; for 1940-54 in the 1957-58 edition, p. 1168; and for 1955-59 in the 1967 edition, p. 1147. Statistics of fraternal society insurance, excluded here, are given at pp. 1257-1258.

Subsection 3.—Finances of Companies Transacting Life Insurance under Federal Registration

The financial statistics in Tables 7 and 8 relate only to life insurance transacted by companies under federal registration. The figures for British and foreign companies apply to their assets, liabilities and operations in Canada only. On the other hand, the assets and liabilities, revenue and expenditure of Canadian companies are given for total business, including business arising outside of Canada as well as in Canada.

7.—Total Assets and Liabilities for Life Insurance of Canadian Companies under Federal Registration and Assets and Liabilities in Canada for Life Insurance of British and Foreign Companies under Federal Registration, 1967-69.

¹ Includes amounts written off shares purchased under mutualization plan.

Subsection 4.—Life Insurance in Canada Transacted by Fraternal Benefit Societies

In addition to life insurance, some fraternal benefit societies grant other insurance benefits to members, notably sickness benefits, but these are relatively unimportant. Table 9 gives statistics of life insurance in Canada transacted by fraternal benefit societies and Table 10 shows statistics of assets, liabilities, income and expenditure relating to all business of Canadian societies and to the business in Canada of foreign societies. The rates charged by these societies are computed to be sufficient to provide the benefits granted, having regard for actuarial principles. The benefit funds of each society must be valued annually by a qualified actuary (Fellow, by examination, of the Institute of Actuaries of Great Britain, of the Faculty of Actuaries in Scotland, or of the Society of Actuaries) and a readjustment of rates or benefits must be made, unless the actuary certifies to the solvency of each fund. The first sections of Tables 9 and 10 relate to the Canadian societies registered by the federal Department of Insurance; there were 14 such societies at the end of 1969.

Under an amendment to the Insurance Act, effective Jan. 1, 1920, all foreign fraternal benefit societies were required to obtain authority from the Federal Government prior to transacting business in Canada. However, any such societies which at that date were transacting business under provincial licences, although forbidden to accept new members, were permitted to continue all necessary transactions in respect of insurance already in force. Most of these societies and some foreign societies that had not been licensed previously by the provinces have since obtained federal authority to transact business. At the end of 1969 there were 32 foreign fraternal benefit societies federally registered to transact business in Canada, although two of these do not grant life insurance benefits.

¹ All funds, business in and out of Canada.² All funds, business in Canada only.³ Data differ from Report of the Superintendent of Insurance for Canada, 1967 (Vol. I) because of revisions made after this Report went to press.

Subsection 5.—Life Insurance Effectuated and in Force Outside Canada by Canadian Companies under Federal Registration

In this Subsection, there are given for the years 1968 and 1969 summary statistics of insurance effectuated and insurance in force at the end of the year in currencies other than Canadian dollars, as written by Canadian companies under federal registration. The data given are in terms of Canadian dollars, the conversions from the various foreign currencies having been made at the book rates of exchange used by the various companies.

Canadian life insurance companies operating under federal registration at Dec. 31, 1969 had life insurance in force amounting to \$29,239,513,014 in countries outside Canada. Insurance in force in currencies other than Canadian dollars amounted to \$29,112,595,945; the difference between these figures is presumably the net amount of business in countries outside Canada transacted in Canadian currency. The business in force in Canada of Canadian companies registered by the Federal Government amounted to \$70,760,763,191 at Dec. 31, 1969, and the total business on the books of these companies, in and out of Canada, amounted to \$100,000,276,205. Thus, over 29 p.c. of the total business in force for Canadian companies registered by the Federal Government was in force in countries outside Canada. In connection with their business outside Canada, the Canadian life insurance companies registered by the Federal Government held, at the end of 1969, Commonwealth and foreign investments in the amount of \$4,596,137,561.

Approximately 74 p.c. of all business in force in currencies other than Canadian is in United States currency and 15 p.c. is in sterling. From a slightly different point of view, approximately 20 p.c. of this business in force is in currencies of Commonwealth countries other than Canada, and 80 p.c. in currencies of foreign countries.

Section 2.—Fire and Casualty Insurance

At the end of 1969 there were 240 companies registered by the Federal Government to transact fire insurance in Canada (82 Canadian, 51 British and 107 foreign). Of these companies, 233 (78 Canadian, 49 British and 106 foreign) were also registered to transact casualty insurance. In addition, 119 companies were registered by the Federal Government to transact casualty insurance but not fire insurance (33 Canadian, 8 British and 78 foreign). Of the companies registered to transact fire and/or casualty insurance, 95 were also registered to transact life insurance; 13 of these were registered for fire, life and casualty insurance and 82 for life and casualty but not fire insurance. It should also be noted that, in addition to the companies registered by the Federal Government to transact casualty insurance, there were 31 registered fraternal benefit societies transacting accident and sickness insurance, of which 29 also transacted life insurance.

The operations analysed in the tables of this Section, with exception of Table 12, include only those companies under federal registration. As shown in Table 12, some fire and casualty insurance is transacted in Canada by companies that are provincially licensed only. These companies generally confine their operations to the province of incorporation

and many of them are mutual organizations transacting only fire insurance on a county, municipal or parish basis. The table relates to insurance companies only; no data are included for fraternal benefit societies.

Subsection 2.—Fire Losses

The information in Tables 15 to 17, which deals with the loss of property and life caused by fire, has been summarized from the annual report *Fire Losses in Canada* prepared by the Dominion Fire Commissioner, Department of Public Works. Federal losses, not included in these figures, in 1968 amounted to \$2,203,703 from 1,378 fires; average federal losses for the period 1959-68 amounted to \$4,231,769 from an annual average of 1,821 fires.

15.—Statistics of Fire Losses, 1959-68

(Excludes forest fires and Federal Government property losses)

Subsection 4.—Finances of Companies Transacting Fire and Casualty Insurance under Federal Registration

The financial statistics of Tables 19 and 20 relate to fire and casualty insurance transacted by companies under federal registration. The figures for British and foreign companies apply to their assets, liabilities and operations in Canada only. On the other hand, the assets and liabilities, revenue and expenditure of Canadian companies are given for total business, including business arising out of Canada as well as in Canada.

19.—Total Assets and Liabilities for Fire and Casualty Insurance of Canadian Companies and Assets and Liabilities in Canada for Fire and Casualty Insurance of British and Foreign Companies under Federal Registration, 1967-69.

Section 3.—Government Insurance

Federal Government Insurance

In recent years, various insurance schemes have been adopted by the Federal Government or undertaken co-operatively by the federal and provincial governments. Information on unemployment insurance, hospital insurance, veterans insurance, export credit insurance, etc., will be found in the appropriate Chapters on Labour, Health and Welfare, Foreign Trade, etc.

Deposit Insurance.—During 1967, deposit insurance became available through the formation, by SC 1967, c. 71, of the Canada Deposit Insurance Corporation. The Corporation was established to provide, for the benefit of persons having deposits with a member of the Corporation, insurance against the loss of deposits up to a maximum of \$20,000 for any one depositor.

Membership in the Deposit Insurance Corporation is obligatory for chartered banks, Quebec savings banks and those federally incorporated loan and trust companies that accept deposits from the public. Provincially incorporated loan and trust companies that accept deposits from the public are eligible to apply for membership if they have the consent of the province of incorporation.

The definition of deposits, as set out in the general by-law of the Corporation, might be summarized as money received by a member institution that is repayable on demand or notice and money that is repayable on a fixed date not more than five years after the date on which the money is received. Deposits not payable in Canada or in Canadian currency are not insured.

Provincial Government Insurance*

Saskatchewan.—The Saskatchewan Government Insurance Office, a Crown corporation established by the Saskatchewan Government Insurance Act, 1944, commenced business in May 1945. It deals in all types of insurance other than sickness and life. The aim of the legislation is to provide residents of the province with low-cost insurance designed for their particular needs. Rates are based on loss experience in Saskatchewan only and the surplus is invested, to the extent possible, within the province. Premium income for 1969 amounted to \$14,780,063 and earned surplus to \$727,075. The total amount made available to the Saskatchewan Government Finance Office from 1945 to Dec. 31,

* Prepared by the provincial authorities concerned.

1969 was \$8,618,479. Assets at the latter date were \$41,202,657, of which \$17,900,000 was invested in bonds and debentures issued by the Province of Saskatchewan and by Saskatchewan schools, municipalities and hospitals. Independent insurance agents, numbering 591, sell government insurance throughout the province.

The Automobile Accident Insurance Act, administered by the Saskatchewan Government Insurance Office on behalf of the provincial government, provides a comprehensive automobile accident insurance plan for the protection of the public in this province. Premiums paid by motorists create a fund from which benefits are paid in the event of death, injuries and damages sustained in automobile accidents. Any surplus over payments is used to increase benefits, reduce premiums, or absorb deficits in periods of high accident frequency. The surplus is not transferable to the general operations of the Saskatchewan Government Insurance Office, nor is any surplus credited to the provincial government. The plan provides for public liability insurance, with an inclusive limit of \$35,000 for bodily injury and property damage, as well as comprehensive and collision coverage subject to a \$200 deductible for private passenger cars. Rates vary from \$5 a year for older farm trucks to \$94 for late-model private passenger cars, and also vary for other types of motor vehicles depending on size and usage. From the inception of the Act in 1946 to Dec. 31, 1969, more than \$167,000,000 was paid in claims.

The Saskatchewan Government Insurance Office, under contract with the Saskatchewan Department of Natural Resources, offers insurance to farmers covering damage to unharvested crops by certain wildlife such as ducks, geese, sandhill cranes, deer, elk, bear and antelope.

Information regarding the operation of the Saskatchewan Government Insurance Office or the Automobile Accident Insurance Act may be obtained from the Office Librarian, Saskatchewan Government Insurance Office, Regina, Sask.

Alberta.—Provincial government insurance in Alberta, coming within the purview of the Alberta Insurance Act, relates (1) to the Alberta General Insurance Company, in which the entire business of the fire branch of the Alberta Government Insurance Office was vested by the Legislature on Mar. 31, 1948, and (2) to the Life Insurance Company of Alberta, which was constituted on the same date to take over the life branch of the Alberta Government Insurance Office. Each company is administered by a separate board of directors. The Lieutenant-Governor in Council appoints the members to the respective boards but the charter of the Life Insurance Company of Alberta provides for the election of two policyholder directors. Although both companies are Crown corporations, they are not entitled to the usual immunities of the Crown, since they may sue and be sued in any court of competent jurisdiction.

A variety of agencies in Alberta offer forms of prepaid protection corresponding to insurance but the nature of the enabling legislation governing these plans emphasizes the fact that they do not constitute insurance. Because such exemptions are specifically provided by the insurance laws of the province, reference to these plans is necessary only to make it clear that they do not come within the scope of the Alberta Insurance Act. It should be noted that the Alberta Hail Insurance Act and the Alberta Crop Insurance Act are administered by the Alberta Hail and Crop Insurance Corporation and each contains a clause exempting its operations from the provisions of the Alberta Insurance Act.

Further information on provincial insurance matters may be obtained from the Superintendent of Insurance, Department of the Provincial Secretary, Edmonton, Alta.

The interpretation of the symbols used in the tables throughout the Year Book will be found on p. vii of this volume.

Section 1.—The Department of National Defence

The control and management of all matters relating to national defence, the Canadian Armed Forces and the Defence Research Board are the responsibility of the Minister of National Defence; the duties and functions relating to civil emergency operations in peace and war have also been assigned to the Department of National Defence, with the Canadian Forces undertaking the role.

The Canadian Forces Reorganization Act, which came into force on Feb. 1, 1968, "unified" the Royal Canadian Navy, the Canadian Army and the Royal Canadian Air Force into a single service called the Canadian Armed Forces.

Effective Aug. 1, 1964, the Headquarters of the Royal Canadian Navy, the Canadian Army and the Royal Canadian Air Force were integrated to form a single Canadian Forces Headquarters (CFHQ) under a single Chief of Defence Staff. The role of CFHQ is to provide military advice to the Minister of National Defence, the Chief of Personnel, the Chief of Technical Services and the Comptroller General, who are responsible for advising and supporting the Chief of Defence Staff in matters relating to their assigned spheres of activity. The Defence Research Board conducts research relating to the defence of Canada and also undertakes the development of or improvements in materiel.

The civilian administration of the Department is organized under the Deputy Minister and is constituted on a functional basis. The Deputy Minister, assisted by an Associate Deputy Minister, maintains a continuing review and control over the financial aspects of operational policy, logistics, and personnel and administration. Each of three Assistant Deputy Ministers administers a division of the Deputy Minister's Branch responsible for Manpower, Logistics and Finance. Also responsible to the Deputy Minister are the Judge Advocate General, the Departmental Secretary and the Director General of Information Services.

The Defence Council meets at regular intervals to consider and advise on major policy matters. The Council consists of: the Minister of National Defence as Chairman; the Deputy Minister of National Defence, the Chief of Defence Staff, the Chairman of the

* Prepared by the Director General, Information Services, Department of National Defence, Ottawa.

Defence Research Board and the Vice Chief of Defence Staff as members; and a Secretary. The Branch Chiefs at CFHQ, the Vice Chairman of the Defence Research Board and the Associate and Assistant Deputy Ministers are associated members.

Liaison in Other Countries

The Chief of Defence Staff, who is the Canadian Military Representative to the North Atlantic Treaty Organization, is responsible for advice on all NATO military matters and acts as a military adviser to the Government and to Canadian delegations to NATO.* For purposes of liaison and the furtherance of international co-operation in defence, Canada also maintains: (1) the Canadian Defence Liaison Staff London, representing the Canadian Armed Forces and the Defence Research Board in Britain, the Commander of which is the principal military adviser to the Canadian High Commission in London; (2) the Canadian Defence Liaison Staff Washington, representing the Canadian Armed Forces and the Defence Research Board in the United States, the Commander of which is the principal military adviser to the Canadian Ambassador in Washington, and is the Canadian National Liaison Representative to the Supreme Commander, Allied Command Atlantic (SACLANT) Headquarters; two logistic liaison units are also located in the United States; (3) in Brussels, a Canadian member of the NATO Military Committee in Permanent Session, a Military Adviser to the Canadian Permanent Representative to the North Atlantic Council and also a Canadian National Military Representative to SHAPE; and (4) Canadian Forces Attachés in various countries throughout the world. In addition, a number of defence matters of concern to both Canada and the United States are considered by the Permanent Joint Board on Defence, which provides advice on such matters to the respective governments.

Rates of Pay Issuable to the Canadian Forces

The entire pay structure for comparable ranks in the former three services is on a uniform basis. Tables 1, 2 and 3 contain the monthly rates of pay for officers and men of the Regular Force effective Jan. 1, July 1 or Oct. 1, 1970.

* Canada's contributions to NATO are outlined on p. 189.

Allowances Issuable to the Canadian Forces.—The following are the most common entitlements, aside from pay, for members of the Regular Forces. Other entitlements related to special duties and to the Reserve Forces are not shown.

Outfit Allowance.—Female officers receive a single payment of \$450 on appointment in lieu of a free issue of clothing.

Clothing Upkeep Allowance.—All members receive a monthly clothing upkeep allowance (males \$7 and females \$8) commencing one year from the date of enrolment subject to various restrictions which prescribe periods of time during which the allowance is not payable.

Aircrew Allowance.—Aircrew allowance in varying amounts may be paid to a member of aircrew, or an officer or man undergoing flying training to become a pilot, navigator or other member of aircrew if he is not already receiving the special rate of pay applicable to pilots or navigators.

Foreign Allowance.—Officers and men posted for duty to a country outside of Canada are entitled to allowances to compensate for additional living expenses or hardships incurred; these vary with rank, appointment and location.

Isolation Allowance.—Isolation allowance, at rates that depend on the specific location, is paid to personnel serving at isolated posts in Canada.

Submarine Allowance.—An officer or man undergoing submarine training or filling an appointment in a submarine receives from \$60 to \$180 a month, depending on rank.

Parachutist Allowance.—An officer or man undergoing parachutist training or filling a designated position requiring parachute jumping and not entitled to air specialty allowance is paid parachutist allowance at the rate of \$60 a month.

Air Specialty Allowance.—An officer or man not entitled to aircrew or parachutist allowance who is training in or employed in the duties of certain flight specialties is paid air specialty allowance at the rate of \$45 or \$60 a month.

Casual Air Duty Allowance.—An officer or man not entitled to air specialty allowance or aircrew allowance is entitled to casual air duty allowance at the rate of \$3, to a maximum of \$45 a month, for each day during which he performs duty in an airborne aircraft other than as a parachutist or as a passenger.

Sea Duty Allowance.—An officer or man serving in a ship receives \$30 or \$60 a month, depending on rank.

Diving Allowance.—An officer or man undergoing diving training or filling an appointment as a diver receives from \$30 to \$150 a month, depending on qualifications.

Section 2.—The Command Structure of the Canadian Forces

The Canadian Forces are organized on a functional basis to reflect the major commitments assigned by the Government. Under this concept, all Forces devoted to a primary mission are grouped under a single commander who is assigned sufficient resources to discharge his responsibilities. Specifically, the Canadian Forces are formed into a Canadian Forces Headquarters and seven major Commands reporting to the Chief of the Defence Staff. Canadian Forces Headquarters, in addition to its headquarters function, is responsible for the logistic support of the Forces and, for this purpose, retains operational command of major logistic units. The roles of the Commands are:—

MOBILE COMMAND

The role of Mobile Command is: to provide military units suitably trained and equipped to support United Nations or other peace-keeping/peace-restoring operations; to provide ground forces, including tactical air support, for the protection of Canadian territory; and to maintain operational readiness of combat formations in Canada required for support of overseas commitments.

The Forces assigned include: three combat groups in Canada; the Canadian Airborne Regiment; the United Nations Force in Cyprus; two tactical fighter squadrons; one transport helicopter squadron; and one combat training centre. The combat groups are being reorganized to perform a wide variety of roles and will be provided with air-portable equipment.

The Militia and the Air Reserve components are also controlled and administered by Mobile Command.

MARITIME COMMAND

All Canadian Maritime Forces, both sea and air, are under the command of the Commander Maritime Command whose Headquarters is in Halifax. The Deputy Commander is the Commander Maritime Forces Pacific with Headquarters in Esquimalt. The role of Maritime Command is to defend Canadian interests from assault by sea and to support NATO by assisting in conducting anti-submarine warfare in the Allied Command, Atlantic. The Commander Maritime Command is the NATO Commander of the Canadian Atlantic

Sub-Area of the Western Atlantic Command, under the Supreme Commander, Allied Command Atlantic (SACLANT). Additional roles are to provide any sea lift required by Mobile Command, and to conduct search and rescue operations within the Atlantic and Pacific Search and Rescue Areas (roughly, the Maritime Provinces and British Columbia).

The Naval Reserve component is controlled and administered by Maritime Command.

The resources assigned to Maritime Command include destroyers, operational support ships, submarines, minesweepers, and aircraft for short- and long-range patrol, as well as training and communications facilities within the Command.

AIR DEFENCE COMMAND

Air Defence Command participates with the United States in the air defence of North America, through NORAD. It has command of three interceptor squadrons, two SAM squadrons, one SAGE control centre, two BUIC centres and two transcontinental radar lines. Operational control of NORAD assigned forces is exercised by HQ NORAD.

AIR TRANSPORT COMMAND

The role of Air Transport Command is to provide air transport support to Canadian Forces everywhere, and to conduct search and rescue operations in the Eastern Search and Rescue Area (roughly, Ontario and Quebec). It has five squadrons operating short- and long-range cargo- and troop-carrying aircraft as well as four transport and rescue squadrons.

TRAINING COMMAND

The role of Training Command is to provide individual training for the Canadian Forces and to conduct search and rescue operations within the Western Search and Rescue Area (roughly, Manitoba, Saskatchewan and Alberta). All former training units of the RCN, the Canadian Army and the RCAF where individual training is carried out have been placed under functional control of Training Command. The Canadian Military Colleges (Royal Military College, Royal Roads and Collège militaire royal de Saint-Jean), the Staff Colleges and National Defence College, are under the direct control of Canadian Forces Headquarters (see pp. 1278-1280). Land/air warfare operational training and basic parachutist training are the responsibility of Mobile Command; basic fixed-wing and helicopter pilot training are a Training Command responsibility.

THE CANADIAN FORCES COMMUNICATIONS COMMAND (CFCC)

The role of the CFCC is to provide fixed communications networks for the Canadian Forces and to provide a national communications system for survival operations (civil defence). To carry out this role, CFCC commands all fixed communications installations within Canada.

CANADIAN FORCES EUROPE

The Canadian Forces allocated to support NATO in Europe are part of Canadian Forces Europe. The land element is 4 Canadian Mechanized Battle Group operationally responsible to the Central Army Group. The air element, 1 Canadian Air Group, consisting of three CF-104 Starfighter squadrons, is operationally assigned to 4 Allied Tactical Air Force. These elements are located in the Lahr area of Germany and are administratively supported by CFB Europe at Lahr.

Administration of Military Bases in Canada

Staffs and services required below Command Headquarters level to administer and support units based in a particular locality have been organized on Canadian Forces bases. The primary role of each base is to provide base-level administration and supporting services to those units located on or near the base. Each base has been allocated to a functional Commander, to whom the base Commander reports.

Function/Regional Organization

Functional Commanders have been assigned a regional as well as a functional responsibility for such actions as representation to provincial governments, aid of the Civil Power, emergency and survival operations, administration of cadets, as well as regional support services for all units in the region.

Canada has been divided into five regions which have been assigned to functional Commanders as follows: Atlantic (Newfoundland, Nova Scotia, Prince Edward Island, New Brunswick)—Maritime Command; Eastern (Quebec)—Mobile Command; Central (Ontario)—Air Transport Command; Prairie (Manitoba, Saskatchewan, Alberta)—Training Command; Pacific (British Columbia)—Maritime Forces Pacific.

Other Command Elements

Northern Region Headquarters located at Yellowknife, N.W.T., provides representation to the Governments of the Yukon Territory and the Northwest Territories and will exercise a co-ordinating function for all military activities in that region of Canada.

The Canadian Defence Education Establishment controls and administers the staff colleges and military colleges for CFHQ and co-ordinates officer training and development for the Canadian Forces.

Section 3.—Operations

Maritime Forces

The Fleet.—As of September 1970, the following vessels were in service: 18 Destroyer Escorts/Destroyer Escorts Helicopter Equipped (three of which are undergoing major modernization); three Operational Support Ships; three Oberon Class Submarines; one Tench Class Submarine; six Coastal Minesweepers (employed as training vessels); four Gate Vessels (employed as training vessels); one Experimental Hydrofoil; and two Escort Repair Vessels (retained in service as alongside workshops and temporary accommodation vessels). Four Iroquois Class Helicopter Destroyers under construction are expected to join the Fleet in 1972 and 1973.

Operations in 1970.—Maritime Forces participated in six NATO exercises carried out in the North Atlantic and, in addition, one destroyer was assigned to the NATO Standing Naval Force Atlantic throughout the year. Combined exercises with United States Forces were conducted on both the Pacific and Atlantic Coasts and training was conducted in the Bermuda and San Juan areas in order to maintain individual ships at an operational standard. Between these exercises, ships made goodwill visits to the United States, Britain, the Netherlands, Ireland, Denmark, Norway, France, Germany, Italy, Portugal, Mexico and Japan.

Four land-based maritime air squadrons were contributed in 1970 to the Maritime Defence of North America; three of these based on the East Coast and one based on the West Coast are equipped with *Argus* aircraft, the largest modern anti-submarine aircraft in the world. A continuous program of aircraft modernization and re-equipping with improved anti-submarine devices was conducted throughout the year. The East and West Coast squadrons participated in a number of national, international and NATO anti-submarine exercises, and maintained daily patrols and surveillance of ocean areas adjacent to the Canadian coastlines. A shore-based squadron of CS2F-3 (*Tracker*) aircraft was also operational in 1970 in the surveillance role. Up to nine CHSS-2 (*Sea King*) helicopters are borne on Destroyer Escorts (DDH ships) and assist in carrying out long-range ASW surveillance at sea.

Land Forces

Operations in 1970.—In fulfilment of obligations under NATO, Canada continued to provide ground forces for the defence of Western Europe. The 4th Canadian Mechanized Battle Group, the major units of which are the Royal Canadian Dragoons, 1st Regiment Royal Canadian Horse Artillery, 1st Battalion Royal 22^e Regiment and 3rd Mechanized Commando, constitutes the Land Forces' contribution in NATO in the Federal Republic of Germany. The Headquarters of the Battle Group is at Lahr and the married quarters are located in the vicinity of Lahr and Baden-Soellingen. Canada has also earmarked from within its Canadian-based Forces a combat group for external reinforcement of the NATO North Flank. Included within this formation is a battalion group held at a high state of readiness for operations on the North Flank under command of the Commander, Allied Command Europe Mobile Force (Land Component) (AMF[L]).

The Canadian Forces continued to provide support for United Nations operations. Canadian participation in the UN Force in Cyprus included provision of a reduced Infantry Battalion, a Canadian Contingent Headquarters and a Canadian element in the UN headquarters—a total of 581 officers and men. A total of 39 officers and men was employed on other UN missions in the Middle East, Kashmir and Korea. In addition, a specially trained and equipped force equivalent to an infantry battalion group in size is maintained in Canada to provide a force for service in support of the UN on short notice to any part of the world.

In addition to its UN commitments, the Canadian Forces, as a result of Canadian participation in the International Commissions for Supervision and Control in Viet-Nam, Cambodia and Laos, provided approximately 21 officers and men for truce supervisory duties in the region formerly known as Indo-China. On Oct. 14, 1969, the Canadian Government announced its decision to withdraw Canadian Delegation personnel from Laos and Cambodia. The Commission in Cambodia adjourned *sine die* on Dec. 31, 1969, and the Delegation subsequently withdrew. The Delegation in Laos was also reduced until, on Feb. 10, 1970, only a small military component was left in Vientiane.

On Sept. 13, 1968, Canada agreed to a request by the Federal Military Government of Nigeria to participate in an International Observer Team in Nigeria. Canadian participation, which had consisted of two officers, terminated on Feb. 27, 1970.

In accordance with obligations embodied in the provision of the National Defence Act and departmental policy, the Canadian Forces provided aid and assistance in response to requests from civil authorities. Major undertakings were: (1) aid to the Government of the Province of Quebec in maintaining law and order in Montreal during the Montreal City Police strike on Oct. 7, 1969; (2) assistance to the Ministry of Transport in a program to minimize the harmful effects of oil pollution caused by the grounding of the tanker *Arrow* in Chedabucto Bay, Feb. 5, 1970; (3) assistance to the Governments of New Brunswick, Saskatchewan and Manitoba during floods in the spring of 1970; and (4) assistance to the Governments of Saskatchewan and Alberta in fighting serious forest fires during the summer of 1970.

Northern Region Headquarters was formed in May 1970. The Headquarters, at present located in Ottawa, will move to Yellowknife, N.W.T., in January 1971 and will initially consist of approximately 50 military personnel. The main role of the Headquarters will be to co-ordinate Canada's increasing military activities north of the 60th parallel of latitude. The Headquarters will also co-ordinate Armed Forces northern activities with other federal agencies, including the Governments of the Yukon Territory and the Northwest Territories.

To help alleviate student summer unemployment, the Department of National Defence operated certain programs for students between the ages of 16 and 24. The programs undertaken in summer 1970 were: Project 1—to employ up to 4,000 persons on general maintenance tasks on Canadian Forces bases and stations; Project 2—to train an additional 500 cadets within existing programs; Project 3—to employ 1,000 persons on range clearance at Canadian Forces Bases Gagetown and Valcartier; Project 4—to support 100 students on leadership training at Collège militaire royal de Saint-Jean in Quebec in co-operation with the Canadian Red Cross and the Department of Manpower and Immigration; Project 5—to provide additional militia training for 7,850 applicants at local units and at militia training centres; Project 6—to provide facilities and equipment to the Department of the Secretary of State for emergency sleeping quarters for transient youths at 14 locations; Project 7—to conduct a pilot trades course for 30 persons to teach engineer-type trades; and Project 8—to provide casual labour employment for 700 persons.

Air Forces

Operations in 1970.—The Canadian Forces contribution to the air defence of North America during the year consisted of three CF-101B interceptor squadrons, two Bomarc surface-to-air missile squadrons and 27 radar sites. These forces, together with the Distant

Early Warning Line (DEW), operated under the operational control of North American Air Defence Command (NORAD). No. 1 CAG (Canadian Air Group), Canada's NATO air contribution in Europe, decreased from six squadrons of CF-104 aircraft to three. Two of these squadrons were employed in the strike/attack role and the other in the photo-reconnaissance/attack role. Mobile Command's two CF-5 squadrons continued to emphasize close support and photo-reconnaissance operations. Additionally, one of the squadrons carried a collateral commitment for basic operational training of pilots destined for CF-5 and CF-104 aircraft.

Air Transport Command (ATC) continued to provide support to CFB Europe using long-range *Boeing 707*, *Yukon* and *Hercules* aircraft. A *Caribou* was maintained in India/Pakistan in support of UN MOGIP. In Canada, ATC airlifted Department of National Defence personnel and cargo from coast to coast and into the Arctic regions. *Hercules* aircraft were employed for paratroop training of the land forces. Search and rescue services were provided in the Canadian areas of responsibility. Throughout the year the Canadian Forces processed some 2,900 separate search and rescue incidents and flew more than 8,700 hours on this task.

The Canadian Forces gave assistance to the Department of External Affairs in providing relief to Peru after an earthquake that occurred on May 31, 1970. This assistance included the airlift of 161,703 lb. of relief supplies from Canada to Peru and the airlift of supplies and evacuation of refugees within Peru, wherein 97 sorties were flown by *Caribou* aircraft, which carried a total of 1,902 passengers and 358,570 lb. of cargo.

Section 4.—Training

All recruit and most basic and advanced trades training in support of the Canadian Armed Forces takes place at various schools under the supervision of Training Command. Maritime Command and Mobile Command maintain functional control of training for their personnel.

The Combat Arms School of the Combat Training Centre, CFB Gagetown, N.B., conducts training for officers and men of the armoured, artillery and infantry units of the Regular and Reserve Forces, ranging from basic trades to advanced courses. Basic trades training for French-speaking personnel is conducted at the Combat Arms School Detachment, CFB Valcartier, Que. Training for field engineers is given at CFB Chilliwack, B.C.

Recruit training takes place at CFB Cornwallis, N.S., for English-speaking recruits and CFB St. Jean, Que., for French-speaking recruits. St. Jean is also the site of the English-French Language Training School. Training in other languages is given at the Canadian Forces Foreign Language School in Vanier City, Ont.

Support trades training is conducted at the School of Administration and Logistics, CFB Borden, Ont., and technical trades training at a number of locations across Canada. Basic technical training in French is conducted at CFB St. Jean, Que.

Flying training to "wings" standard is based in the Prairie Provinces—pilot selection and basic helicopter flying training at Portage la Prairie, Man., basic fixed-wing flying training at Moose Jaw, Sask., and advanced flying training at Gimli, Man. Navigator and observer training is given at Winnipeg. During 1970, 260 pilots, 98 navigators and 70 observers were awarded "wings" and went on to further training in support of tactical air, air defence, long-range air transport operations and search and rescue.

Two Fleet Schools, one at CFB Esquimalt, B.C., and the other at CFB Halifax, N.S., provide basic Maritime trades training as well as training facilities for the operational warships on the East and West Coasts.

Canadian Military Colleges

The three Canadian Military Colleges are the Royal Military College of Canada, founded at Kingston, Ont., in 1876; Royal Roads Military College, established in 1941 near Victoria, B.C.; and Collège militaire royal de Saint-Jean, established at St. Jean, Que.,

primarily to meet the needs of French-speaking cadets. The Royal Military College and the Royal Roads Military College were constituted as the Canadian Service Colleges in 1948 and Collège militaire royal de Saint-Jean was opened in 1952. In 1959, the Ontario Legislature granted the Royal Military College a charter empowering it to grant degrees. In 1967, the Canadian Services Colleges were redesignated as the Canadian Military Colleges, in keeping with unification of the Canadian Forces.

The role of the Colleges is to educate and train officer cadets for careers as commissioned officers in the Canadian Forces. Courses of instruction are designed to develop character and to provide a balanced liberal, scientific and military education leading to degrees in arts, commerce, science and engineering. The Royal Military College of Canada accepts senior matriculants and offers a four-year course. Royal Roads Military College accepts senior matriculants who, on successful completion of the second year, go to the Royal Military College of Canada for their third and fourth years. Collège militaire royal de Saint-Jean accepts junior and senior matriculants to pursue a five- or four-year program; the final two years in some disciplines are completed at the Royal Military College of Canada.

To be eligible for admission to a Canadian Military College, candidates must be single, Canadian citizens and physically fit. Candidates must have reached their 16th but not their 21st birthday on the first day of January preceding entrance, with the exception of junior matriculation candidates for Collège militaire royal de Saint-Jean who must have reached their 16th but not their 20th birthday on the first day of January preceding entrance. On entry into one of the Canadian Military Colleges, applicants are enrolled as Regular Force Officer Cadets in the Canadian Forces. Costs of tuition, uniforms, books, instruments and other fees are borne by the Department of National Defence. Officer cadets receive a salary of \$193 a month and are charged \$86 a month for board and lodging. On successfully completing their academic and military training, officer cadets are granted permanent commissions in the Regular Force.

Most officer cadets entering the Canadian Military Colleges enrol under the Regular Officer Training Plan. Provision is also made for the entry of a number of Dominion cadets. These are sons of persons who were killed, or died, or are severely incapacitated as a result of service in a component of the Canadian Forces, or the Canadian Merchant Marine, during hostilities. Dominion cadets enter the Reserve Force and receive free tuition during the first academic year at a Canadian Military College. A limited number of Reserve cadets who pay tuition and other fees during the duration of the course may also be admitted.

During the 1969-70 academic year, 1,124 officer cadets were enrolled at the Canadian Military Colleges, 532 of them at the Royal Military College, 206 at Royal Roads Military College and 386 at Collège militaire royal de Saint-Jean.

Staff and Defence Colleges

The Canadian Land Forces Command and Staff College at Kingston, Ont., gives a 44-week course for the training of Captains and Majors for command and staff appointments. Although most of the student body is composed of officers of the land element of the Canadian Armed Forces, officers from the sea and air elements and from the armies of other Commonwealth and NATO countries also attend. Instruction involves study of reference material, syndicate discussions, lectures and tutorial indoor and outdoor exercises. In addition to military subjects, the curriculum includes studies in the fields of military technology and operational research; leadership, command and management; national and international affairs; communication skills; and geopolitics. The syllabus is enhanced by a variety of expert military and civilian guest lecturers and by visits to Canadian and United States military and civilian establishments.

The Canadian Forces College in Toronto, consists of three institutions for the staff training of officers: (1) *The Canadian Forces Staff College* where Majors and Lieutenant-Colonels from sea, land and air elements of the Canadian Armed Forces take a 44-week course to prepare them for assumption of higher rank and greater responsibility. The

course includes the study of strategic and military problems; national and international affairs; military technology and operational research; geopolitics; management; and communications skills. (2) *The Canadian Forces Staff School* where all classifications of officers in the rank of Captain take a 10-week course to prepare them to perform staff functions of a general nature that are appropriate to their rank and to provide the foundation for their subsequent professional development. The course includes the study of management and communications skills; national and international affairs; Canada's national defence structure; staff procedures; personnel support services; government and sociology. (3) *The Canadian Forces Extension School* where selected military and academic courses of study by correspondence are offered to all officers of the Canadian Armed Forces.

The National Defence College at Kingston, the senior college of the Canadian Armed Forces, provides a 47-week course to prepare senior military officers in the ranks of Lieutenant-Colonel and Colonel, and senior officers from other government departments and industry, for appointments to positions of higher responsibility, by enabling them to study together those aspects of national and international affairs which determine or significantly affect Canada's policies. Lecturers are chosen from the leaders in various fields in Canada and other countries. In addition, field studies to certain parts of Canada, the United States, Europe, Asia, Africa, Australia and Latin America familiarize students with conditions and influences in their own country and in other countries.

Section 5.—Reserves and Cadets

The Naval Reserve

Recruiting and training of officers and men of the Naval Reserve is conducted mainly through 16 Naval Reserve Units across Canada under the Commander, Maritime Command whose Headquarters is located at Halifax, N.S. Naval Reserve Units are established at the following centres:—

St. John's, Nfld., HMCS *Cabot*
 Halifax, N.S., HMCS *Scotian*
 Saint John, N.B., HMCS *Brunswick*
 Quebec, Que., HMCS *Montcalm*
 Montreal, Que., HMCS *Donnacona*
 Toronto, Ont., HMCS *York*
 Ottawa, Ont., HMCS *Carleton*
 Kingston, Ont., HMCS *Cataraqui*

Hamilton, Ont., HMCS *Star*
 Windsor, Ont., HMCS *Hunter*
 Thunder Bay, Ont., HMCS *Griffon*
 Winnipeg, Man., HMCS *Chippawa*
 Saskatoon, Sask., HMCS *Unicorn*
 Calgary, Alta., HMCS *Tecumseh*
 Vancouver, B.C., HMCS *Discovery*
 Esquimalt, B.C., HMCS *Malahat*

Naval Reserve Units, commanded by Reserve Officers, provide both basic and specialized training for officers and men of the Naval Reserve. Additional training is also conducted in Regular Force schools across the country in HMC Ships.

The Militia

Following the review undertaken by the Government in 1969 of Canada's defence and foreign policy, the basic priorities of the defence policy were re-defined, with greater emphasis placed on the protection of Canada's national sovereignty. These decisions, coupled with the need for financial restraints, resulted in changes to the organization and role of the Militia within the general context of the re-defined roles of Canada's Armed Forces as a whole.

The Militia has been reduced to a strength of approximately 19,000 which has been achieved by reductions in unit establishments and in the number of service units. Little change was made in the number of armoured, artillery and infantry units because it is for this type of militiaman that the greatest need is foreseen. The Militia is now composed of 87 major units and 78 minor units, with command and control being exercised through five Militia Area Headquarters and 21 Militia District Headquarters.

The traditional role of the Militia to support the Regular Force has been re-emphasized. Specifically, the Militia will now: (1) provide trained individuals for augmentation and reinforcement of the Regular Force; (2) provide trained sub-units to support the field force for the defence of Canada and the maintenance of internal security; (3) provide trained personnel for the augmentation of the civil emergency operations organization; and (4) form the base on which the Regular Force could be expanded in the event of an emergency.

To ensure a closer relationship between the Militia and the Regular Force and to facilitate a training program more closely related to its role, the Militia, less 11 communication units, was placed under direct command of Commander, Mobile Command, on Apr. 1, 1970. The 11 communication units, whose role is to augment the communication system, were placed under the command of Canadian Forces Communication Command on the same date.

Air Reserve

The active sub-components of the Primary Reserve of the air element are designated the Air Reserve, which is made up of six Reserve Flying Squadrons and four Air Reserve Regional Headquarters. Montreal and Toronto each has two Flying Squadrons and one Air Reserve Regional Headquarters; Winnipeg and Edmonton each has a single Flying Squadron and an Air Reserve Regional Headquarters. The Air Reserve Regional Headquarters is required to provide the necessary administrative support to the Flying Squadron to include all phases from recruiting to release procedures, except for operational control and flying training. All Air Reserve Squadrons are responsible through 10 Tactical Air Group to the Commander, Mobile Command. All Flying Squadrons are equipped with the DHC-3 *Otter*. Their role is light tactical air transport and reconnaissance for ground forces. They can be tasked as: (1) tactical air transport, including logistics support, air evacuation of casualties, communications and liaison; (2) airborne surveillance in support of ground forces in a permissive air environment; (3) aerial photography to provide the ground forces with a limited photographic capability that will supplement the reconnaissance provided by specialized tactical reconnaissance aircraft; (4) aerial, visual, photographic operations; and (5) provision of a reserve of trained pilots who could be incorporated into the Mobile Command Flying Units if required.

Canadian Armed Forces Cadets

The object of the cadet movement in Canada is to provide the opportunity for young men, aged 13 to 18, to acquire the fundamentals of good citizenship and leadership through a combination of training at local cadet units and at summer camps. In keeping with the unified concept of the Canadian Armed Forces, the Sea, Army and Air Cadet organizations have integrated the command and control functions of their respective organizations and adopted a common aim: "To develop in youth the attributes of good citizenship and leadership; to promote physical fitness; and to stimulate their interest in the Sea, Land and Air elements of the Canadian Forces". While cadet officers remain environmental, they are commissioned in the Cadet Instructor List which is a sub-component of the Canadian Forces Reserve.

Royal Canadian Sea Cadets.—Royal Canadian Sea Cadets, sponsored by the Navy League of Canada in partnership with the Canadian Forces, comprise 183 corps which are supervised jointly by the local branches of the League and by Regular Force officers. Instruction at corps level is carried out by Cadet Instructor List (Sea). Two training establishments, *Cornwallis* on the East Coast and *Quadra* on the West Coast, accommodate officers and cadets for two-week training periods in summer. Under an exchange program, 100 Canadian sea cadets exchange visits with an equal number of United States sea cadets on the East and West Coasts, and 10 exchange with British sea cadets. In addition, selected cadets receive a six-week training course at Canadian Forces bases. Sea experience is provided throughout the year in HMC Ships and Ministry of Transport Ships. As of Jan. 31, 1970, the strength of the corps was 1,034 officers and 11,292 cadets.

Royal Canadian Army Cadets.—Supervision of the organization and training of Army Cadets is the responsibility of the Regular Force. The training and administration is the responsibility of officers of the Cadet Instructor List (Army), a sub-component of the Canadian Forces Reserves, and civilian instructors. As of Jan. 31, 1970, officers and civilian instructors numbered 2,557 and there were 46,350 cadets enrolled in 447 corps.

The International Exchange Visits Program gave Army cadets an opportunity to visit and train abroad; 90 cadets went to Jamaica, Barbados, Trinidad and Tobago, Guyana, and Grenada; 16 went to the National Rifle Association matches at Bisley, England, and two officers and 12 cadets attended the Outward Bound Course at Towyn, Wales. Cadets from the Caribbean countries trained at Camp Gagetown, N.B., Valcartier, Que., and Ipperwash Cadet Camp, Ont. One officer and 12 cadets from Britain trained at the National Army Cadet Camp at Banff, Alta., and 14 British cadets participated in the Dominion of Canada Rifle Association matches at the Connaught Ranges near Ottawa. Seven cadets from Canada attended the U.S. Ranger course at Hawk Mountain, Pa., and a similar number of U.S. Rangers attended Banff National Cadet Camp. Fourteen U.S. airborne cadets attended a two-week expedition in the Bruce Peninsula in Ontario and five Canadian airborne cadets trained at the U.S. Airborne Centre in Fort Benning, Ga.

In 1970, 3,850 cadets attended six-week trades and specialist courses at Camp Gagetown, N.B., CFB Valcartier in Quebec, CFB Borden, CFB London and Ipperwash Camp in Ontario, CFB Shilo in Manitoba, CFB Calgary in Alberta and CFB Esquimalt and Vernon in British Columbia; 3,413 cadets attended two-week cadet leader and special camps at Camp Gagetown, Valcartier, Montreal, Ipperwash, Shilo, and Vernon; 220 master cadets attended the National Army Cadet Camp at Banff for six weeks of training which included mountain marches, rock-climbing and survival.

Royal Canadian Air Cadets.—The Air Cadet movement operates on the basis of a partnership between the Air Cadet League of Canada, a voluntary civilian organization, and the Canadian Armed Forces. The League sponsors and administers air cadet activities while the Canadian Armed Forces provide training personnel, syllabi and equipment and also assist the League in organization and administration. The objectives of training are to encourage air cadets to develop the attributes of good citizenship, to stimulate in them an interest in aviation and space technology, and to help them develop a high standard of physical fitness, mental alertness and discipline. The authorized ceiling of cadet enrolment is 30,000; the strength at Jan. 31, 1970, was 28,700 cadets attached to 385 squadrons across Canada.

During the summer of 1970, camps were conducted at CFB Greenwood, N.S., Bagotville, Que., Trenton, Ont., and Penhold, Alta., attended by 7,920 cadets. A six-week senior leaders' course for 240 cadets, a technical training course for 100 cadets, and a six-week physical training and recreational course for 75 cadets were held at CFB Borden, Ont. A bush-familiarization course, teaching the techniques of survival and ground search, was conducted at Namao, Alta., for 54 cadets. Under the International Exchange Visits Program, 62 air cadets were exchanged with Austria, Belgium, Britain, France, Israel, the Netherlands, Norway, Spain, Sweden, Switzerland, the United States and the Federal Republic of Germany.

About 250 senior air cadets receive flying training annually at flying clubs through Canadian Armed Forces sponsored scholarships; additional scholarships were awarded by the Air Cadet League and other organizations in 1970.

Section 6.—The Defence Research Board

The Defence Research Board is the agency in the Department of National Defence responsible for scientific research. It was created in 1947 by an amendment to the National Defence Act and consists of a full-time chairman and a vice-chairman, five ex officio members, and a varying number of members selected from universities and industry

appointed by the Governor in Council. The *ex officio* members are the Deputy Minister of National Defence, the President of the National Research Council, the Chief of Defence Staff, the Vice Chief of Defence Staff and the Chief of Technical Services. The Chairman is the chief executive officer of the Board's research organization. He is a member of the Defence Council, which is the senior policy body of the Department of National Defence. The Vice-Chairman is an associate member. The Board provides, through the Chairman, scientific advice to the Minister of National Defence and scientific and technical assistance to the Canadian Armed Forces.

The research organization consists of seven research establishments which carry out an intramural program of research specifically oriented toward military needs. The Board also conducts an extramural research program through grants in aid of research to universities. These investigations are usually basic in nature and seek to provide new knowledge in fields from which important military developments are likely to arise. Support is also provided to industry on a cost-sharing basis with the object of promoting and strengthening the applied research.

There are effective arrangements with Canada's allies to ensure mutual use of defence scientific knowledge, resources and facilities. The Board represents Canada on a number of specialist committees through which NATO's scientific endeavours are processed and co-ordinated. The Board maintains liaison offices in Washington, London and Paris.

Research on maritime warfare problems, particularly those relating to submarine detection and tracking, is carried out at the Defence Research Establishment Atlantic and at the Defence Research Establishment Pacific, the latter also being responsible for related research in the Arctic. Research and development of weapons and defence against various weapons is undertaken in co-operation with the Armed Forces at several establishments, the largest of which is the Defence Research Establishment Valcartier. Its principal activities include studies on armaments, night-vision aids and detection devices, lasers, propellants and explosives, aerospace research and weapons systems analysis.

Defence communication studies are carried out by the Communications Research Centre (Department of Communications) on behalf of the Defence Research Board. Research on the defensive aspects of chemical, biological and atomic weapons is carried out at two Defence Research establishments, the Defence Research Establishment Suffield at Ralston, Alta., and the Defence Research Establishment Ottawa; the latter is also responsible for the major northern activities and for power sources.

The Defence and Civil Institute of Environmental Medicine is an amalgamation of the Board's former Defence Research Establishment Toronto and the Canadian Forces Institute of Environmental Medicine, the research and associated facilities being available also to other Federal Government departments and agencies. Its defence program concerns the efficient performance of man in the military role and includes behavioural and bioscience investigations related to all environments. It advises on the physiological and psychological fitness of aircraft crews and on a variety of training projects. Highly specialized assistance in the investigation of accidents in all environments is available both for military and for civil agencies, with particular emphasis on human factors and environmental situations with serious hazard potentials. The Defence Research Analysis Establishment provides scientific evaluation and analysis of present and future weapons systems, tactical doctrine and other aspects of military operations, and studies broad strategic problems.

Thus, the Board continues to support the fields of research which are of foremost interest to the Canadian Armed Forces and the program is under continuing review to ensure that cognizance is taken of all changes in emphasis in defence requirements. Close liaison is maintained between the Defence Research Board and other appropriate departments of government to ensure that research and development activities are closely integrated with production.

Section 7.—Canada Emergency Measures Organization

The Canada Emergency Measures Organization was brought into being to initiate, stimulate and co-ordinate the civil aspects of defence policy delegated to federal departments and agencies to meet the threat of nuclear war on Canada. It is also responsible for providing support and guidance to provincial and municipal authorities in the development of their emergency capabilities.

Plans exist at all levels of government for the provision of emergency arrangements for health services, welfare services, employment of manpower and national resources and for practically every area of endeavour that is required to respond in an emergency situation.

The 1969 Year Book, at pp. 1201-1203, contains details of the establishment, powers and functions of Canada EMO, together with an outline of provincial government civil emergency responsibilities.

Section 8.—Defence Construction (1951) Limited

Defence Construction Limited (DCL) was established in 1950 as a Crown company to contract for major military construction and maintenance projects required by the Department of National Defence. The present company was incorporated in 1951 under the authority of the Defence Production Act. In April 1965 the control and supervision of Defence Construction (1951) Limited was transferred from the Minister of Defence Production to the Minister of National Defence. Defence Construction (1951) Limited is a Crown corporation as defined in Part VIII of the Financial Administration Act and listed in Schedule "C" in the Act (see p. 157).

The delineation of responsibility between the Department of National Defence and DCL is as follows. The Department of National Defence, as owner and the design authority, is responsible for providing DCL with complete plans and specifications as well as funds from which contract payments are made; the technical direction and supervision of the work of design consultants as well as procurement of land, when required, is also provided by the Department. Defence Construction (1951) Limited is the contracting and construction supervisory agency. Its function is to obtain tenders, make recommendations regarding awards and to award and to administer major construction and maintenance contracts. Upon request from the Department of National Defence, DCL also engages architects and engineers to prepare plans and specifications in accordance with the requirements of the Department. Contracts are entered into between the contractor or consultant and DCL. As an integral part of its contracting role, DCL is responsible for the administration of the contract, supervision of the construction work, the certification of the contractors' progress claims for payment and that the work has been completed in accordance with the contract and handed over to the Department. The Department of Supply and Services is responsible for payment of contract accounts.

PART I.—OFFICIAL SOURCES OF INFORMATION

Section 1.—Books About Canada

This basic list of books about Canada, contributed by the National Library, includes a selection of publications grouped alphabetically by author and arranged under the subject classifications of Biography, Country and People, Economics, External Relations, Government and Politics, History, Literature and the Arts, and General Reference Works. The selection represents many aspects of Canadian life, emphasizes the latest editions of books published within the past five years, and includes titles issued in either or both English and French, accompanied by the publisher's address.

It should be noted that, although this list is now an annual feature of the Year Book, it is not a cumulative presentation; it is limited to about 480 titles, necessitating the omission of some items that appeared the preceding year to permit the inclusion of others. For additional titles, the reader should consult the lists of books in earlier Year Books or one or more of the bibliographical collections listed below under the heading "General Reference Works", particularly the monthly or annual editions of *Canadiana* published by the National Library.

Biography

- ADDISON, Ottelyn. *Tom Thomson; the Algonquin years*, by Ottelyn ADDISON in collaboration with Elizabeth HARWOOD. With drawings and appendix by Thoreau MACDONALD. Toronto, Ryerson Press, 1969. 98 p.
- BEAL, J. R., et POLIQUIN, J.-M. *Les trois vies de Pearson*. Montréal, Éditions de l'Homme, 1968. 269 p.
- BÉCHARD, Henri. *L'héroïne indienne Kateri Tekakwitha*. Montréal, Fides, 1967. 200 p.
- BERGERON, Gérard. *Ne bougez plus! Portraits de 40 politiciens de Québec et d'Ottawa*. Montréal, Éditions du Jour, 1968. 223 p.
- BOORMAN, Sylvia. *John Toronto; a biography of Bishop Strachan*. Toronto, Clarke, Irwin, 1969. 222 p.

Section 2.—Federal Government Information Services

The preparation and distribution of information on activities of the Federal Government is the responsibility of special divisions operated for this purpose in more than three dozen government departments and agencies. Because each of these information divisions concerns itself almost entirely with the functions of its respective branches of government, the Cabinet decided in 1970, upon recommendation of a Task Force which conducted a year-long study of the services, to create a new co-ordinating, advisory and resource unit designated as "Information Canada".

Information Canada's role is not to centralize federal information services, but to assist in offering a better performance and to initiate information programs on subjects dealing with nationhood in general and federalism in particular, which go beyond the interests of individual departments. In addition to providing information to the public through press releases, booklets and other means used in the past, Information Canada has embarked upon the establishment of a network of inquiry centres in the principal centres of Canada where citizens may seek and obtain data on any aspect of Federal Government operations and other matters pertaining to Canadian society as a whole. It has also been assigned the duty of keeping Parliament and Government advised on a continuing basis of the news and comments Canadians are receiving through the news media, of the public's aspirations and complaints and its attitudes toward federal policies and programs as indicated in surveys, polls and other testing methods.

To help Information Canada perform its function, three components attached to other departments of government in the past have been transferred to it. These are the Publishing Division of the Canadian Government Printing Bureau, the Canadian Government Exhibition Commission and the Still Photo Library of the National Film Board. Their staffs comprise more than two thirds of the personnel of the new organization.

The basic assignment the Cabinet has given to Information Canada, as set out by the Prime Minister in a policy statement on information services to Parliament on Feb. 10, 1970, is one of assistance in "bringing government ever closer to the people" and "expanding the dimensions of democratic dialogue in this nation".

Approximately 400 Information Service Officers are engaged in the gathering and dissemination of information relating to operations of the Federal Government. As many more men and women, while not formally classified as such, perform one form of information function or another, either on a full-time basis or in association with other duties.

Among the information services provided by the Government of Canada, those offered by the Dominion Bureau of Statistics are of a particular nature. The Bureau is the chief source of statistical information on all phases of the Canadian economy supplied to both the general public and various branches of government at all levels. The operations of the Bureau are dealt with in greater detail on pp. 1302-1303.

Citizens with specific inquiries concerning Federal Government programs, policies and other aspects of operation should direct these to the information division of the department of government concerned, either at national headquarters in Ottawa or at regional offices where these exist, or they may seek the data desired through the inquiry offices of Information Canada. Inquiries relating to provincial activities may be directed to the provincial government department concerned.

Section 3.—Sale of Official Publications

Under the provisions of Order in Council PC 1970-559, responsibility was transferred from the Queen's Printer to Information Canada for the sale of official publications of Parliament and the Government of Canada that are issued to the public (with a few exceptions covered by statute), as well as the free distribution of all public documents and papers to persons and institutions (libraries) entitled by statute to receive them.

Information Canada issues a *Daily Checklist of Government Publications* which records—for the information of the public services, libraries, etc.—Federal Government publications immediately upon release. Those authorized by law or regulation to receive free copies of such publications receive the *Daily Checklist* without charge; others desiring the service may purchase an annual subscription to be forwarded daily or in weekly lots as requested.

Information Canada also issues the *Monthly Catalogue of Canadian Government Publications*, a comprehensive listing of official publications, public documents and papers not of a confidential nature published at government expense, an *Annual Catalogue* listing publications issued during the previous year, as well as sectional catalogues and selected titles bulletins advertising new government publications.

Information Canada is the national sales agent in Canada for publications issued by the United Nations; the United Nations Educational, Scientific and Cultural Organization; the World Health Organization; the Food and Agriculture Organization; the Organization for Economic Co-operation and Development; the International Atomic Energy Agency; the International Civil Aviation Organization; the Council of Europe; the Organization of American States (Pan American Union); the General Agreement on Tariffs and Trade; the New Zealand Government; the International Labor Organization; the World Meteorological Organization; the International Telecommunications Union; and the Assembly of Western European Union.

Publications of the Canadian Government and international organizations listed above may be obtained from Information Canada bookshops located in Halifax, Ottawa, Montreal, Toronto, Winnipeg and Vancouver or by mail from headquarters of Information Canada, 171 Slater Street, Ottawa, K1A 0S9.

Section 4.—Publication Services of the Dominion Bureau of Statistics

The Dominion Bureau of Statistics, established by statute in 1918 as Canada's central statistical agency, has become a vast storehouse of current and historical information on almost every kind of Canadian economic and social activity. It conducts the Census of Canada at 10-year intervals (years ending in '1') and five-year intervals (years ending in '6') and, in addition, regularly surveys social and economic change under some 20 broad subject-matter headings. Surveys are conducted monthly, quarterly, annually and as special studies, and the results are published on corresponding bases.

The Bureau is a separate department of government (to be known in future as *Statistics Canada*), reporting to Parliament through the Minister of Industry, Trade and Commerce. Its growth, both in personnel and in complexity of statistical activity, has closely paralleled the development of the nation as a modern and increasingly sophisticated industrial state. The total staff of the Bureau, which includes the largest single body of social scientists in one organization in Canada, has more than doubled in the past 15 years to some 3,300 in 1971.

The Bureau's statistical collection activities range throughout the nation, from large industrial cities to remote northern areas. The statistics resulting from these activities vary from well-known national aggregates, such as the national accounts, the consumer price index, and employment and unemployment, to small census detail on urban localities a few city blocks in size. The information produced describes in quantitative terms the economic and social environment, and is used mainly to improve the quality of decision-making and research in the Canadian economy. Basic uses in the public sector are concerned with the development and administration of social and economic policies and programs; uses in the private sector are important and extensive, and are frequently in marketing and merchandising, in connection with the establishment of branch plants, retail outlets and a variety of other projects associated with the generation of economic activity. In addition, uses by business include various types of business research and economic forecasting.

DBS information is, for the most part, made available to the public in the form of publications although, for more sophisticated users, there is an increasing output in machine-readable form, such as computer tapes and sets of punch cards. In the most recent count, DBS publications totalled 1,177. Of these, 114 appear monthly or more frequently, 39 are issued quarterly, 377 annually, and 24 every two or three years. The publications produced as a result of the national census include 278 for 1961 and 122 for 1966. The other 223 publications are issued on an occasional basis and include special studies and manuals associated with statistical activities. DBS statistical reports are increasingly published in bilingual form or appear in separate English and French editions.

About 1,250,000 copies of DBS publications are issued yearly on a subscription basis, exclusive of the DBS Daily and the DBS Weekly Bulletins which contain information in summary and preliminary forms and which have a total distribution of some 800,000 copies a year.

The publications program is designed to include the statistical information from each subject area which is most commonly used. However, in response to individual inquiries for more detail than may be contained in a regular publication, a large amount of unpublished information is issued in the form of special tabulations.

In addition to the publications program, there is a very large secondary distribution of statistical information through newspapers, magazines, trade journals, trade associations and by radio and television broadcasts. Much DBS material also becomes part of a wide range of reference publications such as year books and encyclopedias and is incorporated into research studies, in books, learned journals, reports of Royal Commissions or Commissions of Inquiry, and in a great variety of other public and private documents.

The nature and extent of DBS output is made known to the public in several ways. The principal vehicle is the DBS Catalogue which is issued approximately every two years and kept up to date by means of current supplements. The Catalogue and supplements are free on request to DBS headquarters (postal address: Dominion Bureau of Statistics, Ottawa, Ont.). The catalogue lists and describes the publications issued and the machine-readable and unpublished information that are available. Publications are grouped by subject areas: a commodity index has several thousand entries arranged in alphabetical order and cross-referenced where necessary to show the several publications in which information on a given subject may be found.

DBS publications may be obtained from DBS headquarters by using the order form supplied with the Catalogue; they may also be obtained through DBS regional offices in St. John's, Halifax, Montreal, Ottawa, Toronto, Winnipeg, Edmonton and Vancouver (listed in city telephone directories under "Government of Canada"). More frequently used DBS publications are also stocked by Information Canada bookstores in principal Canadian cities. Major public and university libraries, provincial libraries and the National Library in Ottawa have DBS publications available for reference. The DBS library in Ottawa contains a complete collection of all DBS publications issued since the Bureau was founded.

DIRECTORY OF SOURCES OF OFFICIAL INFORMATION

NOTE.—In the "Federal Data" column, the major source of information on each subject is given first; other sources follow in alphabetical order, with the exception of the National Film Board and the Dominion Bureau of Statistics which appear at the end of each listing with which they are concerned, except where they are the major source.

PART II.—SPECIAL MATERIAL PUBLISHED IN FORMER EDITIONS OF THE CANADA YEAR BOOK

It is not possible to include in any single edition of the Year Book all articles and descriptive text of previous editions. Therefore the following list has been compiled as an index to such miscellaneous material and special articles as are not repeated in the present edition. This list links the Year Book with its predecessors in respect of matters that have not been subject to wide change. Those Sections of Chapters, such as "Population", which are automatically revived when later census material is made available and to which adequate references are made in the text, are not listed unless they are in the nature of special contributions. The latest published article on each subject is shown, except when an earlier article includes material not repeated in the later one. When an article covers more than one subject it is listed under each appropriate heading.

Joseph Maingot, Ottawa, Ont.: to be Law Clerk and Parliamentary Counsel of the House of Commons from Jan. 1, 1971, *vice* P.-M. Ollivier.

PART IV.—ORDER OF CANADA AWARDS

In 1967, the Centennial of Confederation, there was established a system of honours and awards for Canada. On the recommendation of the Government, Her Majesty Queen Elizabeth the Second approved the issue of Letters Patent establishing a society of honour to be known as "The Order of Canada" for the purpose of according recognition to Canadian citizens and other persons for merit. The Order consists of three awards—the Companion of the Order of Canada, the Medal of Courage and the Medal of Service. The Chancellor and Principal Companion of the Order is the Governor General and nominations for awards are made directly to the Governor General by an Advisory Council composed of the Chief Justice of Canada (Chairman), the Clerk of the Privy Council, the Under Secretary of State, the Chairman of the Canada Council, the President of the Royal Society of Canada and the President of the Association of Universities and Colleges of Canada. Companions of the Order are selected on the basis of "merit, especially service to Canada or to humanity at large" and the maximum number shall never exceed 150. The Medal of Courage is awarded for the performance of "an act of conspicuous courage in circumstances of great danger" and is not, of course, limited to a fixed maximum number. The Medal of Service is awarded for different categories of meritorious service from that for Companions and not more than 50 may be given in any one year.

The first appointments were made on July 6, 1967 by the Governor General in his capacity as Chancellor and Principal Companion of the Order of Canada; they are listed in the 1969 Canada Year Book at p. 1269, together with subsequent appointments of Dec. 22, 1967, Apr. 30, 1968, June 28, 1968 and Dec. 20, 1968. From the latter date to December 1970, the following appointments were made:—

June 28, 1969

To be Companions of the Order of Canada

Charles S. BAND (since deceased)
John J. DEUTSCH
Ruth Hartman FRANKEL

Frances HYLAND
Harry JEROME
Samuel R. LAYCOCK
Kenneth LOCHHEAD

L  on LORTIE
Colin B. MACKAY, Q.C.
Walter C. MACKENZIE, M.D.
Right Reverend Malcolm A. MACLELLAN
Margaret MURRAY
Bruce NODWELL
Thomas H. RADDALL
Group Captain Stefan SZNUK, C.B.E.
Maud WATT
William A. WHITE
Ethel WILSON

PART V.—FEDERAL LEGISLATION, 1969-70

Successive issues of the Canada Year Book carry a continuous record of legislation passed by the Parliament of Canada. Listed here is legislation passed in the latter part of the First Session of the Twenty-eighth Parliament from May 9, 1969 to Oct. 22, 1969; in the Second Session from Oct. 23, 1969 to Oct. 7, 1970; and in the beginning of the Third Session from Oct. 8, 1970 to Dec. 18, 1970, when Parliament adjourned for Christmas recess. Naturally in summarizing material of this kind it is not possible to convey the full implication of a statute but only to give some indication of its content. The reader who is interested in any specific Act is referred to the *Statutes of Canada* in the given volume and chapter.

Legislation of the First Session of the Twenty-eighth Parliament,
May 9, 1969 to Oct. 22, 1969*

Subject, Chapter and Date of Assent	Synopsis
17 ELIZ. II	
Agriculture— 50 June 27	<i>The Pest Control Products Act</i> updates the pest control legislation passed in 1939 by adding government authority to regulate the manufacture, handling, use and advertising of products used for the control of pests and the organic functions of plants and animals, and authority to regulate manufacturing establishments in regard to prescribed control products for export or interprovincial movement.
Finance— 36 June 27	<i>Appropriation Act No. 3, 1969</i> (Main Supply) grants certain sums of money for the public service for the financial year ending Mar. 31, 1970.
Fisheries— 40 June 27	<i>An Act to amend the Fisheries Improvement Loans Act</i> increases the maximum amount of loan to a fisherman from \$10,000 to \$25,000, establishes a new period during which loans made by banks and other lenders to fishermen may be guaranteed by the government, and limits the federal liability during that period to \$10,000,000 for each type of lender.

* The First Session of the Twenty-eighth Parliament opened on Sept. 12, 1968; legislation passed and assented to between that date and May 8, 1969, is listed in the 1969 Canada Year Book at pp. 1272-1274.

**Legislation of the First Session of the Twenty-eighth Parliament,
May 9, 1969 to Oct. 22, 1969—continued**

Subject, Chapter and Date of Assent	Synopsis
Government—	
47 June 27	<i>The National Library Act</i> repeals the legislation under which the National Library previously functioned (RSC 1952, c. 330) and provides a new charter which will enable the Library to cope with current explosive library developments, to co-ordinate all federal library services and permit the development of a national network of library service. Reorganization of the National Library Advisory Council (as a Board) will enable it to give more adequate assistance to the National Librarian.
54 July 9	<i>The Official Languages Act</i> declares that the English and French languages are the official languages of Canada for all purposes of the Parliament and Government of Canada, and possess and enjoy equality of status and equal rights and privileges as to their use in all the institutions of the Parliament and Government of Canada.
Justice—	
37 June 27	<i>An Act to amend the Criminal Code</i> makes it an indictable offence for a person to engage in the practice of placing or agreeing to place bets on behalf of another person for a consideration.
38 June 27	<i>The Criminal Law Amendment Act, 1968-69</i> makes major changes in criminal law and procedures, amending particularly the Criminal Code with respect to abortions, homosexuality, lotteries and impaired driving and also amending the Parole Act, the Penitentiary Act, and the Prisons and Reformatories Act; in addition, certain consequential amendments are made to the Combines Investigation Act, the Customs Tariff and the National Defence Act.
Revenue—	
44 June 27	<i>An Act to amend the Income Tax Act</i> implements certain approved budget proposals, the most important being those dealing with the taxation of life insurance companies and the establishment of a 2-p.c. social development tax to help finance health insurance services, welfare and post-secondary education costs, and social development payments to the provinces.
Trade—	
39 June 27	<i>The Export Development Act</i> establishes the Export Development Corporation for the purposes of facilitating and developing trade between Canada and other countries by means of the financial and other powers provided in the Act. The authorized capital of the Corporation is \$25,000,000.
42 June 27	<i>The Hazardous Products Act</i> prohibits the advertising, sale and importation of the hazardous products listed in the Schedule to the Act.
49 June 27	<i>An Act to amend the Patent Act, the Trade Marks Act and the Food and Drugs Act</i> extends the authority of the Commissioner of Patents to grant licences to manufacture medicines which would allow a more thorough sampling of drugs, to grant licences permitting the importation of prescription drugs on a more flexible basis and to grant interim licences under certain circumstances; the Governor in Council is authorized to make regulations respecting procedural matters in connection with such licences.
55 July 9	<i>An Act to amend the Patent Act</i> removes from the Act the provisions fixing the fees to be paid on the filing of applications or the taking of other proceedings under the Act and authorizes the making of rules respecting the fees that may be charged and their payment.
Transportation and Communications—	
51 June 27	<i>The Telesat Canada Act</i> authorizes the establishment of a Canadian corporation, the objects of which are to set up satellite telecommunication systems providing, on a commercial basis, telecommunication services between locations in Canada, utilizing to the extent practicable Canadian research, design and industrial personnel, technology and facilities.
52 July 9	<i>The Atlantic Region Freight Assistance Act</i> revises the Act to include assistance to truckers as well as to railway companies in respect of the movement of goods out of the Atlantic region; authorizes the variation or removal of certain statutory reductions in rail freight rates under the Maritime Freight Rates Act; provides for assistance, in due course, to carriers, shippers and consignees in the region; and makes other and related amendments to the above-mentioned Acts.
53 July 9	<i>An Act to amend the Canada Shipping Act</i> makes various adjustments including, among others, the first regulation of air-cushion vehicles on navigable waters; permission for landed immigrants to hold certificates as masters, mates and engineers on ships; subjection of ships of nine instead of fifteen tons gross and over to inspection requirements; instituting government control over pollution of waters by refuse from ships; and requiring all vessels in Canadian waters to be fitted with radio installations and provided with operators.

May 9, 1969 to Oct. 22, 1969—concluded**

Subject, Chapter and Date of Assent	Synopsis
Miscellaneous—	
41 June 27	<i>An Act to amend the Food and Drugs Act and the Narcotic Control Act and to make a consequential amendment to the Criminal Code</i> prohibits the advertising of contraceptive devices and drugs to the general public except as authorized by regulation, and makes it an offence for any person, except under stipulated authority, to have a restricted drug in his possession or to traffic in it. Four drugs—LSD, DET, DMT and STP—are set out as restricted drugs. Consequential changes are made to the Criminal Code.
43 June 27	<i>An Act to amend the Historic Sites and Monuments Act</i> provides for membership on the Historic Sites and Monuments Board of an officer of the National Museums of Canada and for adjustment of the amount of remuneration paid to Board members by removing the stipulated amount.
45 June 27	<i>An Act to amend the National Housing Act, 1954</i> removes the ceilings on NHA mortgage interest rates; increases the maximum limits on funds the government can insure for NHA lending from \$11,000,000,000 to \$15,000,000,000; raises from \$5,200,000,000 to \$6,100,000,000 the amount the federal treasury can lend through CMHC; lengthens from 35 to 40 years the maximum life of new mortgages; extends loan qualifications to condominiums, hostels and dormitories; cuts from 2 p.c. to 1 p.c. the insurance fees paid on mortgage principal in monthly instalments; places more responsibility on CMHC by removing many clauses of the Act requiring Cabinet approval; and raises the amount that CMHC may spend on housing research and community planning.
46 June 27	<i>An Act to amend the National Housing Act, 1954</i> extends the forgiveness incentive feature of the sewage treatment loan provisions of the Act for five years to Mar. 31, 1975.
48 June 27	<i>The Oil and Gas Production and Conservation Act</i> provides for the control of oil and gas operations in the Yukon and Northwest Territories and the prevention of wastage and pollution.
56 July 9	<i>The Regional Development Incentives Act</i> authorizes the Government of Canada to develop incentives for the development of productive employment opportunities in regions determined to require special measures to facilitate economic expansion and social adjustment. The Governor in Council is authorized, after consultation with the province or provinces concerned, to designate the regions to which such incentives will apply.

**Legislation of the Second Session of the Twenty-eighth Parliament,
Oct. 23, 1969 to Oct. 7, 1970**

Subject, Chapter and Date of Assent	Synopsis
18 ELIZ. II	
Agriculture—	
1969	
10 Dec. 19	<i>The Prairie Grain Provisional Payments Act, 1969-70</i> authorizes provisional payments for the 1969-70 crop year in respect of unthreshed grain in the Prairie Provinces; payment to a producer shall not exceed \$3,000 and the aggregate of such payment to a producer and advance payments made to him under the Prairie Grain Advance Payments Act shall not exceed \$6,000.
1970	
23 Mar. 25	<i>An Act to amend the Agricultural Products Co-operative Marketing Act</i> amends the definition of "agricultural product" to include wheat other than wheat that is grown in the area defined as the designated area by the Canadian Wheat Board Act.
Banking—	
1969	
11 Dec. 19	<i>An Act to amend Schedule A of the Bank Act</i> changes the alternate name of the Banque Canadienne Nationale as it appears in Schedule A from "National Canadian Bank" to "Bank Canadian National".

**Legislation of the Second Session of the Twenty-eighth Parliament,
Oct. 23, 1969 to Oct. 7, 1970—continued**

Subject, Chapter and Date of Assent	Synopsis
Banking—concl. 1970	
19 Mar. 12	<i>An Act to amend the Quebec Savings Banks Act</i> permits that Bank to open branches anywhere within the Province of Quebec.
Consumer and Corporate Affairs— 1970	
34 Mar. 25	<i>The Textile Labelling Act</i> prohibits the sale, import or advertising of a prescribed consumer textile article unless the article has applied to it an approved label stating its textile fibre content.
48 June 26	<i>An Act to amend the Bills of Exchange Act</i> provides safeguards against fraud or unethical activity for a purchaser of consumer goods whose promissory note has been transferred to a sales finance company. Promissory notes attached to conditional sales contracts for consumer goods are required to be plainly marked "Consumer Purchase" and the purchaser now has a right of defence against a suit for non-payment if he can show that the original seller did not fulfil his part of the bargain. Postdated cheques drawn up more than 30 days in advance of payment date must also be so marked.
70 Oct. 7	<i>An Act to amend the Canada Corporations Act and other statutory provisions related to the subject matter of certain of those amendments;</i> the amendments relate to the administration of the Act, more particularly to provide for the payment of expenses incurred with respect to the investigation of the affairs of companies, and increase the membership of the Restrictive Trade Practices Commission from three to four.
73 Oct. 7	<i>The Standards Council of Canada Act</i> provides for the establishment of a Standards Council of Canada, the objects of which are to foster and promote in Canada the voluntary standardization of weights and measures, quality and performance of goods and industrial and commercial methods and practices.
Finance— 1969	
2 Dec. 19	<i>Appropriation Act No. 4, 1969</i> grants certain sums of money for the public service for the financial year ending Mar. 31, 1970.
1970	
21 Mar. 12	<i>An Act to amend the Small Businesses Loan Act</i> increases the limit of liability of the Minister of Finance in respect of loans made by individual lenders to encourage lending by small-volume lenders, extends the loan period to June 30, 1971, and sets the principal amount of guaranteed loans made during that period at not more than \$100,000,000 on loans by chartered banks and \$50,000,000 on loans by other lending institutions.
24 Mar. 25	<i>Appropriation Act No. 1, 1970</i> grants certain sums of money for the public service for the financial year ending Mar. 31, 1970.
25 Mar. 25	<i>Appropriation Act No. 2, 1970</i> grants certain sums of money for the public service for the financial year ending Mar. 31, 1971.
26 Mar. 25	<i>An Act to amend the Cape Breton Development Corporation Act</i> authorizes the Corporation to guarantee, up to the aggregate amount of \$100,000,000, repayment of money borrowed by companies and persons that are considered likely to make substantial contributions to the industrial development of Cape Breton Island and to guarantee the payment of interest on such borrowed money.
46 June 26	<i>Appropriation Act No. 3, 1970</i> grants certain sums of money for the public service for the financial year ending Mar. 31, 1971.
Fisheries and Water Resources— 1970	
27 Mar. 25	<i>An Act to amend the Coastal Fisheries Protection Act</i> extends the provisions of the Act to include the service and supply vessels attached to foreign fleets fishing in Canadian waters.
28 Mar. 25	<i>An Act to repeal the Deep Sea Fisheries Act;</i> the payment of bounties to fishermen as authorized by that Act is discontinued as no longer appropriate.

**Legislation of the Second Session of the Twenty-eighth Parliament,
Oct. 23, 1969 to Oct. 7, 1970—continued**

Subject, Chapter and Date of Assent	Synopsis
Fisheries and Water Resources—concl.	
32 Mar. 25	<i>The Saltfish Act</i> authorizes the establishment of the Canadian Saltfish Corporation and the regulation of interprovincial and export trade in saltfish to improve the earnings of primary producers of cured cod fish. Aggregate government loans or guarantee of borrowings may not exceed \$10,000,000.
47 June 26	<i>The Arctic Waters Pollution Prevention Act</i> is enacted for the purpose of preventing pollution of areas of the arctic waters adjacent to the mainland and islands of the Canadian arctic; it declares Canadian jurisdiction over pollution control up to 100 nautical miles from land and provides for fines of up to \$100,000 for dumping waste on arctic islands, in the water, or on the mainland.
52 June 26	<i>The Canada Water Act</i> provides for the management of the water resources of Canada, including research and the planning and implementation of programs relating to water conservation, development and utilization.
63 June 26	<i>An Act to amend the Fisheries Act</i> authorizes the establishment of national standards of water purity and gives the Department of Fisheries and Forestry new powers to prevent industrial pollution of Canadian waters except for areas covered by other anti-pollution legislation; construction of a plant that has not complied with orders by the Department on pollution safeguards may be halted and fine limits are raised to \$5,000 from \$1,000 with provision for daily fines of \$5,000 where anti-pollution regulations are ignored.
66 June 26	<i>The Northern Inland Waters Act</i> provides for the equitable sharing of rights to use water in the Canadian North among interests with legitimate claims on such use; ensures that the allocation of water rights is consistent with immediate and long-term regional and national interests; ensures that all undertakings planned for the use, diversion, storage or treatment of water meet acceptable engineering standards; and ensures that water users maintain or restore its quality to acceptable standards before returning it to its natural environment.
68 June 26	<i>An Act to amend the Territorial Sea and Fishing Zones Act</i> establishes the territorial sea of Canada at 12 miles in substitution for the previous limit of three miles, thus eliminating the previous nine-mile fishing zone which becomes incorporated within the 12-mile territorial sea, and authorizes the creation of exclusive Canadian fishing zones comprising areas of the sea adjacent to the coast of Canada.
Government— 1970	
33 Mar. 25	<i>The Statute Law (Supplementary Retirement Benefits) Amendment Act, 1970</i> provides supplementary benefits for certain persons in receipt of pensions payable out of the Consolidated Revenue Fund and amends certain Acts that provide for the payment of those pensions.
36 Mar. 25	<i>The International Development Research Centre Act</i> authorizes the establishment of an International Development Research Centre of Canada and provides for its administration and financial structure; the objects of the Centre are to initiate, encourage, support and conduct research into the problems of the economically underdeveloped regions of the world.
41 June 11	<i>The Expropriation Act</i> relates to the expropriation of land to provide for the acquisition and abandonment of land by the Crown in the right of Canada; for the appointment, remuneration and expenses of hearing officers and of negotiators; and for the payment of compensation, interest and costs.
49 June 26	<i>The Canada Elections Act</i> replaces the Canada Elections Act 1960 respecting the franchise of electors and the election of members of the House of Commons; it incorporates amendments approved by the Standing Committee on Privileges and Elections presented to the House of Commons on Mar. 19, 1970, which had the general purpose of facilitating the administration of the electoral process.
53 June 26	<i>An Act respecting the Electoral Boundaries Readjustment Act</i> changes the name of the electoral district of "Perth" to that of "Perth-Wilmot".
54 June 26	<i>An Act respecting the Electoral Boundaries Readjustment Act</i> changes the name of the electoral district of "Sarnia" to that of "Sarnia-Lambton".
55 June 26	<i>An Act respecting the Electoral Boundaries Readjustment Act</i> changes the name of the electoral district of "Burnaby-Richmond" to that of "Burnaby-Richmond-Delta".

**Legislation of the Second Session of the Twenty-eighth Parliament,
Oct. 23, 1969 to Oct. 7, 1970—continued**

Subject, Chapter and Date of Assent	Synopsis
Government—concl.	
56 June 26	<i>An Act respecting the Electoral Boundaries Readjustment Act</i> changes the name of the electoral district of "Glengarry-Prescott" to that of "Glengarry-Prescott-Russell".
57 June 26	<i>An Act respecting the Electoral Boundaries Readjustment Act</i> changes the name of the electoral district of "Missisquoi" to that of "Brome-Missisquoi".
58 June 26	<i>An Act respecting the Electoral Boundaries Readjustment Act</i> changes the name of the electoral district of "Wellington-Grey" to that of "Wellington-Grey-Dufferin-Waterloo".
59 June 26	<i>An Act respecting the Electoral Boundaries Readjustment Act</i> changes the name of the electoral district of "Maisonneuve" to that of "Maisonneuve-Rosemont".
60 June 26	<i>An Act respecting the Electoral Boundaries Readjustment Act</i> changes the name of the electoral district of "Argenteuil" to that of "Argenteuil-Deux Montagnes".
61 June 26	<i>An Act respecting the Electoral Boundaries Readjustment Act</i> changes the name of the electoral district of "Lanark and Renfrew" to that of "Lanark-Renfrew-Carleton".
69 June 26	<i>An Act to amend the Yukon Act, the Northwest Territories Act and the Territorial Lands Act</i> makes changes respecting the payment of indemnities and expenses to the members of the Councils of these Territories; broadens the powers of the Commissioners in Council respecting the administration of justice and prisons; increases the size of the respective Councils and the number of members elected thereto; permits the appropriation and surface control of territorial lands as land management zones; and makes certain changes in connection with the administration of the Act.
Insurance, Loan and Trust Companies— 1970	
14 Mar. 12	<i>An Act to amend the Canadian and British Insurance Companies Act and other statutory provisions related to the subject matter of certain of those amendments</i> makes certain main changes with respect to a letters patent system of incorporating companies and amending existing charters, a better and more flexible system of controlling companies in financial difficulty, an extension of prohibitions against investments and loans where conflict of interest may exist and an expansion of investment powers, as well as technical and administrative amendments.
16 Mar. 12	<i>An Act to amend the Foreign Insurance Companies Act</i> provides a better and more flexible system of controlling the Canadian operations of foreign insurance companies doing business in Canada and makes certain technical and administrative amendments.
17 Mar. 12	<i>An Act to amend the Loan Companies Act</i> makes certain main changes with respect to a letters patent system of incorporating companies and amending existing charters, a better and more flexible system of controlling companies in financial difficulty, an extension of prohibitions against investments and loans where conflict of interest may exist, and an expansion of investment and borrowing powers, as well as technical and administrative amendments.
22 Mar. 12	<i>An Act to amend the Trust Companies Act</i> makes certain main changes with respect to a letters patent system of incorporating companies and amending existing charters, a better and more flexible system of controlling companies in financial difficulty, an extension of prohibitions against investments and loans where conflict of interest may exist, and an expansion of investment and borrowing powers, as well as technical and administrative amendments.
Justice— 1969	
9 Dec. 19	<i>An Act to amend the Judges Act</i> authorizes the provision of salaries for eight additional judges.
1970	
31 Mar. 25	<i>An Act to amend the Parole Act</i> clarifies the section relating to times of commencement and expiration of imprisonment where consecutive and concurrent sentences exist, and the effect of forfeiture of parole on term of imprisonment.
39 June 11	<i>An Act to amend the Criminal Code</i> gives effect to the recommendations contained in the report of a Special Committee appointed in 1965 to study the problems related to the dissemination of varieties of "hate propaganda" in Canada.

**Legislation of the Second Session of the Twenty-eighth Parliament,
Oct. 23, 1969 to Oct. 7, 1970—continued**

Subject, Chapter and Date of Assent	Synopsis
Justice—concl. 40 June 11	<i>The Criminal Records Act</i> provides for the relief of persons who have been convicted of offences and have subsequently rehabilitated themselves. A convicted person may apply for a pardon five years after the completion of his sentence; if granted, records of the criminal proceedings will be sealed, to be opened only under certain limited conditions.
44 June 11	<i>An Act to amend the Supreme Court Act</i> makes amendments respecting appeals, which will expedite the business of the Court.
64 June 26	<i>The Law Reform Commission Act</i> authorizes the establishment of a commission for the reform of the laws of Canada.
Mining— 1970	
29 Mar. 25	<i>The Dominion Coal Board Dissolution Act</i> provides for the dissolution of the Dominion Coal Board and for the repeal of the Canadian Coal Equality Act, the Coal Production Assistance Act and the Dominion Coal Board Act.
38 May 13	<i>An Act to amend the Yukon Placer Mining Act</i> relates to the locating of placer mining claims in Yukon Territory.
43 June 11	<i>An Act to amend the Oil and Gas Production and Conservation Act</i> extends the provisions of the Act to oil and gas in areas beyond the Territories that do not lie within the geographical limits or under the administrative control of any one of the ten provinces and makes it clear that off-shore installations and vessels are included in the definition of pipeline; the Act gives effect to the division of administrative responsibility for the resources to which the Act applies between the Minister of Indian Affairs and Northern Development and the Minister of Energy, Mines and Resources.
Revenue— 1969	
6 Dec. 19	<i>An Act to amend the Customs Tariff and to make a consequential amendment to the Excise Tax Act</i> approves an advanced schedule of tariff reductions proposed in the Budget of June 3, 1969; reductions that were to have come into effect Jan. 1, 1972 as agreed under the Kennedy Round negotiations came into effect June 4, 1969.
7 Dec. 19	<i>An Act to amend the Excise Tax Act</i> authorizes the imposition of an air transportation tax of two kinds—an <i>ad valorem</i> tax for air transportation within the area defined as the "taxation area", and a flat dollar tax for air transportation out of Canada to points not within the taxation area.
8 Dec. 19	<i>An Act to amend an Act to amend the Income Tax Act</i> extends, to cover the taxation year 1970, the 3-p.c. surtax on individual and corporation income tax.
1970	
13 Mar. 12	<i>The Canada-Sweden Supplementary Income Tax Agreement Act, 1969</i> implements an agreement between the two countries for the purpose of avoiding double taxation, signed Jan. 21, 1966.
62 June 26	<i>An Act to amend the Excise Act</i> relates to certain alcoholic beverages and cigarettes.
Transportation— 1969	
3 Dec. 19	<i>An Act to authorize the provision of moneys to meet certain capital expenditures of the Canadian National Railway System and Air Canada for the period from the 1st day of January, 1969, to the 30th day of June, 1970, and to authorize the guarantee by Her Majesty of certain securities to be issued by the Canadian National Railway Company and certain debentures to be issued by Air Canada.</i>
1970	
20 Mar. 12	<i>An Act to amend the Railway Act</i> extends the authority of the Canadian Transport Commission to regulate and set the tolls charged by the telegraph or telephone companies to private wire services.
30 Mar. 25	<i>The Motor Vehicle Safety Act</i> sets out regulations respecting the use of national safety marks in relation to motor vehicles and provides for safety standards for certain motor vehicles imported into or exported from Canada or sent or conveyed from one province to another.
35 May 13	<i>An Act to amend the Canada Shipping Act</i> relates to the provision of medical and hospital services to crew members of vessels of foreign registry and to crew members of Canadian fishing vessels.

**Legislation of the Second Session of the Twenty-eighth Parliament,
Oct. 23, 1969 to Oct. 7, 1970—concluded**

Subject, Chapter and Date of Assent	Synopsis
Transportation— concluded	
45 June 26	<i>An Act respecting regulations made pursuant to section 4 of the Aeronautics Act</i> clarifies the validity of certain regulations and of orders, directions and documents made under authority of such regulations.
51 June 26	<i>An Act to postpone the expiration of certain provisions of An Act to amend the Canada Shipping Act</i> refers to the section of the Act relating to by-laws and orders respecting pilotage which was to have expired on June 30, 1970; the latest expiration date is now June 30, 1971.
72 Oct. 7	<i>The Shipping Conferences Exemption Act</i> exempts certain conference practices from the provisions of the Combines Investigation Act.
Miscellaneous— 1969	
1 Nov. 27	<i>The Expo Winding-up Act</i> provides for the dissolution of the Canadian Corporation for the 1967 World Exhibition and the disposition of its remaining assets and liabilities, the writing-off of \$125,000,000 representing Canada's share of the Corporation deficit and the deferral to 1972 of Quebec's obligation of \$5,500,000.
4 Dec. 19	<i>An Act to amend the Children of War Dead (Education Assistance) Act</i> confers eligibility for educational assistance on a group of children receiving compassionate pensions under the Pension Act whose eligibility for assistance was previously limited, and adapts the Act to changing practices in the higher education system.
5 Dec. 19	<i>An Act to amend the Company of Young Canadians Act</i> provides for the appointment by the Governor in Council of a Comptroller of the Company, whose approval is necessary for the payment of any money by the Company and for the entering into of any contract or other arrangement involving the payment of money; employees of the Company are required to provide the Comptroller with any information he deems necessary for the carrying out of his duties.
1970	
12 Mar. 12	<i>An Act to amend the Canada Student Loans Act</i> sets the supplementary allocation for a province at 30 p.c. of the basic loan provision; increases to \$115,000,000 the basic loan provision for the year commencing July 1, 1970, in line with the increase in the post-secondary student population; broadens the classes of lending institutions to which a student can apply for loans; and makes certain administrative changes.
15 Mar. 12	<i>An Act to amend the Company of Young Canadians Act</i> reduces the number of members of the Council of the Company and states that they are all to be appointed by the Governor in Council and that the Executive Director of the Council is responsible for the supervision of the volunteer-members of the Company as well as its staff; the objects of the Company are restricted to programs in Canada.
18 Mar. 12	<i>The Quarantine Act</i> is a revision of existing legislation respecting the introduction into Canada of infectious or contagious diseases.
37 May 13	<i>The Radiation Emitting Devices Act</i> prohibits the sale, lease or importation into Canada of any radiation-emitting device of a class for which standards have been prescribed unless the device and its components comply with those standards.
42 June 11	<i>An Act to amend the Industrial Research and Development Incentives Act</i> does not change the purposes of the Act but makes technical changes to remove certain anomalies in its provisions.
50 June 26	<i>An Act to amend the Canada Labour (Standards) Code</i> increases the minimum wage from \$1.25 an hour to \$1.65 an hour, effective July 1, 1970.
65 June 26	<i>An Act to amend the National Energy Board Act</i> increases the membership of the Board from five to seven, provides for their minimum salaries and for the appointment of an Associate Vice-Chairman of the Board, changes the method of appointing the Board's Secretary and fixing his term of employment, and makes other administrative changes.
67 June 26	<i>The Nuclear Liability Act</i> relates to civil liability for nuclear damage, providing special measures for compensation and for the establishment of a Nuclear Damage Claims Commission to deal with claims.
71 Oct. 7	<i>The Hudson's Bay Company Act</i> officially implements the transfer of the Company's head office to Winnipeg from London, England; from the date that supplementary letters patent granted by Her Majesty in the Right of Canada and in the Right of the United Kingdom amended its Charter for the purpose of so doing, the Company is continued as a body corporate and politic incorporated in Canada.

**Legislation of the Third Session of the Twenty-eighth Parliament,
Oct. 8, 1970 to Dec. 3, 1970**

Chapter and Date of Assent	Synopsis
1 Dec. 3	<i>The Federal Court Act</i> continues the court of law, equity and administration in and for Canada, previously existing under the name of the Exchequer Court of Canada, under the name of the Federal Court of Canada with a fundamental change in the court structure, and sets out its constitution, jurisdiction, administration, etc.
2 Dec. 3	<i>The Public Order (Temporary Measures) Act, 1970</i> provides temporary emergency powers for the preservation of public order in Canada; this Act expires on Apr. 30, 1971, or on such earlier day as may be fixed by proclamation unless before that day both Houses of Parliament, by joint resolution, direct that it shall continue until a day specified in the resolution.

PART VI.—CANADIAN CHRONOLOGY

Events in the general chronology from 1497 to 1866 are given in the 1951 Year Book, pp. 46-49; from 1867 to 1953 in the 1954 Year Book, pp. 1259-1264; and annually from that year in successive editions. A reprint entitled *Canadian Chronology, 1497-1960* is also available from the Dominion Bureau of Statistics. The following listing covers the period May 1, 1969 to Dec. 31, 1970 and it should be mentioned that certain of the dates given therein are approximate. The publication *Canadian News Facts*, Toronto, has been very valuable in the preparation of this chronology. References regarding changes in federal and provincial legislatures or ministries are not included but may be found in Chapter II on Constitution and Government or in the Appendix.

1969

May: *May 1*, Judge Lucien Coe Kurata removed from the Bench by the provincial Cabinet following Ontario Supreme Court finding that he was unfit to serve by reason of misbehaviour. *May 2*, Agreement completed between the Federal Government and the Trans-Canada Telephone System for the establishment of a communications satellite, *Telesat Canada*. Commercial and industrial construction contractors in Toronto locked out members of 14 building trades unions, following a strike May 1 by 3,000 members of the International Brotherhood of Electrical Workers who rejected the wage increase offered. National Indian Conference announced establishment of a six-member committee to define Indian rights and advise the Government of desirable changes in the Indian Act; accepted by Indian Affairs and Northern Development Minister Chrétien. Death in Montreal of Donald Gordon, age 67, former President of Canadian National Railways. *May 3*, 95th Kentucky Derby won by Majestic Prince owned by Frank McMahon of Vancouver and Calgary. *May 4*, Montreal Canadiens won the Stanley Cup, symbol of hockey supremacy, for the 16th time, in playoff with the St. Louis Blues. The Federal Government prohibited fishing in Placentia Bay, Nfld., and banned the export of fish from that area because of pollution suspected of being caused by the release of waste from the plant of Electrolytic Reduction Co. of Canada. *May 6*, Dr. Léo Marion, Dean of Pure and Applied Sciences, Ottawa University, named winner of the Chemical Institute of Canada Montreal Medal for significant leadership in the chemistry profession. The Governor General's Literary Award to Leonard Cohen for

English language poetry, announced Apr. 21, declined by the author. *May 7*, The CBC announced the removal of all tobacco advertising from its radio and television networks. *May 8*, Plans to establish in Canso, N.S., the world's first commercial plant to produce high-purity fish protein announced; considered by nutritionists as a major breakthrough in solving world shortage of protein. Mrs. C. H. A. Armstrong, Toronto, elected President of the Victorian Order of Nurses for Canada, the second woman President since its founding in 1871 when it was presided over by Lady Aberdeen, wife of the then Governor General. *May 11*, Death in Toronto of Kenneth L. Carter, Chairman of the Royal Commission on Taxation. *May 12*, Report of the federal task force on sport tabled in the House of Commons. International Joint Commission proposal that specific standards be established for control of pollution of the Red River accepted by Canadian and U.S. Governments. *May 19*, The 6,300-member Air Canada unit of the International Association of Machinists, on strike for a month, accepted a settlement giving an increase in wages of 16 p.c. over 26 months and other benefits. *May 21*, 34 distinguished Canadians elected Fellows of the Royal Society of Canada. Major amendments to the Ontario Highway Traffic Act of Ontario, increasing both fines and jail sentences, approved by the Legislature. The Federal and Quebec Governments announced agreement for the establishment of the first national park in Quebec, to be located in the Gaspé region. Death in Cannes, France, of Pierre Dupuy, former Canadian Ambassador to France and Commissioner-General of Expo 67. *May 26*, U.S. spacecraft *Apollo 10* completed an eight-day mission, successfully performing manoeuvres preliminary to a

moon landing in July. 31 students arrested following the February riots at Sir George Williams University committed to trial. *May 28*, Alberta Resources Railway, a 235-mile line from Grande Prairie north to Solomon, officially opened by Premier Strom. *May 29*, Establishment of federal Commission of Inquiry into the non-medical use of certain drugs and substances; Gerald LeDain, Chief Commissioner. *May 30*, The parents of six juveniles convicted of mischief in the Sir George Williams University computer centre lost their appeals against the imposition of \$250 fines for neglecting to exercise due care of their children. *May 31*, National Arts Centre in Ottawa officially opened by Prime Minister Trudeau.

June: *June 3*, Dr. W. G. Schneider, President, National Research Council, and Dr. J. A. Jeletsky, Geological Survey of Canada, awarded medals of the Royal Society of Canada for exceptional work in their respective fields of science. Finance Minister Benson announced Canada's agreement to the immediate application of all Kennedy Round tariff cuts, with one exception. *June 4*, Prime Minister Robarts of Ontario and Prime Minister Bertrand of Quebec signed historic agreement establishing a permanent Commission for Ontario-Quebec Co-operation to provide public services in the English and French languages and education to minority language groups wherever feasible, and to implement an exchange program between public servants. Defence Minister Léo Cadieux confirmed the taking over by Canada of responsibility for the defence of additional Canadian territory, following the closing in September of a North American Air Defence Command 375,000-sq. mile region now under U.S. command. *June 6*, Ceremonies held at the military cemetery at Beny-sur-Mer in France where 2,048 Canadian soldiers lie buried overlooking the beaches where they landed on D-day 25 years ago. *June 9*, Premier Bennett of British Columbia officially dedicated the Keenleyside Dam on the Columbia River, named in honour of Dr. Hugh Keenleyside, retiring co-Chairman of the B.C. Hydro and Power Authority. *June 11-12*, Third Federal-Provincial Constitutional Conference held in Ottawa; meeting was closed to the press and public for the first time; general agreement reached permitting the provinces to block federal spending in provincial areas of jurisdiction and granting the provinces access to all fields of taxation. *June 12*, Death in Ottawa of Senator Clement Augustus O'Leary of Nova Scotia. *June 12-13*, Canadian Special Olympics for the Mentally Retarded, sponsored by the Canadian Progress Club and aided by outstanding Canadian and U.S. athletes, held in Toronto; Mrs. Joseph Kennedy, mother of the late President John F. Kennedy and Senator Robert Kennedy, represented the Kennedy Foundation which supported the event. *June 15*, Georges Pompidou elected President of France, succeeding General Charles de Gaulle. *June 16*, Death in London, England, of Field Marshal Earl Alexander of Tunis, leader of the Allied Armies in North Africa and Italy during World War II, and former Governor General of Canada. *June 17*, The 1970 Canadian dollar coin to feature Manitoba's floral emblem, the crocus, in commemoration of the province's 100th anniversary. *June 19*, Establishment of Prices and Incomes Commission to inquire into the causes and consequences of inflation and suggest measures for stabilizing prices. *June 21*, The Queen's Plate, Canadian thoroughbred classic at Woodbine race track, won by Jumpin Joseph, owned by Warren Beasley of Toronto. Announcement of the discovery in Banff National Park of more than 150 tools and weapons, some apparently used 10,000 years ago to hunt mammoths. *June 23*, Defence Minister Léo Cadieux announced the reduction of Canadian Armed Forces to a strength of 80,000-to-85,000 from the present 98,000 by 1972.

June 25, A report on Indian policy tabled in the House of Commons recommended full citizenship for Indians, abolition of Indian treaties and assumption of control of reserves by Indians, as well as financial assistance during the transitional period. General Election held in Manitoba; the National Democratic Party led by Edward Schreyer defeated the Progressive Conservative Party led by Premier Weir, winning 28 of 57 seats, making it the first socialist government in the province's history and the only one currently in power in North America. *June 26*, An abridged report of the Royal Commission to inquire into the operation of Canadian Security methods and procedures, appointed Nov. 16, 1966, tabled in the House of Commons; recommendations include the revamping of the RCMP Directorate of Security and Intelligence; formation of an independent review board to hear complaints relating to security decisions, establishment of a security secretariat to formulate policy and procedures, etc. *June 27*, U.S. President Nixon visited the Place des Nations at Man and His World in Montreal in commemoration of the 10th anniversary of the St. Lawrence Seaway.

July: *July 1*, 102nd anniversary of Canadian Confederation observed on Parliament Hill by an interfaith religious celebration. H.R.H. Prince Charles invested at Caernarvon Castle as Prince of Wales. *July 2*, The first college of veterinary medicine in Western Canada opened at the University of Saskatchewan by Premier Ross Thatcher. The Governments of Quebec and Gabon signed their "first entente de co-operation," a small teacher-student exchange. Nine-day visit to Canada by six Soviet Union officials concluded; first political visit from that country since Canada's censure of its invasion of Czechoslovakia Aug. 21, 1968. *July 3*, The "Newfie Bullet" completed her last 548-mile run across Newfoundland, ending a service started in 1898. Clifford S. Malone, an honorary governor of the Montreal Stock Exchange, appointed ombudsman over exchange activities. *July 4*, Death sentence of Leonard Otto Borg for the murder of an RCMP corporal June 23, 1967, commuted to life imprisonment. *July 5*, Tom Mboya, Minister of Planning and Economic Development in the Kenya Government and a figure of international stature, killed by an assassin's bullet in Nairobi. *July 6*, Death in Rivière-du-Loup of Senator Jean-François Pouliot, ending a 44-year career as Member of Parliament and Senator. The Canadian icebreaker CGS *John A. Macdonald* left Dartmouth, N.S., to assist the U.S. tanker *Manhattan* in its attempt to navigate the Northwest Passage and test the feasibility of carrying crude oil from Alaska to American east coast ports. *July 9*, Federal legislation making English and French the official languages of the federal administration and creating bilingual districts in all provinces except Newfoundland and British Columbia received Royal Assent. Amendments to the Canada Shipping Act passed in the House of Commons allowing regulation of air-cushion vehicles on navigable waters and giving Parliament control over pollution by oil, chemicals, garbage and sewage. *July 10*, the CNTU and the QFL signed an agreement with employer associations in the construction industry, ending a strike begun May 12, characterized by demands for higher pay and increased job security and by a series of bombing incidents July 7-9 in Montreal and Quebec. Nearly 17,200 members of the United Steel Workers of America began a long "work stoppage" against plants of Inco in Sudbury and Port Colborne, Ont., resulting in a world shortage of nickel and an increase in the price of nickel in London, England. Report of a five-man committee of outside university professors investigating charges of racism against Professor Perry Anderson that precipitated the damage to the computer at Sir George Williams University cleared Prof. Anderson. *July 11*, Ontario Government announced

stringent regulations to control pollution from iron foundries, oil refineries and automobile and diesel exhaust and water pollution from dumping human waste from pleasure craft. Death in Edmonton of Mr. Justice John Howard Sissons, the first judge of the Northwest Territories Court and highly esteemed by the Eskimos who called him Ekoktoegee, "the one who listens". *July 13*, Soviet Union launched an unmanned spacecraft toward the moon. *July 14-16*, Prime Minister Trudeau confronted in Winnipeg and harassed in Regina by angry farmers protesting low cash incomes because of slow wheat sales; tract demonstrations on the highways of the Prairie Provinces continued the protests. *July 16-24*, U.S. spacecraft *Apollo 11*, launched on July 16, set down on moon surface at 4:18 p.m., July 20; Neil A. Armstrong was first to walk on the moon. *July 19*, Prime Minister Trudeau announced in Lethbridge, Alta., that interest-free advance cash payments to Western wheat farmers for farm-stored grain to the amount of \$250,000,000 would begin Aug. 1. *July 21*, Death in Ottawa of Dana L. Wilgress, Canadian diplomat and public servant for 44 years. Department of External Affairs announced a grant of \$25,000 to the provisional secretariat of the Francophone International Co-operation Agency, established Feb. 17 at a 23-member conference of French-language nations in Naimay, Africa. *July 23*, Governments of Saskatchewan and New Brunswick announced increases in minimum wages, the former by 20 cents an hour, effective Oct. 1, to \$1.25 for city workers and to \$1.15 for rural workers and the latter from \$1 to \$1.25 an hour for employees in the trades, food processing, manufacturing and service industries. *July 24*, 18 of 30 persons arrested during the rioting in Montreal on St. Jean Baptiste Day in 1968 convicted and sentenced to jail terms of up to four months and fined \$200 each. *July 25*, Two "landmark" Bills passed by Parliament—the omnibus Bill amending the Criminal Code and the Official Languages Act declaring English and French to be the official languages in Canada and providing for services in both languages to the public. After bitter opposition, closure imposed in the House of Commons to force passage of the proposed rule of procedure giving the Government power to control debate time without Opposition consent. *July 30*, Trent University, Peterborough, Ont., announced Canada's first three-year degree course in Indian studies, to begin in autumn 1969.

August: *Aug. 1*, Premier Thatcher of Saskatchewan announced that feed grain would be accepted in payment of university tuition for children of Saskatchewan farmers. *Aug. 2*, Death in Winnipeg of Senator Gunnar Thorvaldson of Manitoba. *Aug. 3*, A Canairielief aircraft crashed in Baffra during a mercy flight, killing four Canadians and bringing to about 20 the number of flyers killed while flying emergency supplies. *Aug. 4-6*, Tenth annual conference of provincial premiers held in Quebec, Que.; pollution, urban affairs and Indian affairs were discussed but discussion of tax reform and the report of the Carter Royal Commission was deferred. *Aug. 6*, Completion of a series of topographical maps, 918 in all, covering Canada on a four-miles-to-the-inch scale, announced by the Department of Energy, Mines and Resources. *Aug. 7*, Regional Economic Expansion Minister Marchand announced creation of new designated regions across Canada replacing smaller areas that qualified for assistance under the Area Development Agency. Fernand Michon of Longueuil, named Quebec's first "Worker of the Year", for designing special tools used in making the lunar module landing legs for U.S. *Apollo 11*. *Aug. 9*, Opening by Indian Affairs and Northern Development Minister Chrétien of Kejimikujik Park in Nova Scotia. *Aug. 11*, Housing program in Quebec launched with the formal signing of \$250,000,000 loan agreement with the Federal Government.

Aug. 15, Report of the Quebec Royal Commission on the Administration of Justice, headed by Judge Yves Provost, presented to the Quebec Government; recommendations covered fraudulent bankruptcies, armed robberies and other topics. Minister of Defence Léo Cadieux announced the closure of the military base at Clinton, Ont., and supply depots at London and Cobourg, Ont., and Ville LaSalle, Montreal, and a substantial reduction in the operations at St. Hubert, Que. Prime Minister Trudeau announced freeze on government expenditures in an attempt to halt the federal contribution to inflation. *Aug. 16*, Dismissal of controversial lecturer Stanley Gray from McGill University for participating in disruptive activities on campus. *Aug. 16-24*, First Canada Summer Games held at Halifax-Dartmouth; representatives of all provinces and territories participated. *Aug. 17*, The world's longest living heart transplant patient, Dr. Philip Blaiberg, died in Cape Town, South Africa. *Aug. 22*, Quebec Government announced extensive measures to be taken by the police forces of Quebec City and Montreal, the provincial police and the RCMP in a campaign against terrorist activities in the province. *Aug. 24*, U.S. oil tanker *SS Manhattan* left Chester, Pa.; it arrived at Sachs Harbour, N.W.T., Sept. 15 after sailing through the Northwest Passage. *Aug. 25*, Hon. Otto Lang, Minister in charge of Energy, Mines and Resources, announced federal plans for a concentrated effort to curb water pollution, the establishment of federal-provincial water management boards and heavy fines for non-compliance with regulations. *Aug. 27*, General Election held in British Columbia; Social Credit government under Premier Bennett returned to power; party standing—39 Social Credit, 11 New Democratic and 5 Liberal. *Aug. 28*, Under legislation strongly opposed by the unions, the British Columbia Government ordered compulsory mediation in the strike of 550 oil workers employed by six companies. *Aug. 29*, Agreement reached between the Quebec Government and school board negotiators and 70,000 elementary and high school teachers ended a two-year dispute characterized by strikes, lockouts, resignations and a protest march.

September: *Sept. 4*, Manitoba Government announced reduction of medical care premiums by about 88 p.c. effective Nov. 1, to be raised by taxation; regarded as more equitable in that the former method did not take ability to pay into consideration. *Sept. 8*, Resignation of Stanley Burke, CBC news broadcaster, to work for the end of the Nigerian civil war. Death in Unionville, Ont., of artist Frederick Horsman Varley, age 88, a member and a founder of the Canadian Group of Seven. *Sept. 10*, Riot Act read following demonstrations by French-speaking youths in St. Leonard, a suburb of Montreal, in the second incident of violence in eight days over school riots involving the English language; Raymond Lemieux, President of the Ligue pour l'intégration scolaire, which favoured teaching in French only, arrested. *Sept. 11*, Formal opening of the college for advanced aerospace studies on the testing range of the Space Research Institute Inc. straddling the Canada-U.S. border at Highwater, Que., and North Troy, Vermont. *Sept. 12*, Death in Ottawa of General Charles Foulkes, leader of the Canadian World War II forces in Europe and former Chairman of the National Defence Chiefs of Staff Committee. *Sept. 12-13*, Arrest of six Toronto men charged with kidnapping of Mrs. Mary Nelles, and recovery of \$200,000 ransom. *Sept. 14*, Dr. Gustave Gingras, Director of the Rehabilitation Centre of Montreal, named a co-winner of the Albert Lasker prize in medicine, one of the world's foremost honours for work with the handicapped. *Sept. 15*, Manitoba Government announced the reversal of its earlier decision to divert the Churchill River, a plan to extend the province's hydro resources that would have flooded

Southern Indian Lake and displaced about 700 people. The Protestant School Board of Greater Montreal assured the St. Leonard Parents' Association that English-language schooling would be provided for about 330 Catholic pupils in grades 1 and 2 in Protestant schools in Montreal North and Rosemount. Sixth Annual Review of the Economic Council of Canada made public; it stressed the need for proper measures to combat inflation, creation of a federal-provincial program for continuing studies of national goals, and suggested that all levels of government endeavour to eliminate completed programs. Settlement of the dispute between school board and teachers in Sydney, N.S., that kept 10,000 school children out of school for nine days. *Sept. 16*, Sale announced of a \$35,000,000 nuclear research reactor to the Chinese Atomic Energy Council in Taiwan by Atomic Energy of Canada Ltd.; to be used for peaceful purposes only. *Sept. 18*, Rt. Hon. John G. Diefenbaker presented in Winnipeg with the human relations award of the Canadian National Council of Christians and Jews for his advocacy of civil liberty and human rights. *Sept. 19*, Committee of Presidents of Universities of Ontario reported a decision that students found guilty of violence or obstruction on their campuses will be liable for expulsion but that protests may be made in a legitimate manner. Defence Minister Léo Cadieux announced reorganization of the Canadian Armed Forces, to include the reduction of NATO manpower contributions by about 50 p.c., the early retirement of aircraft carrier, HMCS *Bonaventure*, and removal of three infantry regiments—the Canadian Guards, the Queen's Own Rifles of Canada and the Black Watch (Royal Highland Regiment) of Canada—from the regular force. *Sept. 22*, Saskatchewan adopted an official flag—the upper half green signifying northern woodlands, the lower half yellow signifying wheat fields, superimposed by the provincial flower, the prairie lily, and by the provincial coat-of-arms. The highest mountain in the Canadian Arctic (8,760 feet) on Ellesmere Island, named after the late Dr. Marius Barbeau, Canadian anthropologist and researcher into Indian and Eskimo cultures. *Sept. 22-23*, Prime Minister Keith Holyoake of New Zealand visited Ottawa for talks with Canadian officials. *Sept. 23*, Third volume of the Report of the Royal Commission on Pilotage, established in 1962, released; recommendations were made regarding Atlantic ports, particularly the port at Saint John, N.B. Boycott of schools in St. Leonard by children of immigrants ended in commencement of attendance at two Protestant schools. *Sept. 24*, Health Minister Wells of Ontario announced ban on the use of the insecticide DDT in the province, effective Jan. 1, 1970; to be retained only in a few special cases and sold under permit only. *Sept. 26*, The Hydro-Quebec dam, *Manic 5*, re-named the Daniel Johnson Dam in memory of the late Premier Daniel Johnson, who died while visiting the dam one year earlier.

October: *Oct. 1-2*, Federal and provincial welfare Ministers met in Victoria; agreement reached to implement many of the recommendations made by study groups, including relating welfare assistance rates to the cost of living and linking job opportunities more closely with welfare programs. *Oct. 2*, A one-megaton thermonuclear device detonated by the U.S. 4,000 ft. underground on the Aleutian Island of Amchitka despite protests from the Soviet Union, Canada and Japan that the explosion might set off an earthquake; no effects were reported. *Oct. 2-3*, Foreign Minister Gromyko of the Soviet Union in Ottawa for talks with Canadian officials, the first visit of a Soviet Foreign Minister to Canada. *Oct. 7*, Diplomatic relations resumed between Canada and Gabon, severed Feb. 19, 1968 when Quebec officials were invited to attend an international Francophone conference on education

without first contacting Ottawa. A 16-hour wild-cat strike of police and firemen in Montreal, as a result of dissatisfaction with an arbitration board ruling on salary negotiations, caused violence, looting and chaos, two deaths and heavy property damage; the Quebec National Assembly in emergency meeting approved legislation ordering the men back to work Oct. 8; state of emergency declared and aid from the Army, the RCMP and the QPP was requested until Oct. 15; a new one-year contract with the City of Montreal was signed Oct. 30. Samples of moon surface collected by U.S. astronauts and brought to Ottawa for study were put on display by the Geological Survey of Canada. *Oct. 8*, Further evidence of dissatisfaction and tension in Quebec shown by a wildcat strike of about 1,000 Hydro-Quebec employees, a two-hour walk-out of employees of the Montreal General Hospital, and grievances of other workers in the public service fields. *Oct. 9*, Federal Government ordered the National Harbours Board and the Board of Grain Commissioners to begin shipping grain through strikebound Pacific ports, bypassing West Coast terminal elevator companies, shipments having been tied up since Sept. 25 when 3,200 members of the International Longshoremen's and Warehousemen's Union went on strike. *Oct. 10*, Death in Monterey, California, of Hon. Robert Henry Winters, former federal Cabinet Minister. 40th session of the Northwest Territories Council adjourned at Baker Lake, District of Keewatin; this was the first session held outside the territorial capital (Yellowknife) in an effort to "bring government to the people". Royal Assent given to an Act reducing the voting age limit for Manitoba provincial elections from 21 to 18 years and providing for election of members of the legislature as young as 18 years. *Oct. 11*, Montreal City administration charged that the Company of Young Canadians had links with groups financed by foreign countries in the Communist bloc and with separatist and subversive activities; further substantiation by the Vice-President of the Quebec Section of the Liberal Federation of Canada. *Oct. 15*, The Soviet Union launched third spaceship, *Soyuz 8*, for the first time putting three manned spacecraft into orbit at the same time; *Soyuz 6* launched Oct. 11 with two men, and *Soyuz 7* on Oct. 12 with three aboard. *Oct. 14*, Settlement of the 75-day strike by 14,500 employees of the Steel Co. of Canada Ltd. in Ontario and Quebec. Agreement between the Federal Government and the Government of New Brunswick announced for the establishment of a new national park about 55 miles north of Moncton, to be called Kouchibouguac. *Oct. 15*, Fisheries and Forestry Minister Davis announced a ban on the hunting of seal pups on Canada's East Coast in 1970; the use of aircraft, including helicopters, was prohibited in the hunting of older seals. Dr. John Everett Robbins of Ottawa, former President of Brandon University, appointed Canada's first Ambassador to the Vatican. *Oct. 16*, Construction of a \$4,000,000 container shipping terminal in Saint John, N.B., to be in use by early 1971, announced by New Brunswick Minister of Economic Growth. Presentation to Cardinal Paul-Emile Léger, former Roman Catholic Archbishop of Montreal, of the Royal Bank award of \$50,000 and a gold medal for his life of humanitarianism. *Oct. 17*, Strike of West Coast longshoremen, in effect for 23 days, settled with agreement on a two-year contract that was expected to set the pattern for handling containerization problems in most North American ports. *Oct. 21*, Saskatchewan Government announced a program to help farmers enter the livestock business at subsidized rates of interest together with a guarantee to banks of payment of any losses sustained in lending money on livestock enterprises, to come into effect Nov. 1. National Health and Welfare Minister Munro announced a ban on the use of the artificial sweetener cyclamate. *Oct. 22*, 28-month strike of Quebec teachers ended with

agreement on all aspects of teacher-employer responsibilities, salaries, workloads, pensions, teaching aids, promotions and holidays. *Oct. 23*, Explosion in the engineroom of the Canadian destroyer-escort *Kootenay*, during fleet exercises in the eastern Atlantic, killed nine men; caused by a faulty bearing installation. *Oct. 26*, Death in Toronto of J. Frank Willis, veteran radio announcer and actor. Rt. Hon. John G. Diefenbaker installed as Chancellor of the University of Saskatchewan. *Oct. 28*, The 43-year-old Canadian Union of Students announced its dissolution following the withdrawal of support from all but 11 of the 43 universities who were members, due to its radical policies and apathy among the students. The second report of the McRuer Royal Commission inquiry into civil rights in Ontario, established in 1964, tabled in the Legislature; its recommendations included a statutory Bill of Rights for Ontario, appointment of regional government ombudsmen, establishment of machinery to consider complaints regarding maladministration in the government services and to hear appeals against improper court procedures, etc. *Oct. 30*, Dr. Robert B. Salter, surgeon-in-chief of Toronto Hospital for Sick Children, awarded a 1969 Gairdner Foundation award for research on hip deformities, the first award to be made for orthopaedic surgery. *Oct. 31*, Five days of demonstrations against Bill 63, introduced by the Quebec National Assembly, which contained safeguards guaranteeing the right of parents to have their children educated in French or English in Quebec schools.

November: *Nov. 1*, Death in Ottawa of Senator Olive Irvine of Winnipeg, first woman Senator for the Prairie Provinces. *Nov. 3*, Prime Minister Trudeau announced in the House of Commons a 90-p.c. ban on the use of the pesticide DDT (dichlorodiphenyltrichlorethane), effective Jan. 1, 1970. External Affairs Minister Sharp announced the closing of Canadian diplomatic missions in seven countries—three in Latin America and one each in Cambodia and Laos, Cyprus and West Berlin—as an economy measure. *Nov. 3-4*, First Conference for the Users of the Great Lakes held in Toronto to discuss pollution problems; arranged by the University of Toronto's Great Lakes Institute, the Ontario Economic Council and the Ontario Water Resources Commission. *Nov. 4*, Report of the task force on Federal Government Information Services tabled in the House of Commons; recommendations included the establishment of an agency to be known as Information Canada to co-ordinate and expand all information programs. Workers at the Algoma Steel Corp., on strike since Aug. 28, voted to return to work following an agreement giving them increased pay and fringe benefits. After two years of negotiations, the first province-wide contract for 70,000 primary and secondary school teachers in Quebec was signed by government and teacher representatives. *Nov. 6*, Following a Federal Government ultimatum that members of the International Longshoremen's and Warehousemen's Union, on strike in Vancouver for six weeks, would be forced back to work by legislation, the members voted to return under their old contract for 90 days until a new committee of negotiators could work out a final settlement. The Federal Government announced a \$50,000,000 program to promote language training across Canada, to include grants to the provinces to assist in the costs of educational facilities for minority groups and for second-language teaching in French and English. *Nov. 7*, Federal Government White Paper on Taxation tabled in the House of Commons; it outlined proposals for reform of the income tax structure, including relief to low-income earners, the closing of loopholes and the imposition of a tax on capital gains. Manitoba Government announced a lottery

to be held during 1970, its centennial year, based on the running of Canadian-bred three-year-old horses in the Manitoba Derby July 15, with a minimum in prizes of \$175,000. *Nov. 8*, The SS *Manhattan*, the first commercial ship to navigate the Northwest Passage, ended its 11,000-mile polar voyage at Halifax Harbour to pay special tribute to the captain and crew of the Canadian icebreaker *John A. Macdonald*, which assisted the tanker on its voyage. Five Toronto men sentenced to from 10 to 15 years in jail for the \$200,000 kidnapping of Mrs. Mary Nelles of Toronto Sept. 7; a sixth was sentenced Feb. 18, 1970. *Nov. 10*, Announcement of federal plans to spend \$2,000,000 over the next eight years to restore historic sites in Yukon Territory to commemorate the Klondike gold rush. *Nov. 12*, Montreal City Council passed a by-law permitting it to prohibit marches, meetings or demonstrations on public ground that, in its view, contain threats of violence, and providing for 60-day jail terms or \$100 fines for persons violating such prohibition. *Nov. 14*, The annual Santa Claus parade, sponsored by Eaton's Department Store, cancelled in Montreal following the increase in violent demonstrations. The 128-day strike by 16,000 Sudbury employees of Inco ended in a settlement providing for wage and fringe benefits. *Nov. 14-24*, U.S. spacecraft *Apollo XII* successfully carried out the second moon flight. *Nov. 17*, Hon. Marcel Cadieux, Under-Secretary of State for External Affairs, awarded the Outstanding Achievement Award of the Public Service of Canada for 1969, and the 1969 Vanier Gold Medal by the Institute of Public Administration of Canada. *Nov. 18*, In a ruling by five judges of the Supreme Court of Quebec, a decision made by a Superior Court judge in September 1968 condoning the implementation of the unilingual school program in St. Leonard, was declared to be in error; to avoid disrupting the school year, it was allowed to stand pending the outcome of an action for a permanent injunction before the Superior Court. *Nov. 19*, Canadian Scientific Ship *Hudson* left Halifax on an 11-month research tour of the Atlantic, Antarctic, Pacific and Arctic Oceans to study ocean currents, continental shelves, oil prospects, marine biology, food potential of ocean waters, etc. *Nov. 20*, Dr. Gerhard Herzberg, retiring Director, Physics Division, National Research Council, and Carson W. Martin, Citizenship Branch, Ontario Department of Provincial Secretary, presented with gold medals of the Professional Institute of the Public Service of Canada; Dr. Herzberg for his work in the fields of pure and applied science and Mr. Martin for his efforts in the development of programs for the teaching of English to newcomers in Ontario. *Nov. 23*, Three-month strike at Falconbridge Nickel Mines Ltd. ended in a settlement on increase in wages. *Nov. 25-26*, A closed federal-provincial health conference held in Ottawa to study recommendations of a report on health care in Canada begun in 1968; recommendations included the organization of health services on a regional basis, nursing care on an individual basis, quantity buying of drugs and other supplies, etc. *Nov. 27*, In a brief presented to the Commons committee inquiring into the activities of the Company of Young Canadians, Lucien Saulnier, Executive Committee Chairman of the City of Montreal, testified that the security of Canada as a whole is being endangered by a revolutionary movement connected with the CYC. *Nov. 29*, Death near Ottawa of Dr. Diamond Jenness, age 83, anthropologist and expert on Canadian Indians and Eskimos, and former Chief of the Anthropology and Archaeology Division of the National Museum of Canada. *Nov. 30*, Ottawa Rough Riders won the Grey Cup, symbol of Canadian football supremacy, for the second consecutive year, by a score of 29-11 over the Saskatchewan Roughriders.

December: *Dec. 1*, The Section of the Criminal Code requiring the breathalyzer test for level of alcohol consumption where impaired driving is suspected came into effect. *Dec. 2*, At a conference on the development of the Arctic peoples held in Rouen and Le Havre, France, under the auspices of the French Foundation for Northern Studies, Canada, the United States, Denmark and the Soviet Union agreed to participate in a permanent international secretariat dealing with Eskimo problems. *Dec. 8-10*, Fourth Federal-Provincial Constitutional Conference held in Ottawa; little progress reported. *Dec. 10*, Charles Gagnon, charged with non-capital murder in the May 1966 separatist bombing death of Thérèse Morin, acquitted in Montreal by a Court of Queen's Bench jury. *Dec. 11*, Montreal's anti-demonstration by-law expired; a licence from the city to hold a demonstration is still required. Report of the Royal Commission inquiring into the collapse of Atlantic Acceptance Corp. Ltd. tabled in the Ontario Legislature; recommendations included proposals for separately regulating Ontario's finance companies, modification of provincial laws governing trust companies and improvements in prosecution of perpetrators of commercial fraud. *Dec. 12*, Aircraft carrier HMCS *Bonaventure* retired from the Canadian Navy in ceremonies in Halifax ending 25 years of service. *Dec. 15*, The \$12,000,000 Red River Community College in Winnipeg officially opened, an amalgamation and restructuring of the Manitoba Institutes of Technology and Applied Arts. Death in Victoria of Nancy Hodges, retired Senator and the first woman to sit as Speaker of a Provincial Legislative Assembly. *Dec. 17*, The Company of Young Canadians came under close government control under legislation appointing a financial comptroller to prevent misuse of public funds and placing the appointment of all volunteer workers in the hands of the Cabinet. Third report of the Royal Commission on Bilingualism and Biculturalism released; recommendations include adoption of the French-language unit as a basic organizational principle in all federal departments and agencies. Ontario Minister of Lands and Forests announced the development of a 150-acre park on the northeast shore of Lake Simcoe to be named for humorist Stephen Leacock in commemoration of the 100th anniversary of his birth. *Dec. 30*, Alberta Government announced an increase in the hourly minimum wages from \$1.25 to \$1.40 effective Apr. 1, 1970, and to \$1.55 Oct. 1, 1970. Pierre Vallières, former member of the terrorist FLQ, found guilty of manslaughter in connection with the May 1966 bombing death of Thérèse Morin in Montreal. Bank of Canada announced a new series of banknotes on which portraits of former Prime Ministers instead of that of the Queen will appear: on the \$5 bill, Sir Wilfrid Laurier; on the \$10 bill, Sir John A. Macdonald; on the \$50 bill, Rt. Hon. William Lyon Mackenzie King; and on the \$100 bill, Sir Robert Borden. *Dec. 19*, Defence Minister Léo Cadieux announced reduction of Canadian reserve armed forces by 4,000 men and the closing of 41 armoueries, to take place in 1970. Establishment of commission to consult with representatives of the Indians and study and advise as to claims re formal treaties and agreements; Lloyd Barber, Chief Commissioner. Federal announcement of increases in public service pensions ranging up to 42 p.c. for those retired in 1952 and earlier. *Dec. 22*, The lottery-style draw, in effect in Montreal, since Apr. 2, 1968 in an effort to reduce the municipal deficit, ruled illegal by the Supreme Court of Canada under provisions of the Criminal Code; contributions for the December and subsequent draws were returned to senders. *Dec. 23*, Quebec Government announced the establishment of a corporation to run lotteries and races in the province in line with recently passed federal legislation giving provinces responsibility for licensing gambling enterprises; first provincial lottery to be held Mar. 14, 1970. *Dec. 24*, Death in Montreal of Senator Gustave

Monette. *Dec. 30*, Annual poll of Canadian women editors voted Judy LaMarsh the most newsworthy woman of the decade; in 1969, in public affairs, Grace MacInnis; sports, Nancy Greene; literature and art, Margaret Laurence; music, Monique Leyrac; stage, screen, radio and television, Geneviève Bujold. Canada's first Laureate of Agriculture awarded to Dr. J. Milton Bell, Saskatoon, for his research on the chemistry of rapeseed products and on animal nutrition; the award was created by H. R. MacMillan, Vancouver, in commemoration of the 100th anniversary of the Ontario Agricultural College, to be presented every five years for significant contribution to Canadian agriculture.

1970

January: *Jan. 1*, The opening of centennial years and the creation of Yellowknife as the first city north of the 60th parallel in Canada marked New Year's Eve celebrations in Manitoba and the Northwest Territories. Fort William and Port Arthur, Ont., officially amalgamated under the name of Thunder Bay; total population 107,000. *Jan. 4*, Canada withdrew from international hockey competition in protest against rules regarding amateur status that did not permit use of the best Canadian players, resulting in world hockey championships, originally scheduled to be held at Montreal and Winnipeg, being held in Stockholm. *Jan. 10*, Patricia Marsden and Lucille Lee, Vancouver, B.C., became the first female Canadian trade commissioners. *Jan. 15*, Appointment of George Maltby, police chief at St. James-Assiniboia, Man., as Manitoba's first ombudsman. P & O liner *Oronsay*, on cruise from London to Hawaii, quarantined at Vancouver following an outbreak of typhoid fever. *Jan. 20*, Federal Government announced allocation of \$11,414,000 for Expo 70 at Osaka, Japan. *Jan. 22*, Quebec Government announced a series of increases in the general minimum hourly wage, bringing it to \$1.50 by Nov. 1, 1971. *Jan. 23*, Canada pledged \$30,000,000 in cash and commodities to the World Food Programme's 1971-72 operations. *Jan. 28*, Manitoba Day observed in Ottawa; Royal Winnipeg Ballet performed at the National Arts Centre climaxing a party staged by the Manitoba Centennial Corporation. *Jan. 29*, Canadian senior women's figure-skating championship won by Karen Magnussen of Vancouver; men's championship won by David McGillivray of Toronto, and the senior pair's by Val and Sandra Bezic of Toronto. Death in Vancouver of artist Lawren Harris, one of the two surviving members of the Group of Seven. *Jan. 30*, The Royal Canadian Academy Medal for distinguished service in the visual arts awarded by Governor General Michener in Ottawa to A. Y. Jackson, the only living member of the Group of Seven, A. J. Casson, a member of the Canadian Group of Painters, and posthumously to Lawren Harris, Franklin Carmichael, Frederick H. Varley, J. E. H. MacDonald and Arthur Lismer.

February: *Feb. 2*, CP Air and Air Canada announced plans to install combustion changers on their aircraft within the next two years to eliminate smoke-trail emission. *Feb. 2-3*, Conference of provincial treasurers with federal Finance Minister Benson took place in Quebec, Que. *Feb. 3*, Canadian-born Lord Thomson of Fleet invested with the Knight Grand Cross of the Order of the British Empire at Buckingham Palace, London, by H. M. Queen Elizabeth; and James G. Campbell, formerly of Springfield, N.S., and Montreal, made a Companion of the Order of St. Michael and St. George for services in Guyana. *Feb. 4*, Report of a Commission of Inquiry, established in February 1968, into management and labour practices in the ports of Montreal, Quebec and Trois-Rivières

tabled in the House of Commons; recommendations were made to establish local harbour committees with authority to supervise and discipline employees and enforce collective agreements through on-the-spot arbitration, and to create a permanent planning committee of technical advisers with labour and management representation. Quebec Government ordered a second investigation into the 16-hour strike Oct. 7, 1969, by the Montreal police force. Wrecking of oil tanker *Arrow* owned by Aristotile Onassis of Greece in Chedabucto Bay, N.S., resulted in serious pollution problems. *Feb. 6*, Prime Minister Trudeau announced allocation of \$130,000 annually for research facilities for Liberal Members of Parliament; since 1968 the Progressive Conservative Party has received \$125,000 annually and the New Democrat and Cr ditiste Parties, \$35,000 each. *Feb. 9*, Judy LaMarsh, former Secretary of State, and her publishers, McClelland and Stewart Ltd. of Toronto, found jointly guilty in libel suit brought by Ed Murphy, former radio reporter in Ottawa; \$2,500 damages and court costs awarded to the plaintiff. *Feb. 9-10*, Conference of business and professional leaders with the Prices and Incomes Commission, headed by Chairman Dr. John Young, held in Ottawa in an effort to develop a formula to ensure price restraint and stability. *Feb. 12*, Canada's first successful liver transplant operation took place at Notre Dame Hospital, Montreal; a three-month-old infant was the recipient. Ontario announced plans to establish a 5,000-acre wildlife area on marshland bordering the South Maitland River. *Feb. 14*, Betsy Clifford of Ottawa won the giant slalom at the world Alpine ski championships held at Val Gardena, Italy, and became the youngest competitor to win the gold medal in world or Olympic competition. *Feb. 16*, Interns and resident doctors in Quebec resumed night and weekend duties in 55 hospitals, following their refusal to work such shifts in an effort to obtain higher pay and improved conditions. *Feb. 16-17*, Federal and provincial government leaders conference in Ottawa; agreement reached on anti-inflation measures proposed by the Prices and Incomes Commission, and on the federal ban on phosphates in laundry detergents. *Feb. 23*, The first unit coal train, of 50 cars and three diesel locomotives, carrying 5,000 tons of coking coal from Luscar, Alta., to Vancouver, marked the resurrection of the coal mining industry in that area. *Feb. 25*, Death in Vancouver of Senator J. Wallace de Beque Farris, age 91. *Feb. 28*, Death in Paris of Canadian diplomat and author Graham McInnes.

March: *Mar. 2*, Appointment of Keith Spicer, Toronto, as Canada's first Commissioner of Official Languages, a position set up under the Official Languages Act, 1969. Foreign takeover of Denison Mines Ltd., Canada's largest uranium mining company, blocked by Federal Government. *Mar. 2-3*, H.M. Queen Elizabeth II and H.R.H. Princess Anne stopped in Ottawa and Vancouver en route to a nine-week tour retracing Captain James Cook's voyage across the Pacific 200 years ago from British Columbia's west coast to Australia's Botany Bay. *Mar. 6*, The Brier Cup, symbol of men's Canadian curling championship, won by Winnipeg team skipped by Don Duguid. *Mar. 9-14*, Canada's first Arctic Winter Games held at Yellowknife, N.W.T.; officially opened by Prime Minister Trudeau. *Mar. 14*, Expo 70 officially opened in Osaka, Japan. Eight of ten students from Trinidad and Tobago charged in the Sir George Williams University damage were convicted of conspiracy to obstruct the use of the computer centre and fined a total of \$32,500 or jail terms of up to four years, and ordered deported; the remaining two were later fined \$1,000 each. *Mar. 17*, Federal scientists confirmed that human blood cells can be injured by doses of cyclamate.

Mar. 18, Photographs of 19 former government leaders in the Senate unveiled in the Centre Block of the Parliament Building, witnessed by relatives and descendants of the men being honoured. Presentation of \$15,000 Molson prizes by the Canada Council to Arnold Spohn, Director, Royal Winnipeg Ballet; Jean-Paul Aude, Professor of Philosophy, Universit  de Montr al, religious scholar and writer; and Morley Callaghan, Toronto, author. A new contract between the Province of Quebec and the Federation of Residents of the Province gave pay increases to the 2,135 interns and residents in 55 hospitals. *Mar. 19*, Announcement of imposition of stringent federal regulations placing limits on foreign ownership of any productive uranium operation in Canada. *Mar. 20*, Canada and 18 other countries signed an agreement to create a Francophone International Co-operation Society, an agency for cultural and technological co-operation among French-speaking nations; Quebec, Ontario, New Brunswick and Manitoba, within the Canadian delegation, signed the founding charter. *Mar. 24*, Federal Fisheries Service banned commercial fishing on Lake St. Clair and its tributaries, and prohibited on Mar. 31 the sale of pickerel and perch taken from the western portion of Lake Erie, because of mercury contamination; the industries responsible were ordered to take effective action to prevent further pollution. A federal Act compelling car makers to include a number of safety features in new models starting in 1971 received Royal Assent. Rt. Hon. John G. Diefenbaker and Solicitor General George McIlraith celebrated 30 years in Parliament.

April: *Apr. 1*, Northwest Territories Government assumed complete responsibility for governing the Eastern and Upper Arctic regions of the N.W.T., up to this date administered by the Department of Indian Affairs and Northern Development. *Apr. 2*, The federal law making breath tests compulsory for motorists suspected of impaired driving declared null and void in British Columbia by a provincial Supreme Court judge; federal law upheld by the Supreme Court of Canada, June 26. Canada's first organ transplantation research group established in the medical faculty of the University of Alberta; announced by the President of the Medical Research Council and the President of the University. *Apr. 3*, Manitoba Government announced increase of 15 cents an hour to \$1.50 in the minimum wage effective Oct. 1; to \$1.25 from \$1.10 for workers under age 18, and to \$1.35 from \$1.20 for inexperienced workers. *Apr. 4*, Tuktoyaktuk incorporated as the first hamlet in the Northwest Territories, enabling the local people to govern their own affairs; population 600. *Apr. 7*, The 1970 Conservation Education Award of the American Wildlife Society made to Dr. David A. Munro, then head of the Canadian Wildlife Service, for his book *A Place for Everything*, a work on ecology dealing with the Canadian landscape. *Apr. 8*, Morley Callaghan of Toronto, Canadian author, received the fourth annual Royal Bank of Canada \$50,000 award. *Apr. 10*, Ontario announced new regulations on police firearms, binding on all police forces in the province; the use of mace for riot control outlawed. Plans for two new national parks announced, one around Artillery Lake northeast of Yellowknife, the other the 240-mile Trent Canal system in Ontario connecting Lake Ontario and Georgian Bay. *Apr. 11-17*, Mission of U.S. spaceship *Apollo 13* uncompleted as a result of an electrical power problem; returned to earth without landing on the moon. *Apr. 13*, Winners of the 1970 Governor General's Literary Awards for 1969: George Bowering (poetry in English); Michel Brunet (non-fiction in French); Louise Maheux-Forcier (fiction in French); Jean-Guy Pilon (poetry in French); Robert Kroetsch (fiction in English); and Gwendolyn MacEwen (poetry in English). *Apr. 16*, Fourth report

of the Royal Commission on Bilingualism and Biculturalism tabled in the House of Commons; recommendations include adoption by all provinces of anti-discrimination policies, equal conditions for citizenship for all immigrants regardless of country of origin, and languages other than English and French incorporated as options to the school system where demand is sufficient. *Apr. 17*, Full chartered-bank status given to the Quebec Savings Bank, founded in the 1840s, under the name of La Banque Populaire. Defence Minister Léo Cadieux announced the selection of Yellowknife, N.W.T., as permanent headquarters for Canadian military activities in the North, one of the steps being taken to strengthen Canada's military presence north of the 60th parallel. *Apr. 21*, Holding of the 1971 Canada Winter Games awarded to Saskatoon, Sask. Energy, Mines and Resources Minister Greene announced a ban on detergents and cleaning agents that do not meet government phosphate level standards by Aug. 1, 1970, and fines of up to \$5,000 a day to manufacturers and importers who do not comply. *Apr. 22*, Federal-provincial agreements signed giving additional federal aid of \$41,200,000 to Newfoundland and \$32,500,000 to New Brunswick to help overcome regional disparity. *Apr. 25*, Death in Port Colborne, Ont., of Judge Helen A. Kinnear, the first woman King's Counsel and first female county court judge in the Commonwealth. China launched its first satellite, the world's fifth nation to do so. *Apr. 29*, General Election held in Quebec; Liberal Party under Robert Bourassa defeated the Union Nationale government under Jean-Jacques Bertrand; party standing—72 Liberal, 17 Union Nationale, 12 Ralliement Crétiste and 7 Parti Québécois. *Apr. 30*, The first of CP Rail's new computer-commanded coal trains reached Roberts Bank, Vancouver, from the Kaiser mine at Sparwood in the Rocky Mountains.

May: *May 2*, At a meeting of the International Olympic Committee in Amsterdam, Montreal won the right to host the 1976 Summer Olympics, the first time for a Canadian city. *May 10*, Boston Bruins won the Stanley Cup, symbol of hockey supremacy, over St. Louis Blues in the fourth game of the best-of-seven playoff finals. Three-month strike of newspaper employees in Vancouver ended with agreement on a new contract. *May 10-13*, A "One Prairie Province" conference of lawyers, academics and politicians, held at Lethbridge, Alta., to discuss whether the three provinces should unite; conclusions were that politically such a union was unwanted, but that greater co-operation would be advantageous. *May 10-29*, Prime Minister Trudeau visited New Zealand, Australia, Malaysia, Singapore, and Japan where he took part in the Expo 70 Canada Day ceremonies. *May 11*, General Election held in Prince Edward Island; the Liberal government under Premier Alex Campbell returned to power; party standing—27 Liberal and 5 Progressive Conservative. *May 12*, Death in Edmonton of "Matt" Berry, pioneer in Canadian aviation, age 81. Federal and Saskatchewan Governments signed cost-sharing agreement for financial assistance of \$4,500,000 to assist in the development of the Meadow Lake area. *May 13*, Report of the House of Commons public accounts committee investigating the cost of refitting the aircraft carrier HMCS *Bonaventure* tabled; several senior officials and public servants severely criticized. *May 15*, Mail service in Montreal paralyzed by 5,000 mailmen and inside postal workers attending study sessions; strike vote set for May 19; disruption of service spread across Quebec and Ontario. *May 17*, A 1,500-pipe organ, to be built in Holland over the next 2½ years and installed in the National Arts Centre, presented, in token form, by Dutch-Canadians as formal thanks for Canada's role in the Second World War liberation of Holland; the token, a small six-stop instrument, was already

installed. *May 19*, Report of a committee appointed in 1967 to study agricultural problems in Canada tabled in the House of Commons; recommendations included a three-year crop diversion scheme to prevent extension of acreage planted to wheat, and abolition of ineffective subsidies and price supports. *May 19-20*, Postal workers began a series of rotating 24-hour strikes in the face of deadlocked negotiations; efforts of mediator A. W. R. Carrothers, President and Vice-Chancellor of the University of Calgary, collapsed June 2. *May 22*, The CRTC announced new regulations, including the requirement of 50-p.c. Canadian programming throughout the TV broadcast day, including prime time, effective in the fall of 1970 for the CBC and before September 1971 for the private sector. *May 25*, Former Magistrate Frederick J. Bannon of Toronto, whose association with an ex-convict was the subject of a judicial inquiry in 1968, disbarred by the Discipline Committee of the Law Society of Upper Canada. *May 29*, In a ceremony at Government House, the Great Seal of Canada was applied to the Hudson's Bay Company's 300-year-old charter, making the oldest established firm in North America officially Canadian; the head office was transferred to Winnipeg from London, Eng. *May 31*, Canadian dollar unpegged from U.S. \$0.925 in effect since May 2, 1962. A strike of 2,500 workers in 54 private hospitals in Quebec in support of a new wage contract began.

June: *June 1*, Soviet Union launched a two-man spacecraft, *Soyuz 9*, into orbit around the earth. Quebec Government announced establishment of a \$50,000 reward fund for information about those responsible for five bombings that occurred in Montreal, May 31. *June 2-13*, Federal emergency relief assistance following earthquakes and extensive flooding in Peru, including gift fund, aircraft ferrying service, tents and flour, totalling about \$1,000,000. *June 3*, Relief assistance of up to \$7,500,000 in food aid offered to Romania to assist in its recovery from disastrous floods. *June 4*, In a meeting with the Prime Minister and Cabinet Ministers, 200 Indians from across Canada rejected the Government's Indian policy presented in the White Paper of June 1969. *June 5-6*, Federal and provincial Finance Ministers at a Winnipeg meeting agreed on limiting inflation, upholding wage restraints and the provision by Ottawa of extra funds for provinces most in need, but challenged federal plans for tax reform. *June 12*, Death in Toronto of J. Keiller Mackay, age 81, former Lieutenant-Governor of Ontario and Justice of the Supreme Court of Ontario. *June 17*, Federal White Paper on unemployment insurance tabled in the House of Commons; proposals include increased coverage to \$100 weekly for up to 51 weeks and universal coverage except for self-employed persons. *June 18*, 50th anniversary of the Group of Seven commemorated by opening of an exhibition of 203 of their paintings at the National Gallery in Ottawa; attended by A. Y. Jackson, only living member of the Group. *June 19*, Interim report of the LeDain Commission tabled in the House of Commons. *June 22*, Following a wave of 12 terrorist incidents in Montreal during the past month, four men and two women appeared before a special inquiry for questioning regarding alleged subversive activities after seizure by police of money, dynamite, detonator caps, firearms, etc. *June 24*, Bomb explosion in a Department of National Defence building in Ottawa killing a woman employee. *June 25*, White Paper on foreign policy tabled in the House of Commons; its objectives included the fostering of economic growth, safeguarding of sovereignty, working toward peace and security, promoting social justice, enhancing the quality of life and ensuring environmental harmony, and announced Canada's plan to increase foreign aid allocations. Final volumes

of the Royal Commission on Bilingualism and Biculturalism tabled in the House of Commons. *June 26*, The revised Canada Elections Act lowering the minimum voting age in federal elections to 18 from 21 received Royal Assent; other provisions include the right to place party labels on ballots and the right to vote by proxy in certain instances. *June 30*, Ceremonies took place initiating the Changing of the Guard for the 1970 summer season; for the first time, the guard was composed entirely of students. *June 30-July 1*, Celebration of Manitoba's Centennial began with the arrival in Winnipeg of the Prime Minister and 23 federal Cabinet Ministers.

July: *July 2-15*, H.M. Queen Elizabeth II, H.R.H. the Duke of Edinburgh, H.R.H. Prince Charles and H.R.H. Princess Anne visited Manitoba and the Northwest Territories, taking part in centennial celebrations; H.R.H. Prince Charles was in Ottawa *July 3-5*. *July 5*, Crash near Toronto of an Air Canada DC-8 en route from Montreal to Los Angeles killed all 108 persons aboard; improper pre-landing procedure later found to be the cause; detailed investigation pending. *July 10*, Quebec Government passed its controversial health insurance Bill, bringing the province into the federal medicare plan. *July 11*, Damage estimated at \$2,000,000 caused by hail and wind in area of Viking, Alta. *July 14*, Mountain in the St. Elias Range, Yukon Territory, named Mount Leacock in memory of the Canadian humorist. A Canadian lake freighter, the *Eastcliffe Hall*, loaded with pig iron, sank in the St. Lawrence Seaway near Cornwall, Ont., with the loss of nine lives; the captain later found to be responsible. *July 15-17*, Conference of provincial attorneys general held in Halifax; agreement reached regarding divorce and compensation for victims of violent crime. *July 16-26*, 9th British Commonwealth Games held in Edinburgh, Scotland; nearly 2,000 athletes from 41 nations participated; Canada came third after Australia and England, with 18 gold medals, 24 silver and 2 bronze. *July 22*, Agreement reached in British Columbia's three-month strike in the construction industry following an ultimatum by Labour Minister Peterson forcing return to work under threat of fines and jail terms. *July 26*, Death in Montreal of Rt. Hon. Robert Taschereau, age 73, former Chief Justice of Canada. *July 28*, Public inquiry into the relationship between personnel of the Ontario Provincial Police force and any person or persons of known criminal activity, more specifically with persons alleged to have Mafia connections, begun in Toronto; the report, released Dec. 17, stated that there was no evidence of any improper relationship between OPP personnel and persons of known criminal activity but was critical of the behaviour of several senior officers. The Federal Government directed a reprimand to the Soviet Ambassador stressing the need for observance of international rules governing shipping, pointing to recent incidents involving Canadian and Russian vessels, the latest of which was the sideswiping in fog of a B.C. fishing boat on July 25 by a Soviet vessel off the west coast of Vancouver Island; agreement reached on Oct. 1 under which Soviet vessels would not fish in Big Bank area off the west coast of Vancouver Island in return for use of port facilities. *July 30*, Alberta Government announced establishment of stricter oil pollution standards, effective Nov. 1, including continuous reports on volumes of raw gas and condensate produced at a plant, and installation of automatic closing gates to be activated in the event of a leak.

August: The Ontario Federation of Agriculture and the Ontario Farmers' Union protested against the financing of education through property taxes, by withholding part of their taxes. *Aug. 2*, British

Columbia ferry *Queen of Victoria* and Soviet freighter *Sergey Yesinen* collided in Active Pass between the mainland and southern Vancouver Island; three passengers were killed and two injured; the Soviet vessel was placed under formal arrest at Vancouver; public investigation found the pilot of the freighter and the master of the ferry to be equally at fault. *Aug. 2-4*, Conference of provincial Premiers held in Winnipeg with pollution the major topic of discussion. *Aug. 2-9*, Prime Minister Trudeau on tour of the Yukon and Northwest Territories and British Columbia. *Aug. 5*, Federal Government made an extra \$100,000,000 available for low-income housing. *Aug. 10*, Following strike-ending legislation passed at an emergency session of the Quebec National Assembly, 40,000 striking construction workers returned to their jobs, union and employer groups to resume negotiations in conjunction with a government-appointed conciliation officer. *Aug. 13*, An ancient burial ground, estimated by archaeologists to be more than 3,000 years old, found in the Grand Lake area of New Brunswick. Automobile insurance in Manitoba came under government jurisdiction; supplementary coverage may continue to be sold by private companies. *Aug. 17*, Architectural Institute of Japan announced that the Canadian pavilion at Expo 70 in Osaka had won the top architectural award. *Aug. 17-20*, Conference of provincial Municipal Affairs Ministers held in Winnipeg; discussions included constitutional reform, pollution, financial matters and a national building code. *Aug. 19*, In a further development in the 11-month postal dispute, Thomas O'Connor of Toronto named mediator. Canada sent \$3,540,000 in emergency aid to Pakistan following devastating floods, mainly in food aid. *Aug. 20*, A heavy windstorm caused damage in the Lively, Copper Cliff, Sudbury and Field area of Ontario, killing at least four persons; damage in Sudbury alone estimated at \$6,000,000. *Aug. 23*, Federal-Quebec agreement signed creating a national park in the St. Maurice Valley 100 miles northeast of Montreal, known as Mauricie. *Aug. 24*, Saskatchewan Centre of the Arts, centennial project of Regina, officially opened by Governor General Michener. *Aug. 26*, Death in Quebec of Senator Jean-Marie Dessureault, age 81. *Aug. 27*, Controversy in St. Leonard, Que., over the teaching of language in elementary schools ended with assurance that the St. Leonard School Board would allow the children to return to English classes.

September: *Sept. 2*, Agreement reached between negotiators for the British Columbia pulp industry and the workers' unions, some of whom had been on strike since July 24, giving a 22.5-p.c. wage increase in a new contract. *Sept. 3*, The Vanier Medal awarded to Hon. Marcel Cadieux, Under-Secretary of State for External Affairs, for significant contributions to Canada as a public servant. *Sept. 4*, Agreement reached between the Council of Postal Unions and the Federal Government, giving the workers a 55-cent-an-hour wage increase over 23 years, amounting to an average 7.2-p.c. increase. *Sept. 8*, Ten suspended Sir George Williams University students each fined \$1,000 for participating in the computer centre "sit-in". General Election in Yukon Territory (see p. 1379). *Sept. 9*, A 100-p.c. ban on the use of pesticide DDT, effective Jan. 1, 1971, announced in Ottawa. Canaport, the first deep-water terminal for supertankers in North America, opened at Mispeet Point, N.B., near Saint John. *Sept. 14-15*, Provincial Premiers and Prime Minister Trudeau held closed sessions in Ottawa to discuss the amendment of the British North America Act and financial problems. *Sept. 15*, Voting age in Manitoba elections lowered from 21 to 18. *Sept. 16*, Federal and Saskatchewan Governments approved plans for a \$2,000,000 park project on land in southeast Saskatchewan owned by four Indian bands, the Indians to operate the

venture involving rental of land by cottagers. *Sept. 20*, Unmanned Soviet spaceship *Luna XVI* landed on the moon and obtained samples of the lunar surface, loaded them aboard a rocket and fired the missile toward earth. *Sept. 21*, Seventh Annual Review of the Economic Council of Canada released; its major concerns were health and education costs, trade barriers in the U.S. and Europe, the impending acceptance of Britain into the EEC, and Canada's dependency on exports. *Sept. 28*, Death in Cairo, Egypt, of President Gamal Abdel Nasser. *Sept. 30*, Agreement signed between Telesat Canada and Hughes Aircraft Company of California for construction of Canada's first domestic communications satellite.

October: *Oct. 3*, *Goin' Down the Road* named best Canadian movie of 1970. *Oct. 5*, James Richard Cross, senior British Trade Commissioner in Montreal, kidnapped from his home at gunpoint; the FLQ demanded a \$500,000 ransom, a charter flight to freedom for Quebec's most dangerous convicted terrorists and the publication of the FLQ manifesto in exchange for his release; both Federal and Quebec Governments rejected their demands; Mr. Cross was held hostage during nearly two months of negotiations that ended in his release Dec. 3 and in the safe conduct of the kidnappers and some members of their families—seven persons in all—to Cuba. *Oct. 8–18*, Medical specialists in Quebec on strike over the provincial medical care insurance plan ended their protest when fear of violence and "possible emergency medical requirements" followed the political crisis in the province. *Oct. 9*, The British flag was lowered for the last time in Suva, Fiji Islands, marking the end of British rule; H.R.H. Prince Charles represented H.M. Queen Elizabeth II at the ceremonies. *Oct. 10*, Roland Michener Award for meritorious public service in journalism established; to be presented for the first time in 1971. *Oct. 10–18*, Pierre Laporte, Minister of Labour in the Quebec Government, kidnapped by members of the FLQ and held hostage for a week until found dead of strangulation. *Oct. 12*, Combat-trained Army troops left Camp Petawawa for Ottawa to guard Members of Parliament and diplomatic officials. *Oct. 13*, External Affairs Minister Sharp announced in the House of Commons that Canada and People's Republic of China have agreed to establish diplomatic relations; Canadian and Taiwan (Formosa) diplomatic ties severed. General Election in Nova Scotia; Liberals under Gerald Regan defeated Progressive Conservative government under Premier Smith; party standing—23 Liberal, 21 Progressive Conservative and 2 New Democratic Party. *Oct. 15*, Prime Minister Bourassa of Quebec announced that he had asked for armed forces to assure the safety of the people and public buildings; 1,000 officers and men from the 22nd Regiment moved into Montreal. *Oct. 16*, Proclamation of the War Measures Act to deal with the danger of an "apprehended insurrection", violence and other illegal action in the Province of Quebec. Canadian ship *CSS Hudson* returned to Halifax, ending an 11-month circumnavigation of South and North America. *Oct. 22*, Rt. Hon. Lester B. Pearson named first Chairman of the Board of Governors of the Canada-based International Development Research Centre. *Oct. 26*, General Election in New Brunswick; Progressive Conservatives under Richard Hatfield defeated Liberal government under Premier Louis Robichaud; party standing—32 Progressive Conservative, 26 Liberal. *Oct. 30*, Robert Hudson, admitted leading figure in FLQ, received 30 separate sentences for armed robberies and conspiracy to commit holdups to finance FLQ subversive activities, adding up to 25 years.

November: *Nov. 2*, Rewards of up to \$75,000 offered jointly by the Federal and Quebec Governments

for information leading to the arrest of the "kidnappers or murderers" of Pierre Laporte and for information leading to the arrest of the kidnappers of James R. Cross, and unspecified rewards for information leading to the arrest of Paul Rose, Marc Carboneau, Jacques Rose, Bernard Lortie and Francis Simard. Federal Government announced further ban on arms sales to South Africa, in line with the UN Security Council's more severe resolution regarding such sales. *Nov. 6*, Bernard Lortie, 19, arrested in Montreal in connection with kidnapping of Pierre Laporte. *Nov. 9*, Death of General Charles de Gaulle, former President of France. *Nov. 11*, Agreement signed between the Quebec Federation of General Practitioners and the provincial government regarding payment of fees under medicare. *Nov. 12*, Quebec's first nuclear power station, located at Gentilly, officially opened; built as a co-operative effort by AECL and Hydro-Quebec. *Nov. 14*, Cyclone and tidal wave in East Pakistan caused deaths officially set at more than 200,000 and unofficially at 500,000. *Nov. 16*, Development loan of \$20,000,000 made by Canada to Botswana. *Nov. 17*, Unmanned Soviet spacecraft, *Luna 17*, landed on the moon; vehicle controlled from earth emerged to explore moon surface. Death in Montreal of Bernard Pilon, Liberal MP for Chambly, Que. *Nov. 20*, UN General Assembly voted 51 to 49 to seat the People's Republic of China; Canada voted for the resolution; a previous resolution required approval of two thirds of the Assembly. *Nov. 27*, Dr. J. M. Harrison, Assistant Deputy Minister of the Department of Energy, Mines and Resources, named 1970 winner of the Outstanding Achievement Award of the federal Public Service. *Nov. 28*, Montreal Alouettes won the Grey Cup, symbol of Canadian professional football supremacy, over Calgary Stampeders by a score of 23 to 10 in Toronto. *Nov. 30*, White Paper on income security tabled in the House of Commons; recommended limitation of family allowances on a sliding scale to families with incomes less than \$10,000 and an increase in the guaranteed income supplement.

December: *Dec. 1*, The Public Order (Temporary Measures) Act, 1970, replacing the War Measures Act, passed in the House of Commons. *Dec. 2*, Increases announced of 10 p.c. in pensions for disability and death related to military service and of 15 p.c. in veterans allowances, effective Apr. 1, 1971. *Dec. 3*, Royal Assent given to legislation changing the name of the Exchequer Court of Canada to the Federal Court of Canada, making it the main court of appeal in place of the Exchequer Court and extending the jurisdiction of its Trial Division; the number of judges is increased from eight to 12. *Dec. 7*, Report of the Royal Commission on the Status of Women tabled in the House of Commons; major recommendations relate to provision of day-care services for children, abortion on demand in certain circumstances, widespread provision of birth control information, restriction of marriage age to 18 years, relaxation of divorce laws, etc. *Dec. 7–8*, Federal and provincial Finance Ministers met in Ottawa to discuss tax concessions for small businesses. *Dec. 8*, Hon. John P. Roberts announced his resignation as Prime Minister of Ontario, effective after a new provincial Progressive Conservative leader has been chosen. *Dec. 9*, Report of the Senate committee on mass media tabled in the Senate; recommendations include establishment of a press ownership review board, subsidization of promising new journals, scholarships for postgraduate training in journalism, self-improvement in the media, etc. *Dec. 11*, Five Canadian Armed Forces pilots honoured by Peruvian Ambassador for assisting in earthquake disaster relief operations in Peru in June. *Dec. 14*, Salary increases recommended in the Report of the Advisory Committee on Parliamentary Salaries and Expenses. *Dec. 15*, The

ski hill constructed at Saskatoon for the Canada Winter Games officially opened by Nancy Greene Raine. *Dec. 16*, Three-month strike of 23,500 employees of General Motors of Canada settled by award of an immediate increase of 34 cents an hour and compromise on the issue of parity with their U.S. counterparts. *Dec. 17*, Agreement over medicare terms arrived at by the Quebec Government and the Quebec Federation of Medical Specialists. Vol. I of the Report of the Senate Committee on Science Policy released; recommends central planning and co-ordination by efficient government policy-making machinery, emphasis on the life and social sciences, on engineering and development and on economic and social objectives, and government encouragement of research and development by

industry. Retirement announced of Dr. Maurice Olivier, Law Clerk of the House of Commons, after 46 years of service. *Dec. 20*, Death in Ottawa of Arnold D. P. Heeney, Chairman of the Canadian sections of the International Joint Commission and the Canada-U.S. Permanent Joint Board on Defence, former Canadian Ambassador to the United States and Chairman of the Public Service Commission. *Dec. 21*, General Election held in Northwest Territories (see p. 1379). *Dec. 23*, Death in Trois-Rivières of Joseph-Alfred Mongrain, Liberal MP for that constituency. *Dec. 28*, Three suspects in the kidnapping and murder of Pierre Laporte surrendered to police after discovery of their hideout at St. Luc, near Montreal.

APPENDIX I

CONSTITUTION AND GOVERNMENT

Certain information given in Chapter II on Constitution and Government (closed off May 1, 1970) is updated in this Appendix to Dec. 31, 1970. Appointments during that period to the Queen's Privy Council for Canada, the Cabinet and the Senate are included in the Register of Official Appointments at pp. 1343-1344.

PAGE 78

Several changes were made in the Federal Cabinet between May 1, 1970 and Dec. 31, 1970; its composition on the latter date was as follows:—

Prime Minister.....	Rt. Hon. PIERRE ELLIOTT TRUDEAU
Leader of the Government in the Senate.....	Hon. PAUL JOSEPH JAMES MARTIN
Secretary of State for External Affairs.....	Hon. MITCHELL SHARP
Minister of Public Works.....	Hon. ARTHUR LAING
President of the Queen's Privy Council for Canada.....	Hon. ALLAN JOSEPH MACEachen
President of the Treasury Board.....	Hon. CHARLES MILLS DRURY
Minister of Finance.....	Hon. EDGAR JOHN BENSON
Minister of Industry, Trade and Commerce.....	Hon. JEAN-LUC PEPIN
Minister of Regional Economic Expansion.....	Hon. JEAN MARCHAND
Minister of Energy, Mines and Resources.....	Hon. JOHN JAMES GREENE
Minister without Portfolio.....	Hon. JOSEPH JULIEN JEAN-PIERRE CÔTÉ
Minister of Justice.....	Hon. JOHN NAPIER TURNER
Minister of Indian Affairs and Northern Development.....	Hon. JEAN CHRÉTIEN
Minister of Labour.....	Hon. BRYCE STUART MACKASEY
Minister of National Defence.....	Hon. DONALD STOVEL MACDONALD
Minister of National Health and Welfare.....	Hon. JOHN CARR MUNRO
Secretary of State of Canada.....	Hon. GÉRARD PELLETIER
Minister of Fisheries and Forestry.....	Hon. JACK DAVIS
Minister of Agriculture.....	Hon. HORACE ANDREW OLSON
Minister of Veterans Affairs.....	Hon. JEAN-EUDES DUBÉ
Minister of Consumer and Corporate Affairs.....	Hon. STANLEY RONALD BASFORD
Minister of Transport.....	Hon. DONALD CAMPBELL JAMIESON
Minister of Communications.....	Hon. ERIC WILLIAM KIRKANS
Minister without Portfolio.....	Hon. ROBERT KNIGHT ANDRAS
Minister of Supply and Services.....	Hon. JAMES ARMSTRONG RICHARDSON
Minister of Manpower and Immigration.....	Hon. OTTO EMIL LANG
Minister of National Revenue.....	Hon. HERB GRAY
Minister without Portfolio.....	Hon. ROBERT DOUGLAS GEORGE STANBURY
Solicitor General of Canada.....	Hon. JEAN-PIERRE GOYER.

PAGE 82

In October 1970, the following Parliamentary Secretaries were appointed to serve for 12-month periods:—

BARNETT J. DANSON.....	Prime Minister
ANDRÉ OUELLET.....	Secretary of State for External Affairs
JAMES A. JEROME.....	President of the Privy Council

Minister of Highways and Minister of Public Works.....	Hon. A. GARNET BROWN
Attorney General and Minister of Labour.....	Hon. LEONARD L. PACE
Minister of Lands and Forests, Minister of Fisheries and Minister i/c of administration of Emergency Measures Act.....	Hon. BENOIT COMEAU
Minister of Agriculture and Marketing, Minister of Municipal Affairs and Minister i/c of administration of Nova Scotia Liquor Control Act.....	Hon. J. WILLIAM GILLIS
Minister of Public Welfare, Minister of Mines and Minister i/c of administration of Water Act.....	Hon. ALLAN E. SULLIVAN
Provincial Secretary and Minister of Trade and Industry.....	Hon. RALPH F. FISKE
Minister of Public Health, Minister i/c of administration of Hous- ing Development Act, and Minister i/c of administration of Human Rights Act.....	Hon. D. SCOTT MACNUTT

PAGE 112

A General Election was held in New Brunswick on Oct. 26, 1970, which resulted in a return of 32 Progressive Conservatives and 26 Liberals. Following is the Twenty-fourth Ministry as at Nov. 16, 1970:—

<u>Office</u>	<u>Name</u>
Premier.....	Hon. RICHARD HATFIELD
Minister of Agriculture and Rural Development and Minister of Economic Growth.....	Hon. EDISON STAIRS
Minister of Education.....	Hon. LORNE MCGUGAN
Minister of Finance.....	Hon. JEAN-MAURICE SMARD
Minister of Fisheries and Environmental Affairs.....	Hon. WILLIAM COCKBURN
Minister of Health.....	Hon. PAUL CREAGHAN
Minister of Highways and Minister of Public Works.....	Hon. J. STEWART BROOKS
Minister of Justice.....	Hon. JOHN B. M. BAXTER
Minister of Labour and Provincial Secretary.....	Hon. RODMAN E. LOGAN
Minister of Municipal Affairs.....	Hon. JEAN-PAUL LEBLANC
Minister of Natural Resources.....	Hon. WILFRED BISHOP
Minister of Youth and Welfare.....	Hon. BRENDA ROBERTSON
Minister of Tourism.....	Hon. J. C. VAN HORNE
Minister i/c of New Brunswick Electric Power Commission.....	Hon. GEORGE E. MCINERNEY
Minister without Portfolio.....	Hon. G. EVERETT CHALMERS
Minister without Portfolio.....	Hon. CYRIL B. SHERWOOD
Minister without Portfolio.....	Hon. HORACE B. SMITH

PAGE 122

At a General Election held in the Yukon Territory on Sept. 8, 1970, the following Council Members were elected:—

Carmacks-Kluane.....	HILDA WATSON
Dawson.....	MIKE STUTTER
Mayo.....	RONALD A. RIVETT
Watson Lake.....	DONALD E. TAYLOR
Whitehorse East.....	NORMAN S. CHAMBERLIST
Whitehorse North.....	CLIVE TANNER
Whitehorse West.....	JOHN KENNETH MCKINNON

PAGE 126

A General Election was held in the Northwest Territories on Dec. 21, 1970. The Commissioner, Council and Council staff as at Jan. 29, 1971, were as follows:—

Commissioner..... S. M. HODGSON

Deputy Commissioner..... J. H. PARKER

Members of the Council—

Appointed..... J. H. PARKER
 HUGH CAMPBELL
 LOUIS-EDMOND HAMELIN
 LEO GERARD LEMIEUX

Elected—

Central Arctic..... LENA PEDERSEN
 Eastern Arctic..... BRYAN PEARSON
 Great Slave North..... JIMMY RABESCA
 Great Slave South..... PAUL W. KAESER
 High Arctic..... WELLAND WILFRED PHIPPS
 Keewatin..... WILLIE ADAMS
 Lower Mackenzie..... LYLE R. TRIMBLE
 Mackenzie Liard..... NICK G. SIBBESTON
 Western Arctic..... TOM BUTTERS
 Yellowknife..... DAVID SEARLE

Council Staff—

Clerk..... W. H. REMNANT
 Legal Adviser..... F. G. SMITH

PAGES 137-161

On Dec. 9, 1970, a Bill was placed before Parliament relating to the organization of the Government of Canada, including measures to establish a Department of the Environment; to delineate certain duties of the Minister of Energy, Mines and Resources and distinguish between his duties and those assigned to the Minister of Environment; to place responsibility for astronomical observatories in the National Research Council; to provide for Ministries and Ministers of State; to increase the number of Parliamentary Secretaries from 16 to a number equal to the number of Ministers holding office; and to provide for a Postmaster General.

This Bill had not yet been approved by Parliament at Dec. 31, 1970 nor has it been possible to include the changes in the Government Organization Chart (dated April 1971) inserted facing page 138.

APPENDIX II

VITAL STATISTICS

PAGES 285-290

The following are 1969 figures for Tables 1 and 2 of the Chapter on Vital Statistics:—

1.—Principal Vital Statistics, by Province, 1969

Province or Territory	Live Births		Deaths		Natural Increase ¹		Infant Mortality ²		Maternal Mortality		Marriages	
	No.	Rate ³	No.	Rate ³	No.	Rate ³	No.	Rate ⁴	No.	Rate ⁵	No.	Rate ³

¹ As at the date of the 1966 Census: residents only. ² Deaths under one year of age. ³ Deaths under 28 days. ⁴ By place of occurrence. ⁵ Per 1,000 live births. ⁶ Population fewer than 20,000 at date of 1966 Census but included as the largest urban centre in Prince Edward Island.

APPENDIX III

INCOME SECURITY AND VETERANS PENSIONS AND ALLOWANCES

PAGES 374, 378 AND 383

A White Paper on Income Security for Canadians was tabled in Parliament on Nov. 30, 1970, proposing a shift of Federal Government direct payments more in favour of people in need. The paper deals with income security programs for dependent children and aged persons, the Canada Pension Plan and the Canada Assistance Plan, and also summarizes the proposals presented in the White Paper on Unemployment Insurance. All the recommendations in this White Paper had not been approved by Parliament by Dec. 31, 1970 (the closing date for this volume) but since, if approved, they will change considerably the information under the headings on pp. 374, 378, 383 and 404, they are summarized in the following paragraphs.

Family Income Security Plan.—The existing Family Allowances program is to be replaced by a Family Income Security Plan expected to be effective in September 1971. Under the FISP, children up to age 16 in families with annual family incomes (husband and wife) of \$4,500 or less will get \$16 per month per child. The \$16 monthly benefit will be gradually reduced as incomes rise until a benefit of \$5 monthly is payable with respect to each child in families with annual family incomes of up to \$10,000. The benefit is to be eliminated for children in families whose incomes exceed \$10,000. No change is proposed for the Youth Allowances program but it is hoped that it can be integrated with the new FISP.

Guaranteed Income Supplement and Old Age Security.—Beginning January 1971, the basic Old Age Security pension is to be a flat \$80 a month. In April 1971, the Guaranteed Income Supplement is to be increased to \$55 monthly for a single person and to \$95 a month for a two pensioner couple. These increases in GIS will ensure that no qualified single person has income from all sources of less than \$135 a month, and no qualified two pensioner family less than \$255 a month. OAS pensioners who qualify for GIS will be entitled to annual escalations ranging from 1 p.c. and up to a maximum of 2 p.c. on the combined total to reflect price rises. Legislation has now been passed by Parliament to bring the new program into effect.

Canada Pension Plan.—Changes in the Canada Pension Plan cannot be effective until January 1973, because three years notice must be given to the provinces before major changes can be made in the Plan.

A number of changes are proposed for the Canada Pension Plan. The major changes relate to increasing the earnings ceiling so as to improve future pensions, improving the level of benefits for disabled contributors and widows and to introducing a new benefit for the wife of a disabled contributor.

It is proposed to increase the ceilings on pensionable earnings in annual stages from the \$5,500 it will be in 1972 to \$6,300 in 1973, \$7,100 in 1974, and \$7,800 in 1975.

With respect to the benefit for a disabled contributor, it is proposed that the pension be increased effective January 1973 so that the flat rate portion would be raised from \$27 a month to \$80 a month and the percentage component increased from 75 p.c. to 100 p.c. of the imputed value of the retirement pension, the total reduced by the amount received under Old Age Security at age 65.

With respect to the widow's pension under age 65, it is proposed to increase the flat rate portion from \$27 a month to \$80 a month and the percentage component from 37½ p.c. to 75 p.c. of her late husband's actual or imputed retirement pension. For widows age 65 or more, the pension is also to be set at \$80 plus 75 p.c. (rather than the present 60 p.c.) of her late husband's retirement pension, less the amount of the OAS pension.

A new benefit of \$80 a month is proposed for the wife of a disabled pensioner if she is under age 65 and has dependent children in her care.

It is also proposed to fix the basic exemption for a year at the current level of \$600; to retain \$800 as the lower limit for determining contributory status of self-employed persons; to continue (rather than discontinue as at present) benefits for the children of disabled contributors when the contributor reaches age 65; and to review the earnings test for retired pensioners in the 65-69 age group.

Canada Assistance Plan.—The Federal Government supports provincial social assistance through the Canada Assistance Plan under which it contributes one half of the costs. Discussions with the provinces will be held to try to overcome many of the inadequacies of social assistance by resolving a number of major issues such as entitlement to assistance, incentives, adequacy of assistance, appeals, communication and information, administration, cost-sharing arrangements, welfare and community development services, work activity projects, and the relationship of social assistance to welfare and manpower programs.

The Federal Government also proposes to give notice to the provinces of its intention to discontinue its cost-sharing agreements under the Old Age Assistance Act, the Blind Persons Allowances Act, the Disabled Persons Allowances Act and the Unemployment Assistance Act. The Canada Assistance Plan would then be the only instrument for sharing social assistance costs with the provinces.

Unemployment Insurance.—Major changes proposed in the Unemployment Insurance program include the extension of coverage, reduction in the qualifying contributory period, improvements in the amount of benefits and the introduction of special benefits to be paid on retirement and for unemployment due to sickness and maternity. The Federal Government will no longer contribute to administrative costs, which will be met by employers and employees, but it will pay for benefits due to a higher rate of national or regional unemployment. For the first time in Canada, experience rating will be used to determine contributions by large employers.

PAGE 404

On Dec. 2, 1970, the Minister of Veterans Affairs announced in the House of Commons, increases of 10 p.c. in pensions for disability and death related to military service and of 15 p.c. in the maximum allowances paid under the War Veterans Allowance Act, both effective Apr. 1, 1971. The announcement also included increases in the War Veterans Allowances income ceilings by amounts equivalent to the dollar value of the rate increases, and a statement to the effect that pensions and allowances, paid under the Civilian War Pensions and Allowances Act, will be aligned with those of the Pensions Act and the War Veterans Allowance Act.

On the same day, the Minister moved First Reading of a Bill to amend the Pension Act to incorporate therein most of the proposals of the Government's White Paper on Veterans Pensions, released Sept. 9, 1969, and the recommendations in the Report of the Standing Committee on Veterans Affairs, released June 9, 1970.
